

Synthetic leather zippered pouch

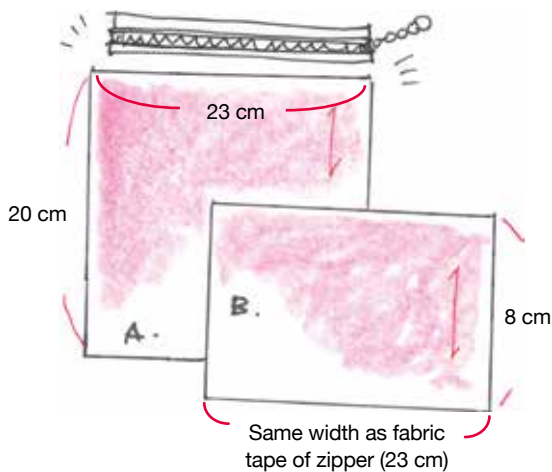

1. If there are no instructions to use a specific stitch, use the straight stitch.
2. Presser foot "J" (straight stitch) and zipper foot "I" will be used.

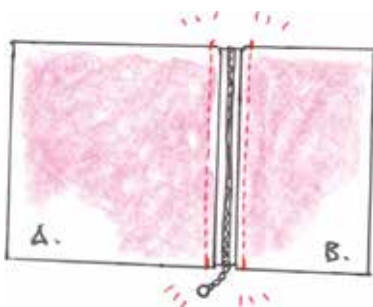

Use ostrich print (embossed) synthetic leather. After mastering zipper insertion, you will be able to make high-quality pouches on your own.

Materials

- 20 cm zipper with bead pull – 1
- Synthetic leather (23 cm wide × 28 cm)

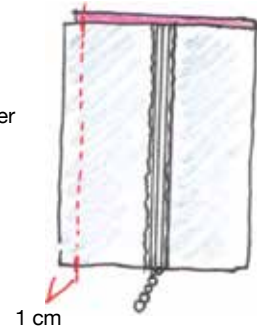

1 Attach the zipper.

Use the zipper foot „I“ or Narrow Zipper Foot F079 (sold separately) to attach the zipper so that it connects A and B, laying flat.

2 Stitch to form a tube.

Sew the two pieces together from the wrong side.

3 Turn right side out, and then stitch along the seam.

It's easier to sew with the zipper opened.

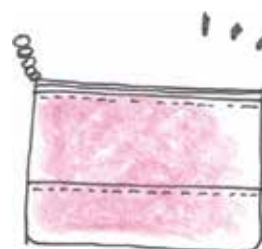

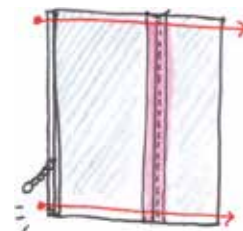

Fold open the seam allowance and stitch.

4 Turn wrong side out, stitch along both sides, and then turn right side out again.

Slightly open the zipper.

Done!
The stitching is what makes this project neat.

If clean stitching cannot be achieved, use the Roller Foot F066 (sold separately) or Non-Stick Foot F007N (sold separately) to smoothly feed and beautifully sew synthetic leather.
