Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

 WARNING	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.
 CAUTION	CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.
IMPORTANT	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
NOTE	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
	Electrical Hazard icons alert you to possible electrical shock.
Bold	Bold style identifies buttons on the machine's control panel or computer screen.
<i>Italics</i>	Italicized style emphasizes an important point or refers you to a related topic.
Courier New	Courier New font identifies messages shown on the machine's LCD.

- [Control Panel Overview](#)
- [LCD Overview](#)
- [Enter Text on Your Brother Machine](#)
- [Access Brother Utilities \(Windows\)](#)
- [USB / Ethernet Port Locations on Your Brother Machine](#)

Before Using Your Machine

Before attempting any printing operation, confirm the following:

- Make sure you have installed the correct software and drivers for your machine.
- For USB or network cable users: Make sure the interface cable is physically secure.

Selecting the correct type of paper

For high quality printing, it is important to select the correct type of paper. Be sure to read the information about acceptable paper before buying paper, and to determine the printable area depending on the settings in the printer driver or in the application you use to print.

Simultaneous printing, scanning and faxing

Your machine can print from your computer while sending or receiving a fax into memory or while scanning a document into the computer. Fax sending will not be stopped during printing from your computer. However, when the machine is copying or receiving a fax on paper, it pauses the printing operation, and then continues printing when copying or fax receiving has finished.

DCP models do not support the fax feature.

Firewall (Windows)

If your computer is protected by a firewall and you are unable to network print, network scan, or PC-FAX, you may need to configure the firewall settings. If you are using the Windows Firewall and you installed the drivers using the steps in the installer, the necessary firewall settings have been already set. If you are using any other personal firewall software, see the User's Guide for your software or contact the software manufacturer.

MFC-T920DW/MFC-T925DW

1. 1.8" Liquid Crystal Display (LCD)

Displays messages to help you set up and use the machine.

2. Mode Buttons

FAX

Press to switch the machine to Fax mode.

ESCÁNER (SCAN)

Press to switch the machine to Scan mode.

COPIA (COPY)

Press to switch the machine to Copy mode.

FOTO/WEB (PHOTO/WEB)

Press to switch the machine to Photo/Web mode.

3. Settings Buttons

Borrar/Atrás (Clear/Back)

Press to go back to the previous menu.

Ajustes (Settings)

Press to access the main menu.

OK

Press to select a setting.

Press to access the ring volume adjustment menu while the machine is idle.

Press to access the ink menu while the machine is idle.

- Press to store Speed Dial and Group numbers in the machine's memory.
- Press to look up and dial numbers that are stored in the machine's memory.

Press to configure the wireless settings while the machine is idle.

Press to scroll through the menus and options.

- Press to move the cursor left or right on the LCD.
- Press to either confirm or cancel a procedure which is in progress.

4. Telephone Buttons

Teléfono (Hook)

Press before dialing to ensure a fax machine answers, and then press **Inicio Negro (Black Start)**.

If the machine is in Fax/Tel (F/T) mode and you pick up the handset of an external telephone during the F/T ring (pseudo/double-ring), press **Teléfono (Hook)** to talk.

Remarcar/Pausa (Redial/Pause)

- Press to redial the last number you called.
- Press to select and redial the numbers from the Outgoing Call History or Caller ID History.
- Press to insert a pause when dialing numbers.

5. Dial Pad

- Use to dial fax and telephone numbers.
- Use as a keyboard to enter text or characters.

6. **Detener/Salir (Stop/Exit)**

- Press to stop an operation.
- Press to exit from a menu.

7. Start Buttons

Inicio Negro (Black Start)

- Press to start sending faxes in black and white.
- Press to start making copies in black and white.
- Press to start scanning documents (in color or black and white, depending on the scan setting).

Inicio Color (Color Start)

- Press to start making copies in full color.
- Press to start scanning documents (in color or black and white, depending on the scan setting).

8. Power On/Off

Press  to turn on the machine.

Press and hold  to turn off the machine. The LCD displays [Shutting Down] and stays on for a few seconds before turning itself off. A connected external telephone or Telephone Answering Device (TAD) will always remain available.

If you turn off the machine using , it will still clean the print head periodically to maintain print quality. To prolong print head life, provide better ink efficiency, and maintain print quality, keep your machine connected to a power source at all times.

DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

1. **Liquid Crystal Display (LCD)**

Displays messages to help you set up and use the machine.

2. **Warning LED**

Blinks in orange when the LCD displays an error or an important status message.

3. **Menu Buttons**

Menú (Menu)

Press to access the main menu.

▲ or ▼

Press to scroll through the menus and options.

OK

Press to select a setting.

4. **Detener/Salir (Stop/Exit)**

- Press to stop an operation.
- Press to exit from a menu.

5. Power On/Off

LCD Overview

Related Models: MFC-T920DW/MFC-T925DW

The Home screen shows the machine's status when the machine is idle. When displayed, this indicates that your machine is ready for the next command.

Home Screen

1. **Quiet Mode**

This icon appears when the [Quiet Mode] setting is set to [On].

The Quiet Mode setting can reduce printing noise. When Quiet Mode is turned on, the print speed becomes slower.

2. **Wireless Status**

Each icon in the following table shows the wireless network status:

	The wireless network is connected. A three-level indicator in the Home screen displays the current wireless signal strength.
	The wireless access point cannot be detected.
	The wireless setting is disabled.

3. **Date and Time**

Displays the date and time set on the machine.

4. **Faxes in Memory**

Displays how many received faxes are in the machine's memory.

5. **Receive Mode**

Displays the current Receive Mode.

When the Distinctive Ring feature is turned on, the LCD displays [D/R].

Access Brother Utilities (Windows)

Brother Utilities is an application launcher that offers convenient access to all Brother applications installed on your computer.

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

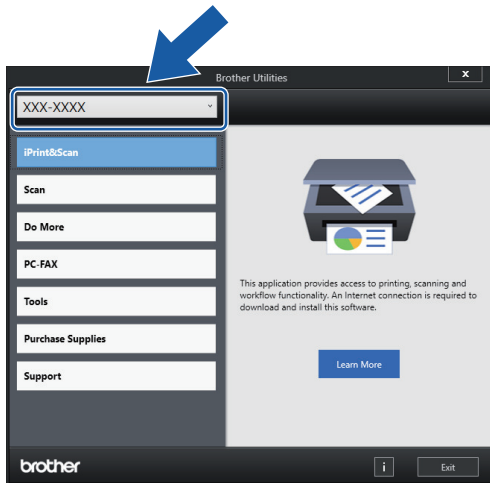

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Select your machine.

3. Select the operation you want to use.

Related Information

- [Introduction to Your Machine](#)
 - [Uninstall the Brother Software and Drivers \(Windows\)](#)

Uninstall the Brother Software and Drivers (Windows)

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Click the drop-down list, and then select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Uninstall**.

Follow the instructions in the dialog box to uninstall the software and drivers.

Related Information

- [Access Brother Utilities \(Windows\)](#)

USB / Ethernet Port Locations on Your Brother Machine

The USB and Ethernet ports are located inside the machine (Ethernet ports are available only for certain models).

To install the driver and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

(Windows) Or, use the Brother installation disc to set up your machine (not available in all countries).

1. Place both hands under the plastic tabs on both sides of the machine to lift the scanner cover (1) into the open position.

2. Locate the correct port (based on the cable you are using) inside the machine as shown.

 Carefully guide the cable through the cable channel and out the back of the machine.

3. Gently close the scanner cover using both hands.

- [Paper Handling and Printing Problems](#)

Load Paper in the Paper Tray

- Load Cut-Sheet Paper or Photo 2L Paper in the Paper Tray
- Load Legal Size Paper in the Paper Tray
- Load Photo Paper in the Paper Tray
- Load Envelopes in the Paper Tray

Load Cut-Sheet Paper or Photo 2L Paper in the Paper Tray

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- Load only one size and type of paper in the paper tray at a time.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine. (DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Lift the output paper tray cover (1).

4. Gently press and slide the paper width guides (1) and then the paper length guide (2) to fit the paper size.

5. Fan the stack of paper well to avoid paper jams and misfeeds.

Always make sure the paper is not curled or wrinkled.

6. Gently load paper in the paper tray with the printing surface **face down**.

Make sure the paper is flat in the tray and the paper length guide (1) touches the edges of the paper.

IMPORTANT

- Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.
- Loading more than 20 sheets of Photo 2L (5" x 7")/(13 x 18 cm) paper may cause paper jams.

To add paper before the tray is empty, remove the paper from the tray and combine it with the paper you are adding. Always fan the stack of paper well to prevent the machine from feeding multiple pages.

7. Gently adjust the paper width guides (1) to fit the paper.
Make sure the paper width guides touch the edges of the paper.

8. Close the output paper tray cover.

9. Slowly push the paper tray completely into the machine.

10. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- Load only one size and type of paper in the paper tray at a time.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine. (DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Lift the output paper tray cover (1).

4. Press the square paper tray expansion button (1) and slide out the paper tray until the square paper tray expansion button locks into the square LGL hole.

5. Gently press and slide the paper width guides (1) and the paper length guide (2) to fit the paper size.

6. Fan the stack of paper well to avoid paper jams and misfeeds.

 Always make sure the paper is not curled or wrinkled.

7. Gently load paper in the paper tray with the printing surface **face down**.

Make sure the paper is flat in the tray and the paper length guide (1) touches the edges of the paper.

IMPORTANT

Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.

To add paper before the tray is empty, remove the paper from the tray and combine it with the paper you are adding. Always fan the stack of paper well to prevent the machine from feeding multiple pages.

8. Gently adjust the paper width guides to fit the paper.
Make sure the paper guides touch the edges of the paper.

9. Close the output paper tray cover.

10. Slowly push the paper tray completely into the machine.

11. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

Load Photo Paper in the Paper Tray

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- Load only one size and type of paper in the paper tray at a time.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine. (DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Lift the output paper tray cover (1).

4. Gently press and slide the paper width guides (1) to fit the paper size, and then lift the stopper (2).

5. Close the output paper tray cover.

6. Load up to 20 sheets of photo paper with the printing surface **face down**.
Loading more than 20 sheets of photo paper may cause paper jams.

7. Lift the output paper tray cover.
8. Gently adjust the paper width guides (1) to fit the paper.
Make sure the paper width guides touch the edges of the paper and the paper is flat in the tray.

9. Close the output paper tray cover.

10. Slowly push the paper tray completely into the machine.

11. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

Load Envelopes in the Paper Tray

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- You can load envelopes in a variety of sizes. See *Related Information: Paper Type and Paper Size for Each Operation*.
- When you load envelopes in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine. (DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)

- Before loading envelopes in the tray, press the corners and sides of the envelopes to make them as flat as possible.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine.

3. Lift the output paper tray cover (1).

4. Load up to 10 envelopes in the paper tray with the printing surface **face down**. Loading more than 10 envelopes may cause paper jams.

5. Gently press and slide the paper width guides (1) and paper length guide (2) to fit the size of the envelopes. Make sure the envelopes are flat in the tray.

IMPORTANT

If envelopes are multi-feeding, load one envelope in the paper tray at a time.

6. Close the output paper tray cover.

7. Slowly push the paper tray completely into the machine.

8. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

Load Paper in the Manual Feed Slot

Related Models: DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW

Load special print media in this slot, **one sheet of paper** at a time.

The machine automatically turns on Manual Feed mode when you put paper in the manual feed slot.

1. Open the manual feed slot cover.

2. Lift the paper support.

3. Slide the manual feed slot paper guides to fit the width of the paper you are using.

-
4. Load only **one sheet of paper** in the manual feed slot with the printing surface **face up**.

Using both hands, adjust the manual feed slot paper guides to make sure there is no gap between them and the paper.

When using envelopes, load the envelopes with the printing surface **face up** and the flap on the left as shown in the illustration.

IMPORTANT

- DO NOT load more than **one sheet of paper** in the manual feed slot at any time. Doing this may cause a paper jam. When printing multiple pages, do not feed the next sheet of paper until the LCD displays a message instructing you to feed the next sheet.
- DO NOT load paper in the manual feed slot when you are printing from the paper tray. Doing this may cause a paper jam.

-
5. Using both hands, push **one sheet of paper** into the manual feed slot until the front edge touches the paper feed rollers. Release the paper when you feel the machine pull it. The LCD displays [Ready]. Follow the instructions displayed on the LCD.

When loading an envelope, or a sheet of thick paper, push the media into the manual feed slot until you feel the paper feed rollers pull it.

6. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

- If the document does not fit on one sheet, the machine will prompt you to load another sheet of paper. Place another sheet of paper in the manual feed slot, and follow the instructions displayed on the LCD.
 - Make sure printing has finished before you close the manual feed slot cover.
 - When paper is placed in the manual feed slot, the machine always prints from the manual feed slot.
 - The machine will eject any paper loaded in the manual feed slot while a test page, report, etc. is being printed.
 - The machine will eject paper loaded in the manual feed slot during the machine's cleaning process. Wait until the machine finishes its cleaning, and then load paper in the manual feed slot.
-

Load Paper in the Multi-purpose Tray (MP Tray)

Related Models: DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW

Use the MP Tray for special print media, such as photo paper or envelopes.

- If the [Check Paper] setting is set to [On] and you set the paper in the MP tray, a message appears on the LCD, allowing you to change the paper size and paper type.
- Load only one size and type of paper in the paper tray at a time.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.

1. Open the MP tray using both hands.

2. Lift the paper support.

3. Gently press and slide the MP tray paper guides to match the width of the paper you are using.

4. Fan the stack of paper well to avoid paper jams and misfeeds.

- Always make sure the paper is not curled or wrinkled.
 - You can load only one sheet of Legal/Mexico Legal/India Legal/Folio size paper into the MP tray at a time.
-

5. Gently load the paper in the MP tray with the printing surface **face up**.

When using envelopes, load the envelopes with the printing surface *face up* and the flap on the left as shown in the illustration.

If you are having difficulty loading paper in the MP tray, push the release lever (1) toward the back of the machine, and then load the paper.

6. Using both hands, gently adjust the MP tray paper guides to fit the paper.

- DO NOT press the paper guides too tightly against the paper. Doing this may cause the paper to fold and jam.
- Place the paper in the center of the MP tray between the paper guides. If the paper is not centered, pull it out and insert it again at the center position.

-
7. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

8. Change the paper size and paper type settings for the MP tray, if needed.

Make sure printing has finished before you close the MP tray.

Related Information

- [Load Paper](#)

Unprintable Area

The unprintable area depends on the settings in the application you are using. The figures below show the unprintable areas on cut-sheet paper and envelopes. The machine can print in the shaded areas of cut-sheet paper only when the Borderless print feature is available and turned on.

Cut-Sheet Paper

Envelopes

	Top (1)	Left (2)	Bottom (3)	Right (4)
Cut-Sheet	0.12 in. (3 mm)	0.12 in. (3 mm)	0.12 in. (3 mm)	0.12 in. (3 mm)
Envelopes	0.47 in. (12 mm)	0.12 in. (3 mm)	0.47 in. (12 mm)	0.12 in. (3 mm)

The Borderless print feature is not available for envelopes, 2-sided printing and some paper sizes, such as Legal and Executive.

Acceptable Paper and Other Print Media

The print quality can be affected by the type of paper you use in the machine.

To get the best print quality for the settings you have selected, always set the Paper Type to match the type of paper you load.

You can use plain paper, inkjet paper (coated paper), glossy paper, recycled paper, and envelopes.

We recommend testing various paper types before buying large quantities.

For best results, use Brother paper.

- When you print on inkjet paper (coated paper) and glossy paper, be sure to select the correct print media in the printer driver or in the application you use to print, or the Paper Type setting on the machine.
- When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.
- When using photo paper, remove each sheet at once to prevent smudging or paper jams.
- Avoid touching the printed surface of the paper immediately after printing; the surface may not be completely dry and may stain your fingers.

-

Recommended Print Media

For the best print quality, we recommend using the Brother paper listed in the table.

Brother paper may not be available in all countries.

Brother paper

Paper Type	Item
Premium Plus Glossy Photo	
Letter	BP71GLTR
4" x 6"	BP71GP20

Related Information

- [Acceptable Paper and Other Print Media](#)

Handle and Use Print Media

- Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.
- Avoid touching the shiny (coated) side of photo paper.
- Some envelope sizes require that you set margins in the application. Make sure you do a test print first before printing many envelopes.

IMPORTANT

DO NOT use the following types of paper:

- Damaged, curled, wrinkled, or irregularly shaped

1. **0.08 in. (2 mm) or greater curl may cause jams to occur.**

- Extremely shiny or highly textured
- Paper that cannot be arranged uniformly when stacked
- Paper made with a short grain

DO NOT use envelopes that:

- Are loosely constructed
- Have windows
- Are embossed (have raised writing on them)
- Have clasps or staples
- Are pre-printed on the inside
- Are self-adhesive
- Have double flaps

Self-adhesive Double flaps

You may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using.

Load Documents in the Automatic Document Feeder (ADF)

Related Models: DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW

The ADF can hold multiple pages and feeds each sheet individually.

Use paper that is within the sizes and weights shown in the table. Always fan the pages before placing them in the ADF.

Document Sizes and Weights

Length ¹ :	5.8 to 14.0 in. (148 to 355.6 mm)
Width:	5.8 to 8.5 in. (148 to 215.9 mm)
Paper Weight:	17 to 24 lb (64 to 90 g/m ²)

¹ Documents that are longer than 11.7 in. (297 mm) must be fed one page at a time.

IMPORTANT

- DO NOT pull on the document while it is feeding.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper clipped, pasted or taped.
- DO NOT use cardboard, newspaper or fabric.
- Make sure documents with correction fluid or written in ink are completely dry.

1. Lift and unfold the ADF document support (1).

2. Fan the stack of paper well to avoid paper jams and misfeeds.
3. Adjust the paper guides (1) to fit the document size.

4. Place your document, **face down, top edge first** in the ADF underneath the paper guides until you feel the document touch the feed rollers and the LCD displays [ADF Ready].

IMPORTANT

DO NOT leave any documents on the scanner glass. If you do this, the ADF may jam.

Load Documents on the Scanner Glass

Use the scanner glass to fax, copy, or scan one page at a time.

Document Sizes Supported

Length:	Up to 11.7 in. (297 mm)
Width:	Up to 8.5 in. (215.9 mm)
Weight:	Up to 4.4 lb (2 kg)

(ADF models)

To use the scanner glass, the ADF must be empty and the ADF document support must be closed.

1. Lift the document cover.
2. Place the document **face down** in the upper left corner of the scanner glass as shown in the illustration.

3. Close the document cover.

IMPORTANT

If you are scanning a book or thick document, DO NOT forcefully close or press on the document cover.

2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Make sure you have loaded the correct media in the paper tray.

IMPORTANT

- For best results, use Brother paper.
- When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.

4. Click the **Basic** tab.
5. Click the **Media Type** drop-down list, and then select the type of paper you are using.

IMPORTANT

To get the best print quality for the settings you have selected, always set the **Media Type** option to match the type of paper you load.

6. Click the **Paper Size** drop-down list, and then select your paper size.
7. Select the **Borderless** checkbox, if needed.
8. For **Color / Grayscale**, select **Color**.
9. In the **Orientation** field, select the **Portrait** or **Landscape** option to set the orientation of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

10. Type the number of copies (1-999) you want in the **Copies** field.
11. Change other printer settings, if needed.
12. Click **OK**.
13. Complete your print operation.

Print on Both Sides of the Paper Manually (Manual 2-sided Printing) (Windows)

Related Models: DCP-T520W/DCP-T525W

The machine prints all the odd-numbered pages on one side of the paper first. Then, a pop-up message on your computer screen instructs you to reload the odd pages into the machine so it can print the even-numbered pages.

- Before reloading the paper, fan and straighten it to avoid paper jams.
- Very thin or thick paper is not recommended.
- If the paper is thin, it may wrinkle.
- The 2-sided printing function may not be suitable for all types of documents and images. If you experience repeat paper jams or poor print quality during 2-sided printing, we recommend using 1-sided printing.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Click the **Basic** tab.
4. In the **Orientation** field, select the **Portrait** or **Landscape** option to set the orientation of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

5. Click the **2-sided / Booklet** drop-down list, and then select **2-sided (Manual)**.
6. Click the **2-sided Settings** button.
7. Select one of the options from the **2-sided Type** menu.

When 2-sided is selected, four types of 2-sided binding are available for each orientation:

Option for Portrait	Description
Long Edge (Left)	
Long Edge (Right)	

Option for Portrait	Description
---------------------	-------------

Short Edge (Top)

Short Edge (Bottom)

Option for Landscape	Description
----------------------	-------------

Long Edge (Top)

Long Edge (Bottom)

Short Edge (Right)

Short Edge (Left)

8. Select the **Binding Offset** checkbox to specify the offset for binding in inches or millimeters.
9. Click **OK** to return to the printer driver window.
10. Change other printer settings, if needed.

The Borderless feature is not available when using this option.

11. Click **OK**, and then start printing.

12. Click **OK** to print the first side of the pages.

The machine prints all the odd numbered pages first. Then, the printing stops and a pop-up message on your computer screen instructs you to reload the paper.

13. Reload the paper.

14. Click **OK**.

The even numbered pages will be printed.

If the paper is not feeding correctly, it may be curled. Remove the paper, straighten it, and put it back in the paper tray.

Change the Default Print Settings (Windows)

When you change an application's print settings, the changes only apply to documents printed with that application. To change print settings for all Windows applications, you must configure the printer driver properties.

1. Do one of the following:
 - For Windows 10, Windows Server 2016, and Windows Server 2019
Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.
 - For Windows 8.1
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.
 - For Windows Server 2012 R2
Click **Control Panel** on the **Start** screen. In the **Hardware** group, click **View devices and printers**.
 - For Windows Server 2012
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.
 - For Windows 7 and Windows Server 2008 R2
Click  (**Start**) > **Devices and Printers**.
 - For Windows Server 2008
Click  (**Start**) > **Control Panel** > **Hardware and Sound** > **Printers**.
2. Right-click the **Brother XXX-XXXX Printer** icon (where XXX-XXXX is the name of your model), and then select **Printer properties**. If printer driver options appear, select your printer driver.
The printer properties dialog box appears.
3. Click the **General** tab, and then click the **Printing Preferences...** or **Preferences...** button.
The printer driver dialog box appears.
4. Select the print settings you want to use as defaults for all of your Windows programs.
5. Click **OK**.
6. Close the printer properties dialog box.

Print Settings (Windows)

- >> Basic Tab
- >> Advanced Tab

Basic Tab

1. Media Type

Select the media type you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

2. Print Quality

Select the print quality you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

3. Paper Size

Select the paper size you want to use. You can either choose from standard paper sizes or create a custom paper size.

Borderless

Select this option to print photos without borders. Because the image data is created slightly larger than the paper size you are using, this will cause some cropping of the photo edges.

You may not be able to select the Borderless option for some combinations of media type and quality, or from some applications.

4. Color / Grayscale

Select color or grayscale printing. The print speed is faster in grayscale mode than it is in color mode. If your document contains color and you select grayscale mode, your document will be printed using 256 levels of grayscale.

5. Orientation

Select the orientation (portrait or landscape) of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

6. Copies

Type the number of copies (1-999) that you want to print in this field.

Collate

Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

Reverse Order

Select this option to print your document in reverse order. The last page of your document will be printed first.

7. Multiple Page

Select this option to print multiple pages on a single sheet of paper, or print one page of your document on multiple sheets.

Page Order

Select the page order when printing multiple pages on a single sheet of paper.

Border Line

Select the type of border to use when printing multiple pages on a single sheet of paper.

8. 2-sided / Booklet

Select this option to print on both sides of the paper, or print a document in booklet format using 2-sided printing.

2-sided Settings button

Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.

9. (DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW) Paper Source

Select the paper source setting according to your print conditions or purpose.

Advanced Tab

1. Color Enhancement (True2Life)

Select this option to use the Color Enhancement feature. This feature analyzes your image to improve its sharpness, white balance and color density. This process may take several minutes depending on the image size and your computer's specifications.

2. Scaling

Select these options to enlarge or reduce the size of the pages in your document.

Fit to Paper Size

Select this option to enlarge or reduce the document pages to fit a specified paper size. When you select this option, select the paper size you want from the drop-down list.

Free [25 - 400 %]

Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.

3. Mirror Print

Select this option to reverse the printed image on the page horizontally from left to right.

4. Reverse Print

Select this option to rotate the printed image 180 degrees.

5. Use Watermark

Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.

6. Header-Footer Print

Select this option to print the date, time and PC login user name on the document.

7. Other Print Options button

Advanced Color Settings

Select the method that the machine uses to arrange dots to express halftones.

The printout color can be adjusted to achieve the closest match to what appears on your computer screen.

(DCP-T520W/DCP-T525W) Advanced Quality Settings

Select this option to print your documents at the highest quality.

Reduce Smudge

Some types of print media may need more drying time. Change this option if you have problems with smudged printouts or paper jams.

Retrieve Printer's Color Data

Select this option to optimize the print quality using the machine's factory settings, which are set specifically for your Brother machine. Use this option when you have replaced the machine or changed the machine's network address.

Print Archive

Select this option to save the print data as a PDF file to your computer.

Reduce Ink Density

Select this feature to conserve ink. Printouts use less ink and are lighter than they appear in Print Preview.

Print Photos or Documents Using Brother iPrint&Scan (Windows/Mac)

1. Make sure you have loaded the correct media in the paper tray.

IMPORTANT

For photo printing:

- For best results, use Brother paper.
- When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.

2. Start Brother iPrint&Scan.

- Windows

Launch  (Brother iPrint&Scan).

- Mac

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

3. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.
4. Click **Print**.
5. Do one of the following:
 - Windows
Click **Photo** or **Document**.
 - Mac
Click **Photo** or **PDF**.
6. Select the file you want to print, and then do one of the following:
 - Windows
Click **Next**.
 - Mac
Click **Open**.

- The actual screen may differ depending on the version of the application.
- Use the latest application. See *Related Information*.
- When printing documents with many pages, you can also select the pages you want to print.

7. Change other printer settings, if needed.

8. Click **Print**.

IMPORTANT

For photo printing:

To get the best print quality for the settings you have selected, always set the **Media Type** option to match the type of paper you load.

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.

3. Click **Print**.

4. Do one of the following:

- Windows

Click **Document**.

- Mac

Click **PDF**.

5. Select the file you want to print, and then do one of the following:

- Windows

Click **Next**.

- Mac

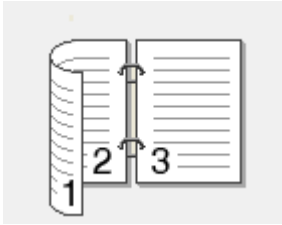

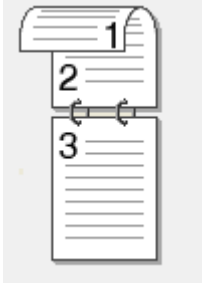

Click **Open**.

When printing documents with many pages, you can also select the pages you want to print.

6. Select one of the options from the **2-sided** drop-down list.

Two types of 2-sided binding are available:

Option	Description
On (Flip on long edge)	
On (Flip on short edge)	

7. Change other printer settings, if needed.
8. Click **Print**.

Print a Color Document in Grayscale Using Brother iPrint&Scan (Windows/Mac)

Grayscale mode makes the print processing speed faster than color mode. If your document contains color, selecting Grayscale mode prints your document in 256 levels of grayscale.

1. Start Brother iPrint&Scan.
 - Windows
Launch  (Brother iPrint&Scan).
 - Mac
In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.
The Brother iPrint&Scan screen appears.
2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.
3. Click **Print**.
4. Do one of the following:
 - Windows
Click **Photo** or **Document**.
 - Mac
Click **Photo** or **PDF**.
5. Select the file you want to print, and then do one of the following:
 - Windows
Click **Next**.
 - Mac
Click **Open**.

When printing documents with many pages, you can also select the pages you want to print.

6. Click the **Color / Mono** drop-down list, and then select the **Mono** option.
7. Change other printer settings, if needed.
8. Click **Print**.

Print an Email Attachment

You can print files by emailing them to your Brother machine.

- You can attach up to 10 documents, 20 MB in total, to an email.
- This feature supports the following formats:
 - Document files: PDF, TXT, and Microsoft Office files
 - Image files: JPEG, BMP, GIF, PNG, and TIFF
- The machine prints both the email content and attachments by default. To print only email attachments, change the settings as necessary.

1. Start Brother iPrint&Scan.

- Windows

Launch  (**Brother iPrint&Scan**).

- Mac

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.

3. Click  (**Machine Settings**) to configure the settings.

4. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

5. Go to the navigation menu, and then click **Online Functions > Online Functions Settings**.

Start from , if the navigation menu is not shown on the left side of the screen.

6. Click the **I accept the terms and conditions** button.

The machine prints the Instruction Sheet.

7. Send your email to the email address included on the sheet. The machine prints the email attachments.

To change the settings, including email address and printer settings, click the **Advanced Settings web page** link.

Web Services for Scanning on Your Network (Windows 7, Windows 8.1, and Windows 10)

The Web Services protocol enables Windows 7, Windows 8.1 and Windows 10 users to scan using a Brother machine on the network. You must install the driver via Web Services.

- [Use Web Services to Install Drivers Used for Scanning \(Windows 7, Windows 8.1, and Windows 10\)](#)
- [Scan Using Web Services from Your Machine \(Windows 7, Windows 8.1, and Windows 10\)](#)
- [Configure Scan Settings for Web Services](#)

Use Web Services to Install Drivers Used for Scanning (Windows 7, Windows 8.1, and Windows 10)

- Make sure you have installed the correct software and drivers for your machine.
- Verify that the host computer and the Brother machine are on the same subnet, or that the router is correctly configured to pass data between the two devices.
- You must configure the IP address on your Brother machine before you configure this setting.

1. Do one of the following:

- Windows 10

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings** > **Change PC settings** > **PC and devices** > **Devices** > **Add a device**.

The machine's Web Services Name appears.

- Windows 7

Click  (**Start**) > **Control Panel** > **Network and Internet** > **View network computers and devices**.

The machine's Web Services Name appears with the printer icon.

Right-click the machine you want to install.

- The Web Services Name for the Brother machine is your model name and the MAC Address (Ethernet Address) of your machine (for example, Brother XXX-XXXX (where XXX-XXXX is the name of your model) [XXXXXXXXXXXX] (MAC Address / Ethernet Address)).

- Windows 8.1/Windows 10

Move your mouse over the machine name to display the machine's information.

2. Do one of the following:

- Windows 8.1/Windows 10

Select the machine you want to install, and then follow the on-screen instructions.

- Windows 7

Click **Install** in the displayed menu.

To uninstall drivers, click **Uninstall** or  (**Remove device**).

Scan from Your Computer (Windows)

There are several ways you can use your computer to scan photos and documents on your machine. Use the software applications we provide or use your favorite scanning application.

- [Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications](#)
- [Scan Using Windows Fax and Scan](#)

Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications

You can use the Nuance™ PaperPort™ 14SE application for scanning.

- To download the Nuance™ PaperPort™ 14SE application, click  (**Brother Utilities**), select **Do More** in the left navigation bar, and then click **PaperPort**.
- Nuance™ PaperPort™ 14SE supports Windows 7, Windows 8.1, Windows 10 Home, Windows 10 Pro, Windows 10 Education and Windows 10 Enterprise.
- For detailed instructions on using each application, click the application's **Help** menu, and then click **Getting Started Guide** in the **Help** ribbon.

The instructions for scanning in these steps are for PaperPort™ 14SE. For other Windows applications, the steps will be similar. PaperPort™ 14SE supports both TWAIN and WIA drivers; the TWAIN driver (recommended) is used in these steps.

Depending on the model of your machine, Nuance™ PaperPort™ 14SE may not be included. If it is not included, you can use other software applications that support scanning.

1. Load your document.

2. Start PaperPort™ 14SE.

Do one of the following:

- Windows 10

Click  > **Nuance PaperPort 14 > PaperPort**.

- Windows 8.1

Click  (**PaperPort**).

- Windows 7

Using your computer, click  (**Start**) > **All Programs > Nuance PaperPort 14 > PaperPort**.

3. Click the **Desktop** menu, and then click **Scan Settings** in the **Desktop** ribbon.

The **Scan or Get Photo** panel appears on the left side of the screen.

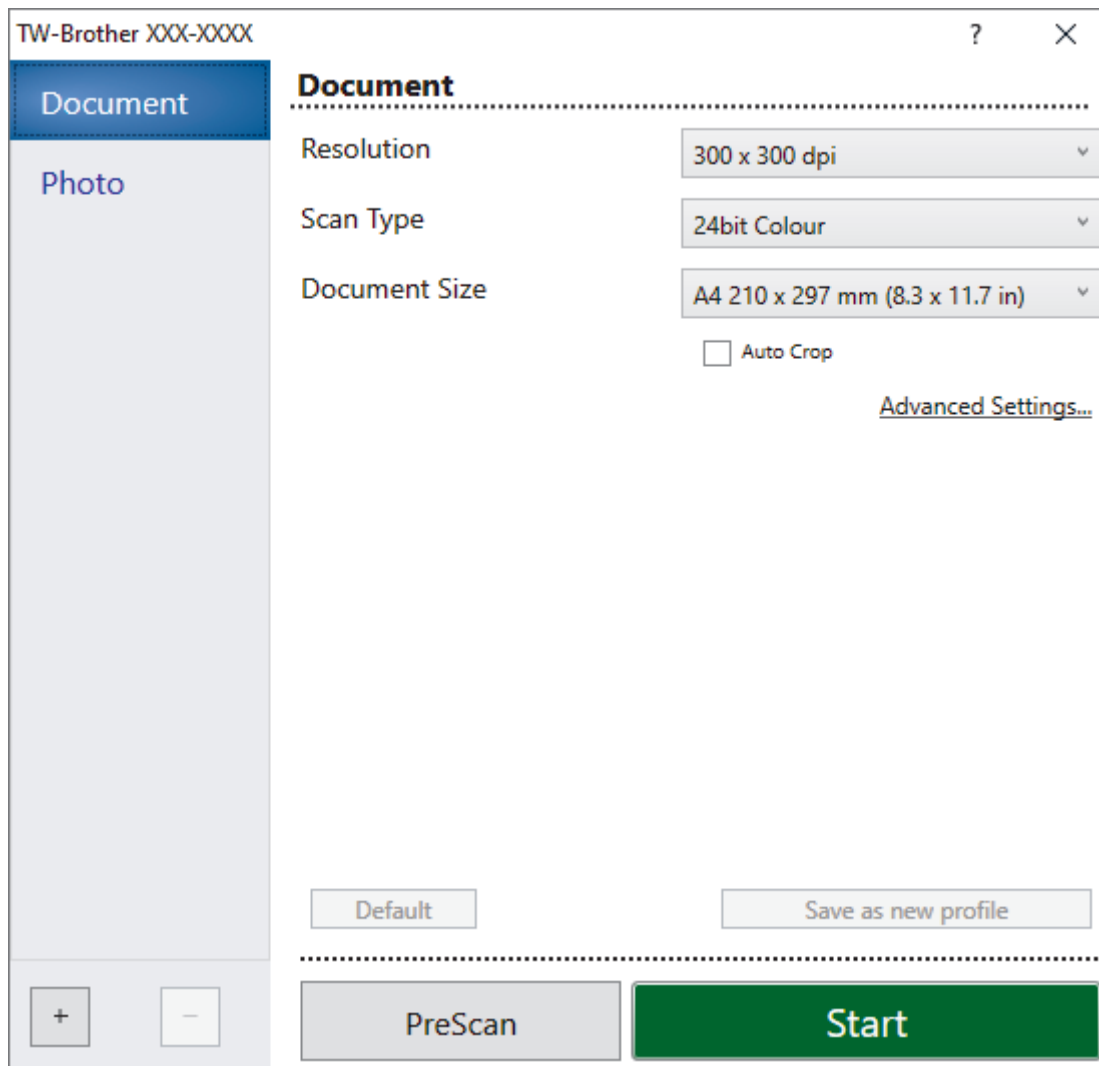

4. Click **Select**.

5. From the available Scanners list, select **TWAIN: TW-Brother XXX-XXXX** or **TWAIN: TW-Brother XXX-XXXX LAN** (where XXX-XXXX is the name of your model).

6. Select the **Display scanner dialog box** checkbox in the **Scan or Get Photo** panel.

7. Click **Scan**.

The Scanner Setup dialog box appears.

8. Adjust the settings in the Scanner Setup dialog box, if needed.
9. Click the **Document Size** drop-down list, and then select your document size.
10. Click **PreScan** to preview your image and crop unwanted portions before scanning.
11. Click **Start**.

The machine starts scanning.

- [TWAIN Driver Settings \(Windows\)](#)

TWAIN Driver Settings (Windows)

 Note that the item names and assignable values will vary depending on the machine.

1. Scan

Select the **Photo** or **Document** option depending on the type of document you want to scan.

Scan (Image Type)		Resolution	Scan Type
Photo	Use for scanning photo images.	300 x 300 dpi	24bit Color
Document	Use for scanning text documents.	300 x 300 dpi	24bit Color

2. Resolution

Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

3. Scan Type

Select from a range of scan color depths.

- **Black & White**

Use for text or line art images.

- **Gray (Error Diffusion)**

Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are put in a specific pattern to give a gray appearance.)

- **True Gray**

Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.

- **24bit Color**

Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

4. Document Size

Select the exact size of your document from a selection of preset scan sizes.

If you select **Custom**, the **Custom Document Size** dialog box appears and you can specify the document size.

5. Auto Crop

Scan multiple documents placed on the scanner glass. The machine will scan each document and create separate files or a single multi-page file.

6. Advanced Settings

Configure advanced settings by clicking the **Advanced Settings** link in the Scanner Setup dialog box.

- **Document Correction**

- **Margin Settings**

Adjust the margins in your document.

- **Rotate Image**

Rotate the scanned image.

- **Edge Fill**

Fill in the edges on four sides of the scanned image using the selected color and range.

- **Image Quality**

- **Diffusion Adjustment -Gray**

Adjust the diffusion when selecting the **Gray (Error Diffusion)** option from the **Scan Type** drop-down list.

- **Color Tone Adjustment**

Adjust the color tone

- **Background Processing**

- **Remove Bleed-through / Pattern**

Prevent bleed-through.

- **Remove Background Color**

Remove the base color of documents to make the scanned data more legible.

- **Color Drop**

Select a color to remove from the scanned image.

- **Edge Emphasis**

Sharpen the characters in the original.

- **Reduce Noise**

Improve and enhance the quality of your scanned images with this selection. The **Reduce Noise** option is available when selecting the **24bit Color** option and the **300 x 300 dpi**, **400 x 400 dpi**, or **600 x 600 dpi** scan resolution.

- **B&W Image Quality**

- **B&W Threshold Adjustment**

Adjust the threshold to generate a black and white image.

- **Character Correction**

Correct the broken or incomplete characters of the original to make them easier to read.

- **B&W Inversion**

Invert black and white in the black and white image.

- **Feed Control**

- (DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW) **Layout**

Select the layout.

- **Continuous Scan**

Select this option to scan multiple pages. After a page is scanned, select whether to continue scanning or finish.

Related Information

- [Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications](#)

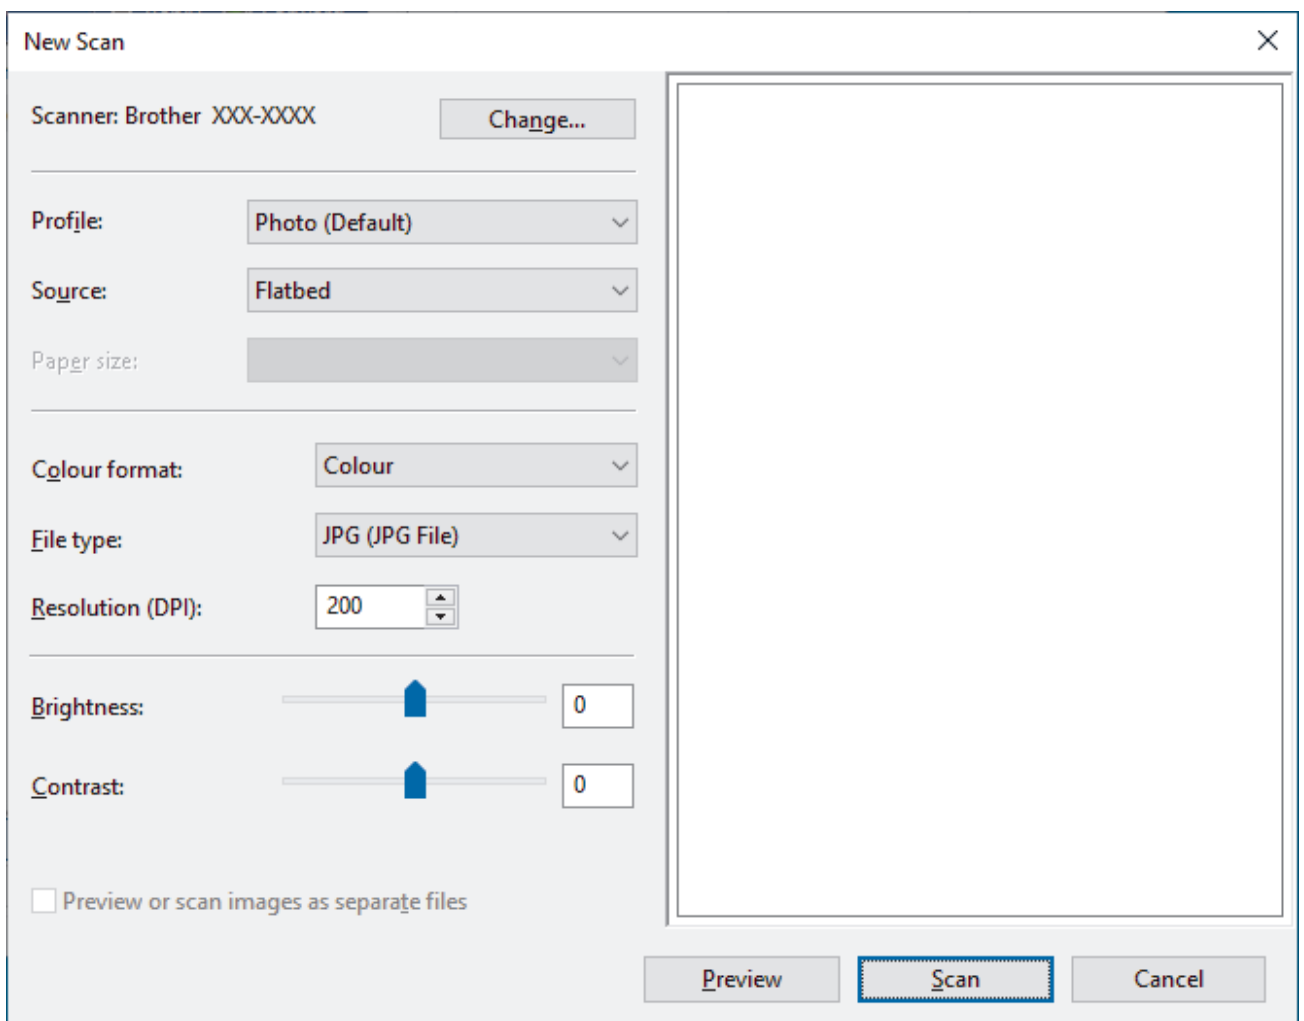

Scan Using Windows Fax and Scan

Windows Fax and Scan application is another option that you can use for scanning.

- Windows Fax and Scan uses the WIA scanner driver.
- If you want to crop a portion of a page after pre-scanning the document, you must scan using the scanner glass (also called the flatbed).

1. Load your document.
2. Launch Windows Fax and Scan.
3. Click **File > New > Scan**.
4. Select the scanner you want to use.
5. Click **OK**.

The **New Scan** dialog box appears.

6. Adjust the settings in the dialog box, if needed.

The scanner resolution can be set to a maximum of 1200 dpi. If you want to scan at higher resolutions, use the **Scanner Utility** software from **Brother Utilities**.

7. Click **Scan**.

The machine starts scanning the document.

✓ Related Information

- [Scan from Your Computer \(Windows\)](#)

-
- WIA Driver Settings (Windows)
-

WIA Driver Settings (Windows)

Profile

Select the scan profile you want to use from the **Profile** drop-down list.

Source

Select the **Flatbed** or **Feeder (Scan one side)** option from the drop-down list.

Paper size

The **Paper size** option is available if you select the **Feeder (Scan one side)** as the **Source** option.

Color format

Select a scan color format from the **Color format** drop-down list.

File type

Select a file format from the **File type** drop-down list.

Resolution (DPI)

Set a scanning resolution in the **Resolution (DPI)** field. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

Brightness

Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark,

set a higher brightness level and scan the document again. You can also type a value in the field to set the brightness level.

Contrast

Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value in the field to set the contrast level.

NOTE

This feature is available only for black and white faxes.

1. Load your document in the ADF or place it on the scanner glass.
2. Press  (FAX).

The LCD displays:

3. Enter the fax number in one of the following ways:
 - Dial Pad (Enter the fax number manually.)
Press all digits of the number using the dial pad.
 - Redial (Redial the last number you dialed.)
Press **Remarcar/Pausa (Redial/Pause)**.
 - Outgoing call (Select a number from the Outgoing Call History.)
Press **▲** or **▼** to select the following:
 - a. Select [Call History]. Press **OK**.
 - b. Select [Outgoing Call]. Press **OK**.
 - c. Select the number you want, and then press **OK**.
 - d. Press **▶** to select [Apply].
 - Caller ID (Select a number from the Caller ID History.)
Press **▲** or **▼** to select the following:
 - a. Select [Call History]. Press **OK**.
 - b. Select [Caller ID History]. Press **OK**.
 - c. Select the number you want, and then press **OK**.
 - d. Press **▶** to select [Apply].
 - [Address Book] (Select a number from the Address Book.)
Press **▲** or **▼** to select the following:
 - a. Select [Address Book]. Press **OK**.
 - b. Select [Search]. Press **OK**.
 - c. Do one of the following:
 - Enter the two-digit Speed Dial number using the dial pad.
 - Select a number from the list using these steps:
 - i. Select [Alphabetical Order] or [Numerical Order]. Press **OK**.
 - ii. Select the number you want. Press **OK**.
 - iii. Press **▶** to select [Apply].
4. To change the fax settings, press **▲** or **▼** to select the setting you want to change, and then press **OK**.

-
5. When finished, press **Inicio Negro (Black Start)**.
 6. Do one of the following:
 - If you are using the ADF, the machine starts scanning and sending the document.
 - If you are using the scanner glass and pressed **Inicio Negro (Black Start)**, the machine starts scanning the first page.
Go to the next step.
 7. When the LCD displays [Next page?], do one of the following:
 - Press ► to scan another page. Place the next page on the scanner glass, and then press ►. The machine starts scanning the page.
Repeat this step for each additional page.
 - Press ◀ to send the fax when finished scanning pages. The machine starts sending the document.

Send the Same Fax to More than One Recipient (Broadcasting)

Related Models: MFC-T920DW/MFC-T925DW

Use the Broadcasting feature to send the same fax to multiple fax numbers at the same time.

- This feature is available only for black and white faxes.
- Address Book numbers must be stored in the machine's memory before they can be used in a broadcast.
- Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many stored Address Book numbers for easier dialing.

You can include Groups, Address Book numbers, and up to 50 manually-dialed numbers in the same broadcast.

If you did not use any of the Address Book numbers for Groups, you can broadcast faxes to as many as 90 different numbers.

1. Load your document.
2. Press  (**FAX**).
3. Press ▲ or ▼ to select [Broadcasting], and then press **OK**.
4. Press ▲ or ▼ to select [Add Number], and then press **OK**.
5. You can add numbers to the broadcast in the following ways:
 - Enter a number using the dial pad:
 - a. Press ▲ or ▼ to select [Add Number], and then press **OK**.
 - b. Enter a number using the dial pad, and then press **OK**.
 - Select a number from the Address Book:
 - a. Press ▲ or ▼ to select [Add from Address book], and then press **OK**.
 - b. Press ▲ or ▼ to select [Alphabetical Order] or [Numerical Order], and then press **OK**.
 - c. Press ▲ or ▼ to select the Speed Dial name or number you want.
 - d. Press ◀ or ▶ to select the checkbox labeled with the Speed Dial name or number, and then press **OK**.
 - Search a number in the Address Book:
 - a. Press ▲ or ▼ to select [Search in Address book], and then press **OK**.
 - b. Enter the first letter of the name using the dial pad, and then press **OK**.
 - c. Press ▲ or ▼ to select the name, and then press **OK**.
 - d. Press **OK** again.
6. When finished, press ▲ or ▼ to select [Complete]. Press **OK**.
7. Press **Inicio Negro (Black Start)**.
8. Do one of the following:
 - If you are using the ADF, the machine starts scanning and sending the document.
 - If you are using the scanner glass, the machine starts scanning the first page.

When the LCD displays [Next page?], do one of the following:

 - Press ▶ to scan another page. Place the next page on the scanner glass, and then press ▶. The machine starts scanning the page.

Repeat this step for each additional page.
 - Press ◀ to send a fax when finished scanning pages. The machine starts sending the document.

If the [Out of Memory] message appears, press **Detener/Salir (Stop/Exit)** to cancel.

Receive Modes Overview

Related Models: MFC-T920DW/MFC-T925DW

Some receive modes answer automatically ([Fax Only] and [Fax/Tel]). You may want to change the Ring Delay before using these modes.

Fax Only

[Fax Only] mode automatically answers every call as a fax.

Fax/Tel

[Fax/Tel] mode helps you manage incoming calls, by recognizing whether they are fax or voice calls and handling them in one of the following ways:

- Faxes are received automatically.
- Voice calls start the F/T ring to tell you to pick up the line. The F/T ring is a pseudo/double-ring made by your machine.

Manual

[Manual] mode turns off all automatic answering functions (unless you are using the Distinctive Ring feature).

To receive a fax in [Manual] mode, lift the handset of the external telephone or press the Hook button. When you hear fax tones (short repeating beeps), press the Start button, and then select [Receive] to receive a fax. You can also use the Easy Receive feature to receive faxes by lifting a handset on the same line as the machine.

External TAD

[External TAD] mode lets an external answering device manage your incoming calls.

Incoming calls are handled in the following ways:

- Faxes are received automatically.
- Voice callers can record a message on the external TAD.

Choose the Correct Receive Mode

Related Models: MFC-T920DW/MFC-T925DW

The correct Receive Mode for you is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring and so on) you will be using on the same line as your machine.

Will you be using a Distinctive Ring number for receiving faxes? (USA and Canada only)

Brother uses the term "Distinctive Ring" but different telephone companies may have other names for this service, such as Custom Ringing, Personalized Ring, Teen Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Smart Ring and SimpleBiz Fax & Alternate Number Ringing.

Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine conflict with each other when receiving incoming calls. Select Manual Mode as your Receive Mode.

If you do not want to answer every call manually to determine whether it is a voice call or a fax, contact your telephone provider and ask about Distinctive Ring services.

Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) answers every call automatically. Voice messages are stored on the external TAD and fax messages are printed. Select [External TAD] as your Receive Mode.

Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Select [Fax Only] as your Receive Mode.

Will you be using your Brother machine on the same line as your telephone?

• Do you want to receive voice calls and faxes automatically?

Select [Fax/Tel] mode when your Brother machine and your telephones share the same line.

Important Note: You cannot receive voice messages on either Voice Mail or an answering machine if you select [Fax/Tel] mode.

• Do you expect to receive very few faxes?

Select [Manual] as your Receive Mode. You control the telephone line and must answer every call yourself.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Setup Receive]. Press **OK**.
 - c. Select [Receive Mode]. Press **OK**.

If you cannot change the [Receive Mode] option, make sure the Distinctive Ring feature is set to [Off].

3. Press **▲** or **▼** to select the [Fax Only], [Fax/Tel], [External TAD], or [Manual] option, and then press **OK**.
4. Press **Detener/Salir (Stop/Exit)**.

Set the Number of Rings Before the Machine Answers (Ring Delay)

Related Models: MFC-T920DW/MFC-T925DW

When somebody calls your machine, you will hear the normal telephone ring sound. The number of rings is set in the Ring Delay option.

- The Ring Delay setting sets the number of times the machine rings before it answers in [Fax Only] and [Fax/Tel] modes.
- If you have external or extension telephones on the same line as the machine, keep the Ring Delay setting of [4].

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Setup Receive]. Press **OK**.
 - c. Select [Ring Delay]. Press **OK**.
 - d. Select the number of times you want the line to ring before the machine answers (0, 1, 2, 3, or 4). Press **OK**.

If you select [0], the machine answers immediately and the line will not ring at all. (available only for some countries)

3. Press **Detener/Salir (Stop/Exit)**.

Set the F/T Ring Time (Pseudo/Double-ring)

Related Models: MFC-T920DW/MFC-T925DW

When you set the Receive Mode to [Fax/Tel], if the call is a fax, your machine will receive it automatically. However, if it is a voice call, the machine will sound the F/T ring (pseudo/double-ring) for the time you set in the F/T Ring Time option. When you hear the F/T ring, it means that a voice caller is on the line.

Because the F/T ring is a setting only on your Brother machine, extension and external telephones will not ring; however, you can still answer the machine's call on any telephone.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Setup Receive]. Press **OK**.
 - c. Select [F/T Ring Time]. Press **OK**.
 - d. Select how long the machine will double-ring to alert you to a voice call ([20 Secs], [30 Secs], [40 Secs], or [70 Secs]). Press **OK**.
3. Press **Detener/Salir (Stop/Exit)**.

Even if the caller hangs up during the pseudo/double-ringing, the machine will continue to ring for the set time.

Set Easy Receive

Related Models: MFC-T920DW/MFC-T925DW

If Easy Receive is On: The machine can receive a fax automatically, even if you answer the call. When the message that your machine is receiving a fax appears on the LCD or when you hear a click on the phone line through the handset you are using, just replace the handset. Your machine will do the rest.

If Easy Receive is Off: If you are at the machine and answer a fax call first by lifting the external handset, press the Start button, and then select [Receive] to receive the fax. If you answered at an extension telephone, press *51.

- If Easy Receive is set to [On], but your machine does not connect a fax call when you lift an extension or external telephone handset, press the fax receive code *51.
- If you send faxes from a computer on the same telephone line and the machine intercepts them, set Easy Receive to [Off].

1. Press **Ajustes (Settings)**.
2. Press ▲ or ▼ to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Setup Receive]. Press **OK**.
 - c. Select [Easy Receive]. Press **OK**.
 - d. Select [On] (or [Off]). Press **OK**.
3. Press **Detener/Salir (Stop/Exit)**.

Send Tone Signals

Related Models: MFC-T920DW/MFC-T925DW

If you have a Pulse dialing service, but must send Tone signals (for example, for telephone banking), follow these steps. If you have a Touch Tone service, you will not need this feature to send tone signals.

This feature is available only in Canada.

1. Press **Teléfono (Hook)**.
2. Press # on the machine's control panel. Any digits dialed after this will send tone signals.

When you are finished with the call, the machine will return to the Pulse dialing service.

Pick up a Voice Call in Fax/Tel Receive Mode

Related Models: MFC-T920DW/MFC-T925DW

When the machine is in Fax/Tel mode, it will use the F/T Ring (pseudo/double-ringing) to alert you to pick up a voice call.

If you are at the machine, lift the external telephone's handset, and then press **Teléfono (Hook)** button to answer.

If you are at an extension telephone, lift the handset during the F/T Ring and then press #51 between the pseudo/double rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing *51.

- [Install Your Machine, an External Two-Line TAD and Two-Line Telephone](#)

Rollover Telephone Lines

Related Models: MFC-T920DW/MFC-T925DW

A rollover telephone system is a group of two or more separate telephone lines that pass incoming calls to each other if they are busy.

This feature is available only in the USA and Canada.

The calls are usually passed down or 'rolled over' to the next available telephone line in a preset order.

Your machine can work in a rollover system only if it is the last number in the sequence, so the call cannot roll away. Do not place the machine on any of the other numbers; when the other lines are busy and a second fax call is received, the fax call would be transferred to a line that does not have a fax machine. **Your machine will work best on a dedicated line.**

Related Information

- [Special Line Considerations](#)

Two-Line Telephone System

Related Models: MFC-T920DW/MFC-T925DW

A two-line telephone system is nothing more than two separate telephone numbers on the same wall outlet.

This feature is available only in the USA and Canada.

The two telephone numbers can be on separate jacks (RJ11) or combined into one jack (RJ14). Your machine must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires (black, red, green, yellow). To test the type of jack, plug in a two-line telephone and see if it can access both lines. If it can, you must separate the line for your machine.

Related Information

- [Special Line Considerations](#)

Convert Telephone Wall Outlets

Related Models: MFC-T920DW/MFC-T925DW

This feature is available only in the USA and Canada.

There are three ways to convert to an RJ11 jack. The first two ways may require assistance from the telephone company. You can change the wall outlets from one RJ14 jack to two RJ11 jacks. Or, you can have an RJ11 wall outlet installed and slave or jump one of the telephone numbers to it.

The third way is the easiest: Buy a triplex adapter. You can plug a triplex adapter into an RJ14 outlet. It separates the wires into two separate RJ11 jacks (Line 1, Line 2) and a third RJ14 jack (Lines 1 and 2). If your machine is on Line 1, plug the machine into L1 of the triplex adapter. If your machine is on Line 2, plug it into L2 of the triplex adapter.

Triplex adapter

Install Your Machine, an External Two-Line TAD and Two-Line Telephone

Related Models: MFC-T920DW/MFC-T925DW

When you are installing an external two-line telephone answering device (TAD) and a two-line telephone, your machine must be isolated on one line at both the wall jack and at the TAD.

- This feature is available only in the USA and Canada.
- The most common connection is to place the machine on Line 2, which is explained in the following steps. The back of the two-line TAD must have two telephone jacks: one labeled L1 or L1/L2, and the other labeled L2. You will need at least three telephone line cords, the one that came with your machine and two for your external two-line TAD. You will need a fourth line cord if you add a two-line telephone.

1. Place the two-line TAD and the two-line telephone next to your machine.
2. Plug one end of the telephone line cord for your machine into the L2 jack of the triplex adapter. Plug the other end into the LINE jack of the machine.
3. Plug one end of the first telephone line cord for your TAD into the L1 jack of the triplex adapter. Plug the other end into the L1 or L1/L2 jack of the two-line TAD.
4. Plug one end of the second telephone line cord for your TAD into the L2 jack of the two-line TAD. Plug the other end into the EXT. jack of the machine.

- a. Triplex Adapter
- b. Two Line Telephone
- c. External Two Line TAD
- d. Machine

You can keep two-line telephones on other wall outlets as always. There are ways to add a two-line telephone to the machine's wall outlet. You can plug the telephone line cord from the two-line telephone into the L1+L2 jack of the triplex adapter. Or, you can plug the two-line telephone into the TEL jack of the two-line TAD.

Dial Access Codes and Credit Card Numbers

Related Models: MFC-T920DW/MFC-T925DW

Sometimes you may want to choose from several long-distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long-distance carriers and credit card numbers as Address Book numbers.

You can store these long dialing sequences by dividing them and setting them up as separate Address Book numbers in any combination. You can even include manual dialing.

For example: you might have stored '555' on Address Book: Brother 1 (#03) and '7000' on Address Book: Brother 2 (#02). You can use them both to dial '555-7000' if you press the following:

1. Press **▶**  (Address Book).
2. Press **▲** or **▼** to select [Search] and then press **OK**.
3. Enter 03 (the two-digit Speed Dial number of Brother 1) using the dial pad.
4. Press **▲** or **▼** to select [Address Book], and then press **OK**.
5. Read and review the message on the LCD, and then press **▶**.
6. Press **▲** or **▼** to select [Search] and then press **OK**.
7. Enter 02 (the two-digit Speed Dial number of Brother 2) using the dial pad.
8. Press **Inicio Negro (Black Start)**.

You will dial '555-7000'.

To temporarily change a number, you can substitute part of the number by using the dial pad. For example, to change the number to '555-7001', you could enter the number (Brother 1: 555) using Address Book, and then press 7001 using the dial pad.

If you must wait for another dial tone or signal at any point in the dialing sequence, create a pause in the number by pressing **Remarcas/Pausa (Redial/Pause)**.

Voice Mail

Related Models: MFC-T920DW/MFC-T925DW

This feature is available only in the USA and Canada.

If you have Voice Mail on the same telephone line as your Brother machine, Voice Mail and the Brother machine will conflict with each other when receiving incoming calls.

For example, if your Voice Mail is set to answer after four rings and your Brother machine is set to answer after two rings, then your Brother machine will answer first. This will prevent callers from being able to leave a message in your Voice Mail.

Similarly, if your Brother machine is set to answer after four rings and your Voice Mail is set to answer after two rings, then your Voice Mail will answer first. This will prevent your Brother machine from being able to receive an incoming fax, since Voice Mail cannot transfer the incoming fax back to the Brother machine.

To avoid conflicts between your Brother machine and your Voice Mail service, do one of the following:

- Get the Distinctive Ring service from your telephone company. Distinctive Ring is a feature of your Brother machine that allows a person with one line to receive fax and voice calls through two different telephone numbers on that one line.

Brother uses the term 'Distinctive Ring,' but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

- Set your Brother machine's Receive Mode to "Manual". Manual Mode requires you answer every incoming call if you want to be able to receive a fax. If the incoming call is a telephone call, then complete the call as you normally would. If you hear fax sending tones you must transfer the call to the Brother machine.

Unanswered fax and voice calls will go to your Voice Mail.

Distinctive Ring

Related Models: MFC-T920DW/MFC-T925DW

This feature is available only in the USA and Canada.

Distinctive Ring is a function of your Brother machine that allows a person with one line to receive fax and voice calls through two different phone numbers on that one line. Brother uses the term "Distinctive Ring," but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

- You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.
- Contact your telephone company for availability and rates.

What does your telephone company's 'Distinctive Ring' do?

Your telephone company's Distinctive Ring service allows you to have more than one number on the same telephone line. **If you need more than one telephone number, it is cheaper than paying for an extra line.** Each telephone number has its own distinctive ring pattern, so you will know which telephone number is ringing. This is one way to have a separate telephone number for your machine.

Contact your telephone company for availability and rates.

What does Brother's 'Distinctive Ring' do?

The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company's Distinctive Ring service. The new telephone number on your line can only receive faxes.

You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.

Do you have Voice Mail?

If you have Voice Mail on the telephone line where you will install your new machine, there is a strong possibility that Voice Mail and the machine will conflict with each other while receiving incoming calls. **However, the Distinctive Ring feature allows you to use more than one number on your line, so both Voice Mail and the machine can work together without any problems.** If each one has a separate telephone number, neither will interfere with the other's operations.

If you decide to get the Distinctive Ring service from the telephone company, you must register the new Distinctive Ring pattern they give you. This is so your machine can recognize its incoming calls.

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily, and turn it back on later. When you get a new fax number, make sure you reset this feature.

Before you choose the ring pattern to register

You can register only one Distinctive Ring pattern with the machine. Some ring patterns cannot be registered. The ring patterns below are supported by your Brother machine. Register the one your telephone company gives you.

Ring Pattern	Rings	
1	short-short or long-long	
2	short-long-short	
3	short-short-long	
4	very long	

- Ring Pattern #1 is often called Short-Short and is the most commonly used.
- If the ring pattern you received is not on this chart, **contact your telephone company and ask for one that is shown.**

- The machine answers only calls to its registered number.
- The first two rings are silent on the machine. This is because the fax must <<listen>> to the ring pattern (to compare it to the pattern that was 'registered'). (Other telephones on the same line ring.)
- If you program the machine correctly, it recognizes the registered ring pattern of the 'fax number' within two ring patterns and then answer with a fax tone. When the 'voice number' is called, the machine does not answer.

Register the Distinctive Ring Pattern

Related Models: MFC-T920DW/MFC-T925DW

This feature is available only in the USA and Canada.

After you set the Distinctive Ring feature to [On], your Distinctive Ring number will receive faxes automatically. The receive mode is set to [Manual] automatically and you cannot change it to another receive mode while Distinctive Ring is set to [On]. This ensures the Brother machine will answer only the Distinctive Ring number and not interfere when your main telephone number is called.

When Distinctive Ring is on, the LCD will show [D/R] as the Receive Mode.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Miscellaneous]. Press **OK**.
 - c. Select [Distinctive]. Press **OK**.
3. Do one of the following:
 - If you have not registered Distinctive Ring, press **▲** or **▼** to select the following:
 - a. Select [Distinctive]. Press **OK**.
 - b. Select [On]. Press **OK**.
 - If you have already registered Distinctive Ring, and want to change the pattern, go to the next step.
4. Press **▲** or **▼** to select the following:
 - a. Select [Ring Pattern]. Press **OK**.
 - b. Select the stored ring pattern you want. (You will hear each pattern as you select it. Make sure you select the pattern that the telephone company gave you.) Press **OK**.
5. Press **Detener/Salir (Stop/Exit)**.

Distinctive Ring is now set to [On].

If you do not want to receive faxes on your Distinctive Ring number, you can turn off Distinctive Ring. The machine will stay in [Manual] receive mode so you must set the Receive Mode again.

Caller ID

Related Models: MFC-T920DW/MFC-T925DW

The Caller ID feature lets you use the Caller ID subscriber service offered by many local telephone companies. This service displays the telephone number (or name if it is available) of your caller as the line rings.

- The [# Unavailable] message means the call originated outside your Caller ID service area.
- The [Private Call] message means the caller has intentionally blocked transmission of Caller ID information.

Call your telephone company for more information.

Once you answer a call, the Caller ID information disappears from the LCD and is stored in Caller ID memory.

View the list or select a number and fax to it, add it to the Address Book, or delete it from the history.

You can print a list of the Caller ID information received by your machine.

- This feature is not available in some countries.
- This feature may not be available in certain areas of the USA and Canada.
- The Caller ID service varies with different carriers. Contact your local telephone company to learn if the service is available in your area.

Voice Over Internet Protocol (VoIP/Telephone Line Interference)

Related Models: MFC-T920DW/MFC-T925DW

VoIP is a type of phone system that uses an Internet connection instead of a traditional telephone line. Telephone providers frequently bundle VoIP together with Internet and cable services.

Your machine may not work with some VoIP systems. To use your machine to send and receive faxes on a VoIP system, connect one end of your telephone cord to the jack labeled LINE on your machine. Connect the other end of the telephone cord to a modem, interface box, phone adapter, splitter, or other such device.

 If you have questions about how to connect your machine to the VoIP system, contact your VoIP provider.

After you have connected your machine to the VoIP system, press the Hook button to verify the machine has a dial tone. If the machine does not have a dial tone, call your VoIP provider.

If you are having problems sending or receiving faxes over a VoIP system, we recommend changing the machine's modem speed to the [Basic (for VoIP)] setting.

External TAD (Telephone Answering Device)

Related Models: MFC-T920DW/MFC-T925DW

You can connect an external Telephone Answering Device (TAD) to the same line as your machine. When the TAD answers a call, your machine will “listen” for the CNG (fax calling) tones sent by a sending fax machine. If it hears them it will take over the call and receive the fax. If it does not hear them, it will let your TAD take a voice message and the LCD will show [Telephone].

The external TAD must answer within four rings (we recommend setting it to two rings). This is because your machine cannot hear the CNG tones until the external TAD has picked up the call. The sending machine will send CNG tones for only eight to ten seconds longer. We do not recommend using the toll saver feature on your external TAD if it needs more than four rings to activate it.

Unless you are using Distinctive Ring, the TAD must be connected to the EXT. jack of the machine.

- **If you subscribe to your telephone company’s Distinctive Ring service:**

You may connect an external TAD to a separate wall jack only if you subscribe to your telephone company’s Distinctive Ring service, have registered the distinctive ring pattern on your machine, and use that number as a fax number. The recommended setting is at least four rings on the external TAD when you have the telephone company’s Distinctive Ring service. You cannot use the Toll Saver setting.

- **If You Do Not Subscribe to the Distinctive Ring Service:**

You must plug your TAD into the EXT. jack of your machine. If your TAD is plugged into a wall jack, both your machine and the TAD will try to control the telephone line. (See the illustration.)

IMPORTANT

DO NOT connect a TAD elsewhere on the same telephone line.

If you have problems receiving faxes, reduce the Ring Delay setting on your external TAD.

Connect an External TAD

Related Models: MFC-T920DW/MFC-T925DW

The external TAD must be plugged into the jack labeled EXT. Your machine cannot work correctly if you plug the TAD into a wall jack (unless you are using Distinctive Ring).

1. Plug the telephone line cord from the telephone wall jack into the jack labeled LINE.
2. Remove the protective cap (1) from the jack labeled EXT., and then plug the telephone line cord from your external TAD into the EXT. jack.

Make sure this cord is connected to the TAD at the TAD's telephone line jack, and not its handset jack.

3. Set your external TAD to the minimum number of rings allowed. For more information, contact your telephone provider. (The machine's Ring Delay setting does not apply.)
4. Record the outgoing message on your external TAD.
5. Set the TAD to answer calls.
6. Set the Receive Mode on your machine to [External TAD].

Record an Outgoing Message (OGM) on the External TAD

Related Models: MFC-T920DW/MFC-T925DW

1. Record five seconds of silence at the beginning of your message. This allows your machine time to listen for fax tones.

We recommend beginning your OGM with an initial five second silence because the machine cannot hear fax tones over a loud voice. You may try leaving out this pause, but if your machine has trouble receiving faxes, then you should re-record the OGM to include it.

2. Limit your speaking to 20 seconds.
3. End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press *51 and Start to send a fax."

Related Information

- [External TAD \(Telephone Answering Device\)](#)

Multi-line Connections (PBX)

Related Models: MFC-T920DW/MFC-T925DW

We suggest you ask the company that installed your PBX to connect your machine. If you have a multi line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine being activated each time the system receives telephone calls. If all incoming calls will be answered by a switchboard operator we recommend setting the Receive Mode to [Manual].

We cannot guarantee that your machine will operate correctly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company that handles your PBX.

- [External and Extension Telephones](#)

Operation from External and Extension Telephones

Related Models: MFC-T920DW/MFC-T925DW

Use extension telephones

If you answer a fax call at an extension telephone, you can make your machine receive the fax by pressing the Fax Receive Code ***51**.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at an extension telephone by pressing the Telephone Answer Code **#51**.

Use an external telephone (Connected to the EXT. jack of the machine)

If you answer a fax call at the external telephone connected to the EXT. jack of the machine, you can make the machine receive the fax by pressing the Start button and selecting the option to receive.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing **Teléfono (Hook)**.

If you answer a call and no one is on the line:

You should assume that you're receiving a manual fax.

Press ***51** and wait for the chirp or until the LCD shows [Receiving], and then hang up.

You can also use the Easy Receive feature to make your machine automatically take the call.

Use the Remote Codes

Related Models: MFC-T920DW/MFC-T925DW

Fax Receive Code

If you answer a fax call on an extension telephone, you can tell your machine to receive it by pressing the Fax Receive Code *51. Wait for the chirping sounds then replace the handset.

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing the Start button and then selecting the option to receive.

Telephone Answer Code

If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T ring (pseudo/double-ring) after the initial Ring Delay. If you pick up the call on an extension telephone you can turn the F/T ring off by pressing #51 (make sure you press this between the rings).

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing **Teléfono (Hook)**.

- [Print Reports](#)
- [Set the Machine to Power Off Automatically](#)

Set the Transmission Verification Report's Style

Related Models: MFC-T920DW/MFC-T925DW

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the receiving party's name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

Option	Description
On	Prints a report after every fax you send.
On (+Image)	Prints a report after every fax you send. A portion of the fax's first page appears on the report.
Error only	Prints a report if your fax is unsuccessful due to a transmission error.
Error only (+Image)	Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax's first page appears on the report.
Off	The report will not be printed.

1. Press **Ajustes (Settings)**.

2. Press **▲** or **▼** to select the following:

- a. Select [Fax]. Press **OK**.
- b. Select [Report Setting]. Press **OK**.
- c. Select [Transmission]. Press **OK**.
- d. Select the option you want. Press **OK**.

If you select [On (+Image)] or [Error only (+Image)], the image will not appear on the Transmission Verification Report if Real Time Transmission is set to [On].

3. Press **Detener/Salir (Stop/Exit)**.

If the transmission is successful, [OK] appears next to [RESULT] on the Transmission Verification Report. If the transmission is not successful, [NG] appears next to [RESULT].

Related Information

- [Fax Reports](#)

Set the Fax Journal's Interval Period

Related Models: MFC-T920DW/MFC-T925DW

You can set the machine to print a Fax Journal at specific intervals (every 50 faxes, 6, 12 or 24 hours, 2 or 7 days).

When using the Auto Power Off feature and the machine powers off before the chosen Interval Period, the machine will print a Fax Journal report, and then erase all fax jobs from the Journal's memory.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Fax]. Press **OK**.
 - b. Select [Report Setting]. Press **OK**.
 - c. Select [Journal Period]. Press **OK**.
 - d. Select [Journal Period] once again. Press **OK**.
3. Press **▲** or **▼** to select an interval. Press **OK**.
 - 6, 12, 24 hours, 2 or 7 days
The machine will print the report at the selected interval and then erase all fax jobs from the Journal's memory. If the memory becomes full with 200 jobs before the time you selected has passed, the machine will print the Journal early and then erase all fax jobs from the memory. If you want an extra report before it is due to print, you can print it without erasing the jobs.
 - Every 50 Faxes
The machine will print the Journal when the machine has stored 50 fax jobs.
4. If you selected 6, 12, 24 hours, 2 or 7 days, press **▲** or **▼** to select [Time] and then press **OK**. Enter the time of day using the dial pad. Press **OK**.

Enter the time in the same time format as your machine's date and time setting. (12-hour format or 24-hour format)

5. If you selected [Every 7 Days], press **▲** or **▼** to select [Day] and then press **OK**. Press **▲** or **▼** to select the first day of the seven-day countdown. Press **OK**.
6. Press **Detener/Salir (Stop/Exit)**.

Important Information about Photo Printing

Related Models: MFC-T920DW/MFC-T925DW

Your machine is designed to be compatible with modern digital camera image files and USB flash drives. Read the points below to avoid photo printing problems:

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognized).
- Direct photo printing must be performed separately from photo printing operations using the computer. (Simultaneous operation is not available.)
- The machine can read up to 999 files ¹ on a USB flash drive.

Be aware of the following:

- When printing an index sheet or image, the machine will print all the valid images, even if one or more images have been corrupted. Corrupted images will not be printed.
- Your machine supports USB flash drives that have been formatted by Windows.

Before Configuring Your Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

- To achieve optimum results with normal everyday document printing, place your machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

- Although your machine can be used in both a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.
- If there is a signal in the vicinity, wireless LAN allows you to freely make a LAN connection. However, if security settings are not correctly configured, the signal may be intercepted by malicious third-parties, possibly resulting in:
 - Theft of personal or confidential information
 - Improper transmission of information to parties impersonating the specified individuals
 - Dissemination of transcribed communication contents that were intercepted

Make sure you know your wireless router/access point's Network Name (SSID) and Network Key (Password). If you cannot find this information, consult the manufacturer of your wireless router/access point, your system administrator, or Internet provider. Brother cannot provide this information.

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings of the computer to which you are connecting.

Network Name (SSID)

Network Key (Password)

For example:

Network Name (SSID)
HELLO

Network Key (Password)
12345

- Your access point/router may support the use of multiple WEP keys, but your Brother machine supports the use of only the first WEP key.
- If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?

- Check the documentation provided with your wireless access point/router.
- The initial SSID could be the manufacturer's name or the model name.
- If you do not know the security information, please consult the router manufacturer, your system administrator, or your Internet provider.

2. Press **WiFi**.
3. Press **▲** or **▼** to select the [Find Network] option. Press **OK**.
4. When the [WLAN Enable?] message appears, press **▲** to select [On].
This starts the wireless setup wizard. To cancel, press **▼**.
5. The machine searches for your network and display a list of available SSIDs. When a list of SSIDs appears, press **▲** or **▼** to select the SSID you want. Press **OK**.
6. Do one of the following:
 - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step.
Enter the key, and then press **OK** to apply your settings.
To apply the settings, press **▲** to select [Yes].

- If your authentication method is Open System and your encryption mode is None, go to the next step.
7. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

(Windows) Or, use the Brother installation disc to set up your machine (not available in all countries).

- [Use the Wireless Network](#)

Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

Type A

Connection when the wireless LAN access point/router (1) doubles as the Registrar.

Type B

Connection when another device (2), such as a computer, is used as the Registrar.

>> [DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW](#)
>> [MFC-T920DW/MFC-T925DW](#)

DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

1. Press **WiFi**.
2. Press **▲** or **▼** to select [WPS/PIN Code]. Press **OK**.
3. When the [WLAN Enable?] message appears, press **▲** to select [On].
This starts the wireless setup wizard. To cancel, press **▼**.
4. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
5. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: <http://192.168.1.2>)
6. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless LAN access point/router.
- The settings page may differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If you are using a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, complete the following steps:

7. Do one of the following:

- Windows 10

Click  > **Windows System > Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings > Control Panel > Hardware and Sound > Devices and Printers > Add a device**.

- Windows 7

Click  (**Start**) > **Devices and Printers > Add a device**.

- To use a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.

- If you use Windows 7, Windows 8.1, or Windows 10 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the driver and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

Use the Brother installation disc to set up your machine (not available in all countries).

8. Select your machine and click **Next**.

9. Type the PIN displayed on the machine's LCD, and then click **Next**.

10. (Windows 7) Select your network, and then click **Next**.

11. Click **Close**.

MFC-T920DW/MFC-T925DW

1. Press **Ajustes (Settings)**.

2. Press **▲** or **▼** to make your selections:

- a. Select [Network]. Press **OK**.
- b. Select [WLAN (Wi-Fi)]. Press **OK**.
- c. Select [WPS/PIN Code]. Press **OK**.

3. When [Enable WLAN?] appears, press **▶**.

The wireless setup wizard starts. To cancel, press **◀**.

4. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.

5. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: <http://192.168.1.2>)

6. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless LAN access point/router.
 - The settings page may differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.
-

If you are using a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, complete the following steps:

7. Do one of the following:

- Windows 10

Click  > **Windows System > Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings > Control Panel > Hardware and Sound > Devices and Printers > Add a device**.

- Windows 7

Click  (Start) > **Devices and Printers** > **Add a device**.

- To use a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.
- If you use Windows 7, Windows 8.1, or Windows 10 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the driver and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

Use the Brother installation disc to set up your machine (not available in all countries).

8. Select your machine and click **Next**.
9. Type the PIN displayed on the machine's LCD, and then click **Next**.
10. (Windows 7) Select your network, and then click **Next**.

DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

Network Name (SSID)			
Communication Mode	Authentication Method	Encryption Mode	Network Key
Infrastructure	Open System	NONE	-
		WEP	
	Shared Key	WEP	
		WPA/WPA2-PSK	AES
		TKIP	

For example:

Network Name (SSID)			
HELLO			
Communication Mode	Authentication Method	Encryption Mode	Network Key
Infrastructure	WPA2-PSK	AES	12345678

If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press **WiFi**.
3. Press **▲** or **▼** to select [Find Network]. Press **OK**.
4. When the [WLAN Enable?] message appears, press **▲** to select [On].
This starts the wireless setup wizard. To cancel, press **▼**.
5. The machine will search for your network and display a list of available SSIDs. Press **▲** or **▼** to select the [<New SSID>] option, and then press **OK**.
6. Enter the SSID name, and then press **OK**.

For more information about how to enter text, see *Related Information*.

7. Press **▲** or **▼** to select the [Infrastructure] option. Press **OK**.
8. Press **▲** or **▼** to select the Authentication Method. Press **OK**.
9. Do one of the following:
 - If you selected the [Open System] option, press **▲** or **▼** to select the Encryption type [None] or [WEP], and then press **OK**.
If you selected the [WEP] option for Encryption type, enter the WEP key, and then press **OK**.
 - If you selected the [Shared Key] option, enter the WEP key, and then press **OK**.

- If you selected the [WPA/WPA2-PSK] option, press ▲ or ▼ to select the Encryption type [TKIP+AES] or [AES], and then press **OK**.

Enter the WPA key, and then press **OK**.

- For more information about how to enter text, see *Related Information*.
- Your Brother machine supports the use of the first WEP key only.

10. To apply the settings, press ▲ to select [Yes]. To cancel, press ▼ to select [No].

11. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

7. Select [Infrastructure], and then press **OK**.
 8. Select the Authentication Method, and then press **OK**.
 9. Do one of the following:
 - If you selected the [Open System] option, press ▲ or ▼ to select the Encryption type [None] or [WEP], and then press **OK**.
If you selected the [WEP] option for Encryption type, enter the WEP key, and then press **OK**.
 - If you selected the [Shared Key] option, enter the WEP key, and then press **OK**.
 - If you selected the [WPA/WPA2-PSK] option, press ▲ or ▼ to select the Encryption type [TKIP+AES] or [AES], and then press **OK**.
Enter the WPA key, and then press **OK**.

-
- For more information about how to enter text, see *Related Information*.
 - Your Brother machine supports the use of the first WEP key only.
-

10. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connection successful.].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

(Windows) Or, use the Brother installation disc to set up your machine (not available in all countries).

Wi-Fi Direct Overview

Wi-Fi Direct is one of the wireless configuration methods developed by the Wi-Fi Alliance®. It allows you to securely connect your mobile device to your Brother machine without using a wireless router/access point.

1. Mobile device
2. Your Brother machine

- You can use Wi-Fi Direct with either the wired or wireless network connection at the same time.
- The Wi-Fi Direct supported device can become a Group Owner. When configuring the Wi-Fi Direct network, the Group Owner serves as an access point.

When a machine receives a Wi-Fi Direct request from your mobile device, the message [Connect?] appears on the LCD. Press ▲ to connect.

1. Press **Menú (Menu)**.
2. Press ▲ or ▼ to select the following:
 - a. Select [Network]. Press **OK**.
 - b. Select [Wi-Fi Direct]. Press **OK**.
 - c. If your mobile device does not support Wi-Fi Direct, do the following:
 - i. Select [Group Owner]. Press **OK**.
 - ii. Select [On]. Press **OK**.
 - d. Select [Push Button]. Press **OK**.
3. When [Wi-Fi Direct On?] appears, press ▲ to select [On]. To cancel, press ▼.
4. When the [Activate Wi-Fi Direct on other device and press OK.] message appears, turn your mobile device's Wi-Fi Direct function on (for more information, see your mobile device's user's guide). Press **OK** on your Brother machine.
5. Do one of the following:
 - If your mobile device displays a list of machines with Wi-Fi Direct enabled, select your Brother machine.
 - If your Brother machine displays a list of mobile devices with Wi-Fi Direct enabled, select your mobile device and press **OK**. To search for available devices again, select [<Rescan>].
6. When your mobile device connects successfully, the machine displays [Connected].

MFC-T920DW/MFC-T925DW

When a machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received.] appears on the LCD. Press ► to connect.

1. Press **Ajustes (Settings)**.
2. Press ▲ or ▼ to select the following:
 - a. Select [Network]. Press **OK**.
 - b. Select [Wi-Fi Direct]. Press **OK**.
 - c. If your mobile device does not support Wi-Fi Direct, do the following:
 - i. Select [Group Owner]. Press **OK**.
 - ii. Select [On]. Press **OK**.
 - d. Press ▲ or ▼ to select [Push Button]. Press **OK**.
3. When the [Activate Wi-Fi Direct on other device.] message appears, turn your mobile device's Wi-Fi Direct function on (for more information, see your mobile device's user's guide). Press ► on your Brother machine.
4. Do one of the following:
 - If your mobile device displays a list of machines with Wi-Fi Direct enabled, select your Brother machine.
 - If your Brother machine displays a list of mobile devices with Wi-Fi Direct enabled, select your mobile device and press **OK**. To search for available devices again, select [Rescan].

Wireless LAN Report Error Codes

If the Wireless LAN Report shows that the connection failed, check the error code on the printed report and see the corresponding instructions in the table:

Error Code	Problem and Recommended Solutions
TS-01	<p>The wireless feature is not ON. Check the following points and try to set up your wireless connection again:</p> <ol style="list-style-type: none"> 1. Turn the wireless feature ON. 2. If a network cable is connected to your machine, disconnect it and change the wireless setting of your machine to ON. <p>The wireless feature is not ON. Check the following point and try to set up your wireless connection again:</p> <p>Turn the wireless feature ON.</p>
TS-02	<p>The wireless access point/router cannot be detected. Check the following points and try to set up your wireless connection again:</p> <ol style="list-style-type: none"> 1. Turn your wireless access point/router off, wait for 10 seconds, and then turn it on again. 2. Temporarily place your machine closer to the wireless router/access point when you are configuring the wireless settings. 3. If your wireless router/access point is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter. You can find the MAC address by printing the Network Configuration Report. 4. If you manually entered the Network Name (SSID) and security information (authentication method / encryption method / Network Key (Password)), the information may be incorrect. Check the Network Name and security information and re-enter the correct information. 5. Your Brother machine may not support a 5 GHz SSID/ESSID. Make sure your wireless access point/router is set to 2.4 GHz or 2.4 GHz / 5 GHz mixed mode. For more information, see the documentation provided with your wireless router/access point.
TS-04	<p>Your Brother machine does not support the authentication and encryption methods used by the selected wireless router/access point.</p> <p>Change the authentication and encryption methods of the wireless router/access point. Your Brother machine supports the following authentication and encryption methods:</p> <ul style="list-style-type: none"> • WPA-Personal TKIP / AES • WPA2-Personal TKIP / AES • Open WEP or None (without encryption) • Shared key WEP <p>If your issue is not solved, the Network Name (SSID) or security settings you entered may be incorrect. Check all wireless network settings are correct for your network.</p>
TS-05	<p>The Network Name (SSID) and Network Key (Password) are incorrect. Check the following points and try to set up your wireless connection again:</p> <ol style="list-style-type: none"> 1. Confirm the Network Name (SSID) and Network Key (Password). Brother cannot provide this information. If your Network Key contains upper-case and lower-case letters, make sure you type them correctly. 2. If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider. 3. If your wireless router/access point uses WEP encryption with multiple WEP keys, write down and use only the first WEP key.

Error Code	Problem and Recommended Solutions
TS-06	<p>The wireless security information (Authentication method / Encryption method / Network Key) is incorrect. Check the following points and try to set up your wireless connection again:</p> <ol style="list-style-type: none"> 1. Confirm the Network Key. If your Network Key contains upper-case and lower-case letters, make sure you type them correctly. Brother cannot provide this information. 2. Confirm whether the authentication method entered and the authentication method or encryption method supported by the wireless router/access point are the same. 3. If the network key, authentication method, and encryption method have been confirmed, restart your wireless router/access point and Brother machine. 4. If the machine is still unable to connect and your router supports WPS, try connecting with WPS. To set up your wireless connection using WPS, you must enable WPS on the Brother machine and wireless router/access point.
TS-07	<p>The machine cannot detect a wireless router/access point that has WPS enabled. Check the following points and try again:</p> <ol style="list-style-type: none"> 1. To check if your wireless router/access point supports WPS, look for the WPS symbol displayed on the router/access point. For more information, see the documentation provided with your wireless router/access point. 2. To set up your wireless connection using WPS, you must configure both your Brother machine and the wireless router/access point. 3. If you do not know how to set up your wireless router/access point using WPS, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-08	<p>Two or more wireless access points that have WPS enabled are detected. Check the following points and try again:</p> <ol style="list-style-type: none"> 1. Make sure that only one wireless router/access point within range has WPS enabled, and then try to connect again. 2. Try to connect again after a few minutes to avoid interference from other access points/routers.

How to confirm wireless security information (SSID/authentication method/encryption method/Network Key) of your WLAN access point/router:

1. The default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model number of the WLAN access point/router may be used as the default security settings.
2. See the documentation provided with your WLAN access point/router for information on how to find the security settings.
 - If the WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
 - The Network key may also be described as the Password, Security Key, or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask your Internet provider or network administrator.

Security

- [Before Using Network Security Features](#)
- [Configure Certificates for Device Security](#)
- [Use SSL/TLS](#)
- [Lock the Machine Settings from the Control Panel](#)

Before Using Network Security Features

Your machine employs some of the latest network security and encryption protocols available today. These network features can be integrated into your overall network security plan to help protect your data and prevent unauthorized access to the machine.

We recommend disabling the FTP and TFTP protocols. Accessing the machine using these protocols is not secure.

Related Information

- [Security](#)
-

Configure Certificates for Device Security

You must configure a certificate to manage your networked machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- [Supported Security Certificate Features](#)
- [Step by Step Guide for Creating and Installing a Certificate](#)
- [Create a Self-signed Certificate](#)
- [Create CSR and Install a Certificate from a Certificate Authority \(CA\)](#)
- [Import and Export the Certificate and Private Key](#)
- [Manage Multiple Certificates](#)

Supported Security Certificate Features

Your machine supports the use of multiple security certificates, which allows secure authentication and communication with the machine. The following security certificate features can be used with the machine:

SSL/TLS communication

The Brother machine supports the following:

- Pre-installed certificate

Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organization for better security.

- Self-signed certificate

This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- Certificate from a Certificate Authority (CA)

There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:

- When using a Certificate Signing Request (CSR) from this print server.
- When importing a certificate and a private key.

- If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
 - When you reset the print server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the print server, export them before resetting, and then reinstall them.
-

Related Information

- [Configure Certificates for Device Security](#)
-

Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- [Configure Certificates for Device Security](#)
-

Create a Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create Self-Signed Certificate**.
6. Enter a **Common Name** and a **Valid Date**.
 - The length of the **Common Name** is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
 - A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the **Common Name** that was used for the self-signed certificate.
7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

Related Information

- [Configure Certificates for Device Security](#)

Related Topics:

- [Access Web Based Management](#)

Create CSR and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- [Create a Certificate Signing Request \(CSR\)](#)
- [Install a Certificate on Your Machine](#)

Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create CSR**.
6. Type a **Common Name** (required) and add other information about your **Organization** (optional).

- Your company details are required so that a CA can confirm your identity and verify it to the outside world.
- The length of the **Common Name** must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this printer through SSL/TLS communication. The node name is displayed by default. The **Common Name** is required.
- A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
- The length of the **Organization**, the **Organization Unit**, the **City/Locality** and the **State/Province** must be less than 64 bytes.
- The **Country/Region** should be a two character ISO 3166 country code.
- If you are configuring an X.509v3 certificate extension, select the **Configure extended partition** checkbox, and then select **Auto (Register IPv4)** or **Manual**.

7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.

10. Click **Save**.

11. Click ▼ next to **Save**, and then specify the location where you want to save the file.

- Follow your CA's policy regarding the method to send a CSR to your CA.
 - If you are using the Enterprise root CA of Windows Server 2008/2008 R2/2012/2012 R2/2016/2019, we recommend using the Web Server for the certificate template to securely create the Client Certificate. For more detailed information, visit support.brother.com, to see the **FAQs & Troubleshooting** page of your model. Search for "SSL".

Install a Certificate on Your Machine

When you receive a certificate from a CA, follow the steps below to install it into the print server:

Only a certificate issued with your machine's CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. If you do not, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Click **Install Certificate**.
6. Browse to the file that contains the certificate issued by the CA, and then click **Submit**.

The certificate has been created successfully and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

Import a Certificate and Private Key

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Import Certificate and Private Key**.
6. Browse to the file you want to import.
7. Type the password if the file is encrypted, and then click **Submit**.

The certificate and private key are imported to your machine.

Export the Certificate and Private Key

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Export** shown with **Certificate List**.
6. Enter the password if you want to encrypt the file.
If a blank password is used, the output is not encrypted.
7. Enter the password again for confirmation, and then click **Submit**.
8. Click ▼ next to **Save**, and then specify the location where you want to save the file.

The certificate and private key are exported to your computer.

You can also import the certificate to your computer.

Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a print job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

Related Information

- [Use SSL/TLS](#)
 - [Brief History of SSL/TLS](#)
 - [Benefits of Using SSL/TLS](#)

Brief History of SSL/TLS

SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. For example, when you use Internet Explorer for Internet Banking and you see https:// and the little padlock icon in the web browser, you are using SSL. SSL grew to work with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

Related Information

- [Introduction to SSL/TLS](#)
-

Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS is to guarantee secure printing over an IP network by restricting unauthorized users from reading data sent to the machine. SSL's key selling point is that it can be used to print confidential data securely. For example, an HR department in a large company may be printing wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a confusing page of code and not the actual wage slip.

Install the Self-signed Certificate for Windows users with Administrator Rights

The following steps are for Microsoft Internet Explorer. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

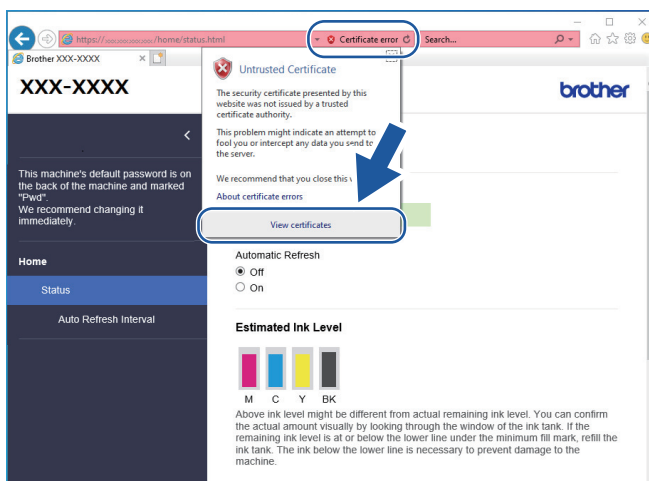

1. Do one of the following:
 - Windows 10, Windows Server 2016, and Windows Server 2019
Click  > **Windows Accessories**.
 - Windows 8.1
Right-click the  (**Internet Explorer**) icon on the taskbar.
 - Windows Server 2012 and Windows Server 2012 R2
Click  (**Internet Explorer**), and then right-click the  (**Internet Explorer**) icon that appears on the taskbar.
 - Windows 7 and Windows Server 2008
Click  (**Start**) > **All Programs**.
2. Right-click **Internet Explorer**, and then click **Run as administrator**.

If the **More** option appears, click **More**.

If the **User Account Control** screen appears, click **Yes**.

3. Type "https://machine's IP address" in your browser's address bar to access your machine (where "machine's IP address" is the machine's IP address or the node name that you assigned for the certificate).
4. Click **More information**.
5. Click **Go on to the webpage (not recommended)**.
6. Click **Certificate error**, and then click **View certificates**.

7. Click **Install Certificate....**
8. When the **Certificate Import Wizard** appears, click **Next**.
9. Select **Place all certificates in the following store**, and then click **Browse....**
10. Select **Trusted Root Certification Authorities**, and then click **OK**.
11. Click **Next**.
12. Click **Finish**.

13. Click **Yes**, if the fingerprint (thumbprint) is correct.

14. Click **OK**.

Print Documents Using SSL/TLS

To print documents securely with IPP protocol, use the IPPS protocol.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Make sure the **IPP** checkbox is selected.

If the **IPP** checkbox is not selected, select the **IPP** checkbox, and then click **Submit**.

Restart your machine to activate the configuration.

After the machine restarts, return to the machine's web page, type the password, go to the navigation menu, and then click **Network > Network > Protocol**.

6. Click **HTTP Server Settings**.
7. Select the **HTTPS(Port 443)** checkbox in the **IPP**, and then click **Submit**.
8. Restart your machine to activate the configuration.

Communication using IPPS cannot prevent unauthorized access to the print server.

Register an Account on Your Brother Machine for Brother Web Connect

Related Models: MFC-T920DW/MFC-T925DW

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- You must apply for Brother Web Connect access to register an account on your machine.
- Before you register an account, confirm that the correct date and time are set on the machine's control panel.

1. Press **FOTO/WEB (PHOTO/WEB)**.

- If information regarding the Internet connection appears on the machine's LCD, read the information and press ►.
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press ►.

2. Press ▲ or ▼ to select the following:

- a. Select the service with which you want to register. Press **OK**.
- b. Select [Register/Delete]. Press **OK**.
- c. Select [Register Account]. Press **OK**.

3. The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access. Press ►.

4. Enter the temporary ID using the dial pad. Press **OK**.

An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Either enter the temporary ID correctly, or apply for access again to receive a new temporary ID.

5. The machine will prompt you to enter the account name that you want to be displayed on the LCD. Press ►.

6. Enter the name, and then press **OK**.

7. Do one of the following:

- To set a PIN for the account, press ►. (A PIN prevents unauthorized access to the account.) Enter a four-digit number, and then press **OK**.
- If you do not want to set a PIN, press ◀.

When the account information you entered appears, confirm that it is correct.

8. Press ► to register your information as entered.

9. Press ►.

Account registration is complete and your machine can now access the service.

10. Press **Detener/Salir (Stop/Exit)**.

Scan Using AirPrint (macOS)

Before scanning, make sure your machine is in the scanner list on your Mac computer.

1. Load your document.
2. Select **System Preferences** from the Apple menu.
3. Click **Printers & Scanners**.
4. Select your machine from the scanner list.
5. Click the **Scan** tab, and then click the **Open Scanner...** button.
The Scanner screen appears.
6. If you place the document in the ADF, select **Use Document Feeder** checkbox, and then select the size of your document from the scan size setting pop-up menu.
7. Select the destination folder or destination application from the destination setting pop-up menu.
8. Click **Show Details** to change the scanning settings if needed.
You can crop the image manually by dragging the mouse pointer over the portion you want to scan when scanning from the scanner glass.
9. Click **Scan**.

Send a Fax Using AirPrint (macOS)

Related Models: MFC-T920DW/MFC-T925DW

Make sure your machine is in the printer list on your Mac computer. Apple TextEdit is used in the example below.

AirPrint supports only black and white fax documents.

1. Make sure your machine is turned on.
2. On your Mac computer, open the file that you want to send as a fax.
3. Click the **File** menu, and then select **Print**.
4. Click the **Printer** pop-up menu, and then select **Brother XXX-XXXX - Fax** (where XXX-XXXX is the name of your model).
5. Type the fax recipient information.
6. Click **Fax**.

Mopria™ Print Service and Mopria™ Scan

Mopria™ Print Service is a print feature and Mopria™ Scan is a scan feature on Android™ mobile devices developed by the Mopria Alliance™. With this service, you can connect to the same network as your machine to print and scan without additional setup.

1. Android™ Mobile Device
2. Wi-Fi® Connection
3. Your Machine

You must download the Mopria™ Print Service or Mopria™ Scan from Google Play™ and install it on your Android™ device. Before using this service, you must turn it on.

Brother iPrint&Scan Overview for Windows and Mac

Use Brother iPrint&Scan for Windows and Mac to print and scan from your computer.

The following screen shows an example of Brother iPrint&Scan for Windows. The actual screen may differ depending on the version of the application.

- For Windows
Go to your model's **Downloads** page at support.brother.com to download the latest application.
- For Mac
Download and install Brother iPrint&Scan from the App Store.

If prompted, install the driver and software necessary to use your machine. Download the installer from your model's **Downloads** page at support.brother.com.

Troubleshooting

If you think there is a problem with your machine, first check each of the items below, then try to identify the problem, and follow our troubleshooting tips.

You can correct most problems yourself. If you need additional help, visit support.brother.com for the latest FAQs and troubleshooting tips:

1. Visit support.brother.com.
2. Click **FAQs & Troubleshooting** and search for your model name.

First, check the following:

- The machine's power cord is connected correctly and the machine's power is on.
- All of the machine's protective parts have been removed.
- The Scanner Cover and the Jam Clear Cover are fully closed.
- Paper is inserted correctly in the paper tray.
- The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
- (For network models) The access point (for wireless), router, or hub is turned on and its link indicator is blinking.
- The machine's LCD is displaying messages.

If you did not solve the problem with the checks, identify the problem and then see *Related Information*.

Error and Maintenance Messages

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

You can correct most errors and perform routine maintenance yourself. If you need more tips, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

Error Message	Cause	Action
Cannot Print XX	The machine has a mechanical problem. -OR- A foreign object, such as a paper clip or a piece of ripped paper, is in the machine.	Open the scanner cover and remove any foreign objects and paper scraps from inside the machine. If the error message continues, disconnect the machine from the power for several minutes, and then reconnect it. <i>See Related Information: Paper is Jammed in the Machine when using the Standard Paper Tray (Paper Jam).</i>
Cannot Scan XX	The machine has a mechanical problem.	Disconnect the machine from the power for several minutes, and then reconnect it.
Change Paper?	This message is displayed when the setting to confirm the paper type and size is enabled.	To not display this confirmation message, change the setting to Off. <i>See Related Information: Change the Check Paper Setting.</i>
Check ink level. If there is ink, then press OK.	A certain amount of ink is consumed during this operation. Look through the window of the ink tank to confirm the actual amount of remaining ink.	If the remaining ink level is at or below the lower line under the minimum fill mark, refill the ink tank.
Close ink cover.	The ink tank cover is not locked in the closed position.	Firmly close the ink tank cover until it locks into place.
Connection Error	Other devices are trying to connect to the Wi-Fi Direct network at the same time.	Make sure there are no other devices trying to connect to the Wi-Fi Direct network, and then try to configure the Wi-Fi Direct settings again.
Connection Fail	The Brother machine and your mobile device cannot communicate during the Wi-Fi Direct network configuration.	<ul style="list-style-type: none"> • Move the mobile device closer to your Brother machine. • Move your Brother machine and the mobile device to an obstruction-free area. • If you are using the PIN Method of WPS, make sure you have entered the correct PIN.
Cover is Open.	The scanner cover is not locked in the closed position.	Lift the scanner cover and then close it again.
		Make sure the interface cable (if used) has been guided correctly through the cable channel and out the back of the machine.
Data Remaining	Print data is left in the machine's memory.	Press Detener/Salir (Stop/Exit) . The machine will cancel the job and clear it from the memory. Try to print again.
Document Jam	The document was not inserted or fed correctly, or the document scanned from the ADF was too long.	Remove the jammed document, and then press Detener/Salir (Stop/Exit) . Set the document in the ADF correctly. <i>See Related Information: Load Documents in the Automatic Document Feeder (ADF).</i> <i>See Related Information: Document Jams.</i>
High Temperature	The room temperature is too high.	After cooling the room, allow the machine to cool down to room temperature. Try again when the machine has cooled down.

Error Message	Cause	Action
Ink Low	<p>The amount of remaining ink in one or more of the ink tanks is low.</p> <p>This error message may appear if the ink dot counter is incorrect even if some ink remains.</p>	<p>Look through the window of the ink tank to confirm the actual amount of remaining ink.</p> <p>If the remaining ink level is at or below the lower line under the minimum fill mark, refill the ink tank.</p> <p>A message may appear on the LCD to verify whether the ink tanks were refilled. Press ▲ (Yes) to reset the ink dot counter for the refilled color. Press ▼ (No) for the non-refilled colors.</p> <p>See <i>Related Information: Refill the Ink Tanks</i>.</p>
InkBox Full	<p>The ink absorber box is full. These components are periodic maintenance items that may require replacement after a period of time to ensure optimum performance from your Brother machine. Because these components are periodic maintenance items, the replacement is not covered under the warranty. The need to replace these items and the time period before replacement is dependent on the number of purges and flushes required to clean the ink system. These boxes acquire amounts of ink during the different purging and flushing operations. The number of times a machine purges and flushes for cleaning varies depending on different situations. For example, frequently powering the machine on and off will cause numerous cleaning cycles since the machine automatically cleans upon power up.</p>	<p>The ink absorber box must be replaced. Call Brother Customer Service or a Brother Authorized Service Center to have your machine serviced.</p>
InkBox NearFull	<p>The ink absorber box is nearly full.</p>	<p>The ink absorber box must be replaced soon. Call Brother Customer Service or a Brother Authorized Service Center to have your machine serviced.</p> <p>The ink absorber box absorbs the small amount of ink emitted during print head cleaning.</p>
Low Temperature	<p>The room temperature is too low.</p>	<p>After warming the room, allow the machine to warm up to room temperature. Try again when the machine has warmed up.</p>
No Device	<p>When configuring the Wi-Fi Direct network, the Brother machine cannot find your mobile device.</p>	<ul style="list-style-type: none"> • Make sure your machine and mobile device are in the Wi-Fi Direct mode. • Move the mobile device closer to your Brother machine. • Move your Brother machine and the mobile device to an obstruction-free area. • If you are manually configuring the Wi-Fi Direct network, make sure you have entered the correct password. • If your mobile device has a configuration page for how to obtain an IP address, make sure the IP

Out of Memory	The machine's memory is full.	If a fax-sending or copy operation is in progress: <ul style="list-style-type: none"> • Press Detener/Sair (Stop/Exit) and wait until the other operations that are in progress finish, and then try again. • Press ▶ to select Partial Print to copy the pages scanned so far. • Print the faxes that are in the memory. See <i>Related Information: Print a Fax Stored in the Machine's Memory.</i>
Paper Size Mismatch	The paper size setting does not match the size of paper in the tray. -OR- You did not set the paper guides in the tray to the indicators for the paper size you are using.	1. Check that the paper size you chose on the machine's display matches the size of the paper in the tray. See <i>Related Information: Change the Paper Size and Paper Type.</i> 2. Make sure you loaded the paper in a Portrait position, by setting the paper guides at the indicators for your paper size. See <i>Related Information: Load Paper.</i> 3. After you have checked the paper size and the paper position, press ▶ .
		If you are printing from your computer, make sure the paper size you selected in the printer driver or in the application you use to print matches the size of paper in the tray. See <i>Related Information: Print Settings (Windows).</i>
Refill Ink	The amount of remaining ink in one or more of the ink tanks is low. The machine will stop all print operations. This error message may appear if the ink dot counter is incorrect even if some ink remains.	Refill the ink tank. When you refill the ink tank, fill the ink up to the upper line, or fill with all of the ink in the bottle if it does not exceed the upper line. A message may appear on the LCD to verify whether the ink tanks were refilled. Press ▶ (Yes) to reset the ink dot counter for the refilled color. Press ◀ (No) for the non-refilled colors. See <i>Related Information: Refill the Ink Tanks.</i> You can still scan even if the ink is low or needs to be refilled.
The maximum number of devices are already connected using Wi-Fi Direct.	The maximum number of mobile devices are already connected to the Wi-Fi Direct network when the Brother machine is the Group Owner.	After the current connection between your Brother machine and another mobile device has shut down, try to configure the Wi-Fi Direct settings again. You can confirm the connection status by printing the Network Configuration Report.

Error Message	Cause	Action
		See <i>Related Information: Print the Network Configuration Report</i> .
Tray 1 not detected	The paper tray is not completely inserted.	Slowly push the paper tray completely into the machine.
	Paper or a foreign object has prevented the paper tray from being inserted correctly.	Pull the paper tray out of the machine, and remove the jammed paper or foreign object. If you cannot find or remove the jammed paper, see <i>Related Information: Printer Jam or Paper Jam</i> .
Tray 1 Settings MP Tray Settings	This message is displayed when the setting to confirm the paper type and size is enabled.	To not display this confirmation message, change the setting to Off. See <i>Related Information: Change the Check Paper Setting</i> .
Unusable Device Disconnect device from front connector & turn machine off & then on	A broken device is connected to the USB direct interface.	Unplug the device from the USB direct interface. Turn the machine off and then on again.
Unusable Device Please Disconnect USB Device.	A USB device or USB flash drive that is not supported has been connected to the USB direct interface.	Unplug the device from the USB direct interface.

Error Messages When Using the Brother Web Connect Feature

Related Models: MFC-T920DW/MFC-T925DW

Your Brother machine displays an error message if an error occurs. The most common error messages are shown in the chart.

You can correct most errors yourself. If you need more tips, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

Connection Error

Error Messages	Cause	Action
Connection Error 02	The machine is not connected to a network.	<ul style="list-style-type: none"> Verify that the network connection is good. If FOTO/WEB (PHOTO/WEB) was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 03	<ul style="list-style-type: none"> Network or server settings are incorrect. There is a problem with the network or server. 	<ul style="list-style-type: none"> Confirm that network settings are correct, or wait and try again later. If FOTO/WEB (PHOTO/WEB) was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 07	Date and time settings are incorrect.	Set the date and time correctly. Note that if the machine's power cord is disconnected, the date and time settings may have reset to factory settings.

Authentication Error

Error Messages	Cause	Action
Authentication Error 01	The PIN you entered to access the account is incorrect. The PIN is the four-digit number that was entered when registering the account to the machine.	Enter the correct PIN.
Authentication Error 02	The temporary ID that was entered is incorrect.	Enter the correct temporary ID.
	The temporary ID that was entered has expired. A temporary ID is valid for 24 hours.	Apply for Brother Web Connect access again and receive a new temporary ID, and then use the new ID to register the account to the machine.
Authentication Error 03	The name you entered as the display name has already been registered to another service user.	Enter a different display name.

Server Error

Error Messages	Cause	Action
Server Error 01	The machine's authentication information (needed to access the service) has expired or is invalid.	Apply for Brother Web Connect access again to receive a new temporary ID, and then use the new ID to register the account to the machine.
Server Error 03	The file you are trying to upload may have one of the following problems: <ul style="list-style-type: none">• The file exceeds the service's limit on number of pixels, file size, etc.• The file type is not supported.• The file is corrupted.	The file cannot be used: <ul style="list-style-type: none">• Check the service's size or format restrictions.• Save the file as a different type.• If possible, get a new, uncorrupted version of the file.
Server Error 13	There is a problem with the service and it cannot be used now.	Wait and try again. If you get the message again, access the service from a computer to confirm if it is unavailable.

Shortcut Error

Error Messages	Cause	Action
Shortcut Error 02	The shortcut cannot be used because the account was deleted after the shortcut was registered.	Delete the shortcut, and then register the account and shortcut again.

Paper is Jammed in the Machine when using the Standard Paper Tray (Paper Jam)

Related Models: DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

When printing from the paper tray, if the LCD displays [Paper Jam], follow these steps:

If you are using the MP tray, see *Related Information: Paper is Jammed Inside and in the Multi-purpose Tray (Paper Jam/Jam E Inside/MP)*.

1. Unplug the machine from the AC power outlet.
2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

4. Slowly pull the jammed paper (1) out of the machine.

5. Make sure you look carefully inside (1) for any scraps of paper.

6. Place both hands under the plastic tabs on both sides of the machine to lift the scanner cover (1) into the open position.

7. Slowly pull the jammed paper (1) out of the machine.

8. Move the print head (if needed) to take out any paper remaining in this area. Make sure scraps of paper are not left in the corners of the machine (1) and (2).

IMPORTANT

- DO NOT touch the encoder strip, a thin strip of plastic that stretches across the width of the machine (1). Doing this may cause damage to the machine.

- If the print head is in the right corner as shown in the illustration (2), you cannot move it. Follow these steps:
 - a. Close the scanner cover, and then reconnect the power cord.
 - b. Open the scanner cover again, and then hold down the **Detener/Salir (Stop/Exit)** button until the print head moves to the center.
 - c. Unplug the machine from the power source and remove the jammed paper.

- If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head to take out the paper.
Hold the concave areas with the triangle marks as shown in the illustration (3) to move the print head.
- If ink gets on your skin or clothing, immediately wash it off with soap or detergent.

9. Gently close the scanner cover using both hands.

10. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

11. Slowly pull the jammed paper out of the machine.

12. Close the Jam Clear Cover. Make sure the cover is closed completely.

13. Put the paper tray firmly back in the machine.

-
14. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

15. Reconnect the power cord.

Additional paper jam clear operations

If the LCD error message continues to appear and you repeatedly experience paper jams, do the following:

1. Unplug the machine from the AC power outlet and open the manual feed slot cover.
2. Load one sheet of thick A4 or Letter sized paper, such as glossy paper, in the manual feed slot. Insert the paper deep into the manual feed slot.

3. Re-connect the power cord.

The paper you placed in the manual feed slot will be fed through the machine and ejected. If the thick paper is pushing any jammed paper out, remove the jammed paper.

Paper is Jammed Inside and in the Front of the Machine (Jam A Inside/Front)

Related Models: MFC-T920DW/MFC-T925DW

If the LCD displays [Jam A Inside/Front] or [Repeat Jam A], follow these steps:

1. Unplug the machine from the AC power outlet.

IMPORTANT

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the machine's memory to your computer or another fax machine so you will not lose any important messages.

2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

4. Slowly pull the jammed paper (1) out of the machine.

5. Place both hands under the plastic tabs on both sides of the machine to lift the scanner cover (1) into the open position.

6. Slowly pull the jammed paper (1) out of the machine.

IMPORTANT

- DO NOT touch the encoder strip, a thin strip of plastic that stretches across the width of the machine (1). Doing this may cause damage to the machine.

- If the print head is in the right corner as shown in the illustration (2), you cannot move it. Follow these steps:
 - a. Close the scanner cover, and then reconnect the power cord.
 - b. Open the scanner cover again, and then press and hold the **Detener/Salir (Stop/Exit)** button until the print head moves to the center.
 - c. Unplug the machine from the power source and gently remove the jammed paper.

- If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head to remove the paper.
Hold the concave areas with the triangle marks as shown in the illustration (3) to move the print head.
- If ink gets on your skin or clothing, immediately wash it off with soap or detergent.

If your LCD error message was [Repeat Jam A], move the print head (if needed) to remove any paper remaining in this area. Make sure scraps of paper are not left in the corners of the machine (1) and (2).

7. Gently close the scanner cover using both hands.

If your LCD error message was [Repeat Jam A], do the following:

- a. Make sure you look carefully inside (1) for any scraps of paper.

- b. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

- c. Slowly pull the jammed paper out of the machine.

- d. Close the Jam Clear Cover. Make sure the cover is closed completely.

-
8. Push the paper tray firmly back in the machine.

-
9. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

10. Reconnect the power cord.

Paper is Jammed in the Front of the Machine (Jam B Front)

Related Models: MFC-T920DW/MFC-T925DW

If the LCD displays [Jam B Front] or [Repeat Jam B Front], follow these steps:

1. Unplug the machine from the AC power outlet.

IMPORTANT

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the machine's memory to your computer or another fax machine so you will not lose any important messages.

2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

4. Slowly pull out the jammed paper (1).

If your LCD error message was [Repeat Jam B Front], do the following:

- a. Make sure you look carefully inside (1) for any scraps of paper.

- b. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

- c. Slowly pull the jammed paper out of the machine.

- d. Close the Jam Clear Cover. Make sure the cover is closed completely.

5. Put the paper tray firmly back in the machine.

-
6. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

7. Reconnect the power cord.

Paper is Jammed in the Back of the Machine (Jam C Rear)

Related Models: MFC-T920DW/MFC-T925DW

If the LCD displays [Jam C Rear], follow these steps:

1. Unplug the machine from the AC power outlet.

IMPORTANT

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the machine's memory to your computer or another fax machine so you will not lose any important messages.

2. Pull the paper tray (1) completely out of the machine.

3. Pull the two green levers inside the machine to release the jammed paper.

Depending on the paper size, it is easier to remove the jammed paper from the front of the machine rather than from the back of the machine.

4. Squeeze both levers (1), and then open the Jam Clear Cover at the back of the machine.

-
5. Slowly pull the jammed paper out of the machine.

6. Close the Jam Clear Cover. Make sure the cover is closed completely.

7. Put the paper tray firmly back in the machine.

8. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

9. Reconnect the power cord.

Paper is Jammed in the Multi-purpose Tray (Jam D MP tray)

Related Models: MFC-T920DW/MFC-T925DW

If the LCD displays [Jam D MP Tray], follow these steps:

1. Unplug the machine from the AC power outlet.

IMPORTANT

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the machine's memory to your computer or another fax machine so you will not lose any important messages.

2. Remove any paper that is loaded on the MP tray.
Place the paper support back into the MP tray cover.

3. Pull the paper tray (1) completely out of the machine.

4. Pull the two green levers inside the machine to release the jammed paper.

5. Slowly pull out the jammed paper (1).

If you are having difficulty pulling the paper out, push the release lever (1) toward the back of the machine, and then pull the paper.

6. Close the MP tray cover.

7. Push the paper tray firmly back in the machine.

8. While holding the paper tray in the machine, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

9. Reconnect the power cord.

Difficulties	Suggestions
	<p>Look through the window of the ink tank to confirm the actual amount of remaining ink.</p> <p>If the remaining ink level is at or below the lower line under the minimum fill mark, refill the ink tank.</p> <p>A message may appear on the LCD to verify whether the ink tanks were refilled. Select Yes to reset the ink dot counter for the refilled color. Select No for the non-refilled colors.</p> <p>See <i>Related Information: Refill the Ink Tanks</i>.</p> <p>If old, unprinted data remains in the printer driver spooler, it will prevent new print jobs from printing. Open the printer icon and delete all data as follows:</p> <ul style="list-style-type: none"> • Windows 10, Windows Server 2016, and Windows Server 2019 Click  > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers > Printers. • Windows 8.1 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware and Sound group, click View devices and printers > Printers. • Windows Server 2012 R2 Click Control Panel on the Start screen. In the Hardware group, click View devices and printers > Printers. • Windows Server 2012 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers > Printers. • Windows 7 and Windows Server 2008 R2 Click /Start > Devices and Printers > Printers and Faxes. • Windows Server 2008 Click  (Start) > Control Panel > Hardware and Sound > Printers. • Mac Click the System Preferences > Printers & Scanners.
The headers or footers appear when the document is displayed on the screen but do not appear when the document is printed.	There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this. See <i>Related Information: Unprintable Area</i> .
Cannot perform 'Page Layout' printing.	(Windows) Check that the paper size setting in the application and in the printer driver are the same.
Print speed is too slow.	<p>(Windows)</p> <p>Try changing the printer driver setting. The highest resolution needs longer data processing, sending, and printing time. Try the other quality settings in the printer driver as follows:</p> <p>In the printer driver, clear the Color Enhancement (True2Life) checkbox on the Advanced tab.</p> <p>Turn the Borderless feature off. Borderless printing is slower than normal printing. See <i>Related Information: Print Settings (Windows)</i>.</p> <p>Turn off the Quiet Mode setting. Print speed is slower in Quiet Mode. See <i>Related Information: Reduce Printing Noise</i>.</p> <p>Make sure the Media Type setting in the printer drivers, your application, or the Paper Type setting on the machine matches the type of paper you are using. See <i>Related Information: Change the Paper Size and Paper Type</i>. See <i>Related Information: Print Settings (Windows)</i>.</p>

Print Quality Difficulties

Difficulties	Suggestions
Poor print quality	<p>Check the print quality. See <i>Related Information: Check the Print Quality.</i></p> <p>Make sure the Media Type setting in the printer drivers, your application, or the Paper Type setting on the machine matches the type of paper you are using. See <i>Related Information: Change the Paper Size and Paper Type.</i> See <i>Related Information: Print Settings (Windows).</i></p> <p>Make sure the ink is fresh. The following may cause ink to clog:</p> <ul style="list-style-type: none"> • The expiration date written on the bottle package has passed. • The ink bottle may not have been stored correctly before use. Store the ink bottle on a level surface in a cool, dark place. • The ink bottle cap may not be tightly secured. <p>Make sure you are using one of the recommended types of paper. See <i>Related Information: Acceptable Paper and Other Print Media.</i></p> <p>The recommended environment for your machine is between 68 °F to 91.4 °F (20°C to 33°C).</p>
White lines appear in text or graphics. 	<p>Clean the print head. See <i>Related Information: Clean the Print Head from Your Brother Machine.</i> See <i>Related Information: Clean the Print Head Using Web Based Management.</i> See <i>Related Information: Clean the Print Head from Your Computer (Windows).</i></p> <p>Check and adjust the paper feed. See <i>Related Information: Correct the Paper Feed to Clear Vertical Lines.</i></p> <p>Try using the recommended types of paper. See <i>Related Information: Acceptable Paper and Other Print Media.</i></p> <p>To prolong print head life, provide the best ink economy and maintain print quality, we do not recommend frequently unplugging the machine and/or leaving the machine unplugged for extended periods of time. We recommend using  to power down the machine. Using  allows minimal power to the machine, resulting in periodic, but less frequent, cleaning of the print head.</p>
Dark lines appear at regular intervals. 	<p>Check and adjust the paper feed. See <i>Related Information: Correct the Paper Feed to Clear Vertical Lines.</i></p>
The machine prints blank pages.	<p>Check the print quality. See <i>Related Information: Check the Print Quality.</i></p> <p>To prolong print head life, provide the best ink economy and maintain print quality, we do not recommend frequently unplugging the machine and/or leaving the machine unplugged for extended periods of time. We recommend using  to power down the machine. Using  allows minimal power to the machine, resulting in periodic, but less frequent, cleaning of the print head.</p>
Characters and lines are blurred.	<p>Check the printing alignment. See <i>Related Information: Check the Print Alignment from Your Brother Machine.</i></p> <p>Change the print options.</p>

Difficulties	Suggestions
	See <i>Related Information: Change the Print Options to Improve Your Print Results.</i>
Printed text or images are skewed.	Make sure the paper is loaded correctly in the paper tray and the paper guides are adjusted correctly. See <i>Related Information: Load Paper.</i>
	Make sure the Jam Clear Cover is closed correctly.
There are smudges or stains at the top center of the printed page.	Make sure the paper is not too thick or curled. See <i>Related Information: Acceptable Paper and Other Print Media.</i>
Printing appears dirty or ink seems to run.	Make sure you are using the recommended types of paper. Do not handle the paper until the ink is dry. See <i>Related Information: Acceptable Paper and Other Print Media.</i>
	Make sure the printing surface is face down in the paper tray.
	If you are using photo paper, make sure the glossy side of the photo paper is face down in the tray and you have set the correct paper type. If you are printing a photo from your computer, set the Media Type in the printer driver or in the application you use to print.
Ink is smudged or wet when using glossy photo paper.	Be sure to check the front and back of the paper. Place the glossy surface (printing surface) face down. See <i>Related Information: Change the Paper Size and Paper Type.</i>
	If you use glossy photo paper, make sure the paper type setting is correct.
Stains appear on the reverse side or at the bottom of the page.	Make sure the printer platen is not dirty with ink. See <i>Related Information: Clean the Machine's Printer Platen.</i>
	Make sure you are using the paper support flap. See <i>Related Information: Load Paper.</i>
	Make sure the paper feed rollers are not dirty with ink. See <i>Related Information: Clean the Paper Feed Rollers.</i>
The printouts are wrinkled.	(Windows) In the printer driver, select the Advanced tab, click Other Print Options , and then click Advanced Color Settings . Clear the Bi-Directional Printing checkbox.
Smudge or stain on the reverse side of the page when using the automatic 2-sided printing feature. (DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)	(Windows) Change the Reduce Smudge option in your printer driver properties or preferences. See <i>Related Information: Prevent Smudged Printouts and Paper Jams (Windows).</i>

Paper Handling Difficulties

Difficulties	Suggestions
The machine does not feed paper.	Make sure the paper tray is pushed in all the way until it locks into place.
	Make sure the Jam Clear Cover at the back of the machine is closed.
	If the machine's LCD displays a Paper Jam message and you still have a problem, see <i>Related Information: Error and Maintenance Messages.</i>
	If the paper tray is empty, load a new stack of paper into the paper tray.

Difficulties	Suggestions
	<p>If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back in the paper tray.</p> <p>Reduce the amount of paper in the paper tray, and then try again.</p> <p>Clean the paper pick-up rollers. <i>See Related Information: Clean the Paper Pick-up Rollers.</i></p> <p>Make sure that the paper is within specifications for the machine. <i>See Related Information: Paper Weight and Thickness.</i></p>
Photo paper does not feed correctly.	When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.
Machine feeds multiple pages.	<ul style="list-style-type: none"> • Make sure the paper is loaded correctly in the paper tray. • Remove all the paper from the tray and fan the stack of paper well, then put it back in the tray. • Make sure you do not push the paper in too far. <p><i>See Related Information: Load Paper.</i></p> <p>Make sure the Jam Clear Cover is closed correctly. <i>See Related Information: Printer Jam or Paper Jam.</i></p> <p>Make sure the Base Pad in the paper tray is not dirty. <i>See Related Information: Clean the Base Pad.</i></p>
There is a paper jam.	<p><i>See Related Information: Printer Jam or Paper Jam.</i></p> <p>Make sure the paper guides are set to the correct paper size.</p> <p>Use the jam prevention settings.</p> <p>For copying: <i>See Related Information: Change the Print Options to Improve Your Print Results.</i></p> <p>For printing: <i>See Related Information: Change the Print Options to Improve Your Print Results.</i></p> <p><i>See Related Information: Prevent Smudged Printouts and Paper Jams (Windows).</i></p>
The paper jams when you use 2-sided print.	<p>If paper jams occur frequently during 2-sided printing, the paper feed rollers may be stained with ink. Clean the paper feed rollers.</p> <p><i>See Related Information: Clean the Paper Feed Rollers.</i></p>

Printing Received Faxes (MFC models)

Difficulties	Suggestions
<ul style="list-style-type: none"> • Condensed print • Horizontal streaks • Top and bottom sentences are cut off • Missing lines 	<p>This is usually caused by a poor telephone connection. Make a copy; if your copy looks good, you probably had a bad connection, with static or interference on the telephone line. Ask the other party to send the fax again.</p>
Black lines when receiving.	<p>The sender's scanner may be dirty. Ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine.</p>
Left and right margins are cut off or a single page is printed on two pages.	<p>If the received faxes are divided and printed on two pages or if you get an extra blank page, your paper size setting may not be correct for the paper you are using.</p> <p><i>See Related Information: Change the Paper Size and Paper Type.</i></p> <p>Turn on Auto Reduction. <i>See Related Information: Shrink Page Size of an Oversized Incoming Fax.</i></p>

Telephone and Fax Problems

Related Models: MFC-T920DW/MFC-T925DW

- >> [Telephone Line or Connections](#)
- >> [Handling Incoming Calls](#)
- >> [Receiving Faxes](#)
- >> [Sending Faxes](#)

Telephone Line or Connections

Difficulties	Suggestions
Dialing does not work. (No dial tone)	<p>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL, VoIP or magicJack services, call your service provider for connection instructions.</p> <p>If you are using a VoIP system, try changing the VoIP setting to <i>Basic (for VoIP)</i>. This will lower modem speed and turn off Error Correction Mode (ECM).</p> <p>See <i>Related Information: Telephone Line Interference/VoIP</i>.</p>
	<p>(Available only for some countries.)</p> <p>Change the Tone/Pulse setting.</p> <p>See <i>Related Information: Set Tone or Pulse Dialing Mode</i>.</p>
	<p>Send a manual fax by pressing the Hook button, and dialing the number. Wait to hear fax-receiving tones before pressing the Start button.</p>
	<p>If there is no dial tone, connect a known working telephone and telephone line cord to the jack. Then lift the external telephone's handset and listen for a dial tone. If there is still no dial tone, ask your telephone company to check the line and/or wall jack.</p>
The machine does not answer when called.	<p>Make sure the machine is in the correct receive mode for your setup.</p> <p>See <i>Related Information: Choose the Correct Receive Mode</i>.</p> <p>Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check that the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If there is no ringing when you call your machine, ask your telephone company to check the line.</p>

Handling Incoming Calls

Difficulties	Suggestions
The machine 'Hears' a voice as a CNG Tone.	<p>If Easy Receive is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing Detener/Salir (Stop/Exit). Try avoiding this problem by turning Easy Receive Off.</p> <p>See <i>Related Information: Set Easy Receive</i>.</p>
Sending a Fax Call to the machine.	<p>If you answered on an extension telephone, press your Fax Receive Code (the factory setting is *51). If you answered on the external telephone (connected to the EXT. jack), press the Start button to receive the fax.</p> <p>When your machine answers, hang up.</p>
Custom features on a single line.	<p>If you have Call Waiting, Call Waiting/Caller ID, Caller ID, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.</p>

Difficulties	Suggestions
	<p>For Example: If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother's ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, we recommend using a separate telephone line with no custom features.</p>

Receiving Faxes

Difficulties	Suggestions
Cannot receive a fax.	<p>Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you hear static or interference on your fax line, contact your local telephone provider.</p>
	<p>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. If you subscribe to DSL, VoIP, or magicJack services, call your service provider for connection instructions. If you are using a VoIP system, try changing the VoIP setting to <i>Basic (for VoIP)</i>. This will lower modem speed and turn off Error Correction Mode (ECM).</p> <p>See <i>Related Information: Telephone Line Interference/VoIP</i>.</p>
	<p>Make sure the machine is in the correct Receive Mode. This is determined by the external devices and telephone subscriber services you have on the same line as the Brother machine.</p> <p>See <i>Related Information: Choose the Correct Receive Mode</i>.</p> <ul style="list-style-type: none"> • If you have a dedicated fax line and want your Brother machine to automatically answer all incoming faxes, you should select Fax only mode. • If your Brother machine shares a line with an external answering machine, you should select the External TAD mode. In External TAD mode, your Brother machine will receive incoming faxes automatically and voice callers will be able to leave a message on your answering machine. • If your Brother machine shares the line with a Voice Mail subscriber service, see <i>Related Information: Voice Mail</i>. • If your Brother machine is on a line with the Distinctive Ring subscriber service, see <i>Related Information: Distinctive Ring</i>. • If your Brother machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the Fax/Tel mode. In Fax/Tel mode, your Brother machine will receive faxes automatically and produce a pseudo/double-ring to alert you to answer voice calls. • If you do not want your Brother machine to answer any incoming faxes automatically, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes.
	<p>Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the Ring Delay setting:</p> <ul style="list-style-type: none"> • If the Receive Mode is set to Fax Only or Fax/Tel, reduce the Ring Delay to one ring. <p>See <i>Related Information: Set the Number of Rings Before the Machine Answers (Ring Delay)</i>.</p> <ul style="list-style-type: none"> • If the Receive Mode is set to External TAD, reduce the number of rings programmed on your answering machine to two. • If the Receive Mode is set to Manual, DO NOT adjust the Ring Delay setting.
	<p>Have someone send you a test fax:</p> <ul style="list-style-type: none"> • If you received the test fax successfully, your machine is operating correctly. Remember to reset your Ring Delay or answering machine setting back to your original setting. If receiving problems recur after resetting the Ring Delay,

Difficulties	Suggestions
	<p>then a person, device, or subscriber service is answering the fax call before the machine has a chance to answer.</p> <ul style="list-style-type: none"> If you were not able to receive the fax, then another device or subscriber service may be interfering with your fax reception or there may be a problem with your fax line.
	<p>If you are using a telephone answering machine (External TAD mode) on the same line as the Brother machine, make sure your answering machine is set up correctly.</p> <p>See <i>Related Information: Connect an External TAD.</i></p> <ol style="list-style-type: none"> Plug the telephone line cord directly from the telephone wall jack to your Brother machine's LINE jack. Remove the protective cap from your Brother machine's EXT jack, and then plug the telephone line cord from your answering machine into the EXT jack. Set your answering machine to answer within four rings. <p>If you are having problems receiving faxes or voice messages, set your answering machine to answer within two or three rings.</p> <ol style="list-style-type: none"> Record the outgoing message on your answering machine. <ul style="list-style-type: none"> Record five seconds of silence at the beginning of your outgoing message. Limit your speaking to 20 seconds. End your outgoing message with your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press *51 and Start to send a fax." Set your answering machine to answer calls. Set your Brother machine's Receive Mode to External TAD. <p>See <i>Related Information: Choose the Correct Receive Mode.</i></p>
	<p>Make sure your Brother machine's Easy Receive feature is turned On. Easy Receive is a feature that allows you to receive a fax even if you answered the call on an external or extension telephone.</p> <p>See <i>Related Information: Set Easy Receive.</i></p>
	<p>If you often get transmission errors due to possible interference on the telephone line or if you are using a VoIP system, try changing the Compatibility setting to <i>Basic (for VoIP)</i>.</p> <p>See <i>Related Information: Telephone Line Interference/VoIP.</i></p>

Sending Faxes

Difficulties	Suggestions
Cannot send a fax.	<p>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL, VoIP, or magicJack services, call your service provider for connection instructions.</p> <p>If you are using a VoIP system, try changing the VoIP setting to <i>Basic (for VoIP)</i>. This will lower modem speed and turn off Error Correction Mode (ECM).</p> <p>See <i>Related Information: Telephone Line Interference/VoIP.</i></p>
	<p>Print the Transmission Verification Report and check for an error.</p> <p>See <i>Related Information: Print Reports.</i></p>
	<p>Ask the other party to check that the receiving machine has paper.</p>
Poor sending quality.	<p>Try changing your resolution to Fine or S.Fine. Make a copy to check your machine's scanner operation. If the copy quality is poor, clean the scanner.</p> <p>See <i>Related Information: Clean the Scanner.</i></p>
Transmission Verification Report says RESULT:NG.	<p>There is probably temporary noise or static on the line. Try sending the fax again. If you are sending a PC-Fax message and get RESULT:NG on the Transmission</p>

Difficulties	Suggestions
	<p>Verification Report, your machine may be out of memory. If the problem continues, ask the telephone company to check your telephone line.</p> <p>See <i>Related Information: Print a Fax Stored in the Machine's Memory.</i></p> <p>See <i>Related Information: Cancel a Fax in Progress.</i></p> <p>See <i>Related Information: Check and Cancel a Pending Fax.</i></p>
	<p>If you often get transmission errors due to possible interference on the telephone line or if you are using a VoIP system, try changing the Compatibility setting to Basic (for VoIP).</p> <p>See <i>Related Information: Telephone Line Interference/VoIP.</i></p>
Sent faxes are blank.	<p>Make sure you are loading the document correctly.</p> <p>See <i>Related Information: Load Documents in the Automatic Document Feeder (ADF).</i></p> <p>See <i>Related Information: Load Documents on the Scanner Glass.</i></p>
Vertical black lines when sending.	<p>Black vertical lines on faxes you send are typically caused by dirt or correction fluid on the glass strip. Clean the glass strip.</p> <p>See <i>Related Information: Clean the Scanner.</i></p>

Set Dial Tone Detection

Related Models: MFC-T920DW/MFC-T925DW

Setting the Dial Tone to [Detection] will shorten the Dial Tone detect pause.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to make your selections:
 - a. Select [Initial Setup]. Press **OK**.
 - b. Select [Dial Tone]. Press **OK**.
 - c. Select [Detection] or [No Detection]. Press **OK**.
3. Press **Detener/Salir (Stop/Exit)**.

Related Information

- [Telephone and Fax Problems](#)

Telephone Line Interference/VoIP

Related Models: MFC-T920DW/MFC-T925DW

If you are having problems sending or receiving a fax due to possible interference on the telephone line or if you are using a VoIP system, we recommend changing the modem speed to minimize errors in fax operations.

1. Press **Ajustes (Settings)**.
2. Press **▲** or **▼** to make your selections:
 - a. Select [Initial Setup]. Press **OK**.
 - b. Select [Compatibility]. Press **OK**.
 - c. Select [Normal] or [Basic (for VoIP)]. Press **OK**.
 - [Basic (for VoIP)] reduces the modem speed to 9,600 bps and turns off Error Correction Mode (ECM). Unless interference is a recurring problem on your telephone line, you may prefer to use it only when needed.
To improve compatibility with most VoIP services, Brother recommends changing the compatibility setting to [Basic (for VoIP)].
 - [Normal] sets the modem speed at 14,400 bps.
3. Press **Detener/Salir (Stop/Exit)**.

VoIP (Voice over IP) is a type of phone system that uses an Internet connection, rather than a traditional phone line.

Network Problems

- [Use the Network Connection Repair Tool \(Windows\)](#)
- [Check the Brother Machine's Network Settings](#)
- [If You Are Having Difficulty with Your Machine's Network](#)

Use the Network Connection Repair Tool (Windows)

Use the Network Connection Repair Tool to fix the Brother machine's network settings. It will assign the correct IP address and Subnet Mask.

Make sure your machine is turned on and is connected to the same network as your computer.

1. Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected).
2. Click **Tools** in the left navigation bar, and then click **Network Connection Repair Tool**.
3. Follow the on-screen instructions.
4. Check the diagnosis by printing the Network Configuration Report.

The Network Connection Repair Tool will start automatically if you select the **Enable Connection Repair Tool** option in the Status Monitor. Right-click the Status Monitor screen, and then click **Other Settings > Enable Connection Repair Tool**. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

I Cannot Complete the Wireless Network Setup Configuration

Turn your wireless router off and back on. Then, try to configure the wireless settings again. If you are unable to resolve the problem, follow the instructions below:

Investigate the problem using the WLAN Report.

Cause	Action	Interface
Your security settings (SSID/ Network Key) are not correct.	<p>Confirm the security settings using Wireless Setup Helper. For more information and to download the utility, go to your model's Downloads page at support.brother.com.</p> <p>Select and confirm that you are using the correct security settings.</p> <ul style="list-style-type: none"> - See the instructions supplied with your wireless LAN access point/router for information on how to find the security settings. - The manufacturer's name or model number of the wireless LAN access point/router may be used as the default security settings. - Consult with the access point/router manufacturer, your Internet provider, or network administrator. 	Wireless
Your Brother machine's MAC address is not allowed.	<p>Confirm that the Brother machine's MAC Address is allowed in the filter. You can find the MAC Address on your Brother machine's control panel.</p>	Wireless
Your wireless LAN access point/router is in stealth mode (not broadcasting the SSID).	<ul style="list-style-type: none"> • Enter the correct SSID name or Network Key manually. • Check the SSID name or the Network Key in the instructions supplied with your wireless LAN access point/router and reconfigure the wireless network setup. 	Wireless
Your security settings (SSID/ password) are not correct.	<p>Confirm the SSID and password.</p> <p>When you are configuring the network manually, the SSID and password are displayed on your Brother machine. If your mobile device supports the manual configuration, the SSID and password will be displayed on your mobile device's screen.</p>	Wi-Fi Direct
You are using Android™ 4.0.	<p>If your mobile device disconnects (approximately six minutes after using Wi-Fi Direct), try the one-push configuration using WPS (recommended) and set the Brother machine as a Group Owner.</p>	Wi-Fi Direct
Your Brother machine is placed too far from your mobile device.	<p>Move your Brother machine within about 3.3 feet (1 meter) of the mobile device when you configure the Wi-Fi Direct network settings.</p>	Wi-Fi Direct
There are some obstructions (walls or furniture, for example) between your machine and the mobile device.	<p>Move your Brother machine to an obstruction-free area.</p>	Wi-Fi Direct

Cause	Action	Interface
There is a wireless computer, Bluetooth®-supported device, microwave oven, or digital cordless phone near the Brother machine or the mobile device.	Move other devices away from the Brother machine or the mobile device.	Wi-Fi Direct
You have checked and tried all of the above, but your Brother machine still cannot complete the Wi-Fi Direct configuration.	<ul style="list-style-type: none"> Turn your Brother machine off and back on. Then, try to configure the Wi-Fi Direct settings again. If you are using your Brother machine as a client, confirm how many devices are allowed in the current Wi-Fi Direct network, and then check how many devices are connected. 	Wi-Fi Direct

For Windows

If your wireless connection has been interrupted, and you have checked and tried all of the above, we recommend using the Network Connection Repair Tool.

My Brother Machine Cannot Print, Scan, or PC-FAX Receive over the Network

Cause	Action	Interface
Your security software blocks your machine's access to the network. (The Network scanning feature does not work.)	<ul style="list-style-type: none"> Windows Configure the third-party Security/Firewall Software to allow Network scanning. To add port 54925 for Network scanning, type the information below: <ul style="list-style-type: none"> In Name: Type any description, for example Brother NetScan. In Port number: Type 54925. Type 137. Type 161. In Protocol: UDP is selected. See the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer. Mac (Brother iPrint&Scan) In the Finder menu bar, click Go > Applications, and then double-click the Brother iPrint&Scan icon. The Brother iPrint&Scan window appears. Click the Select your Machine button, and then follow the on-screen instructions to reselect your network machine. 	Wired/Wireless
Your security software blocks your machine's access to the network. (The network PC-Fax Receive feature does not work.) (Windows)	Set the third-party Security/Firewall Software to allow PC-FAX Rx. To add port 54926 for Network PC-FAX Rx, type the information below: <ul style="list-style-type: none"> In Name: Type any description, for example Brother PC-FAX Rx. In Port number: Type 54926. In Protocol: UDP is selected. See the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer.	Wired/Wireless
Your security software blocks your machine's access to the network.	Some security software might block access without showing a security alert dialog box even after successful installation. To allow access, see the instructions for your security software or ask the software manufacturer.	Wired/Wireless

Cause	Action	Interface
Your Brother machine was not assigned an available IP address.	<ul style="list-style-type: none"> Confirm the IP address and the Subnet Mask. Verify that both the IP addresses and Subnet Masks of your computer and the Brother machine are correct and located on the same network. For more information about how to verify the IP address and the Subnet Mask, ask your network administrator. Windows Confirm the IP address and the Subnet Mask using the Network Connection Repair Tool. Mac Check your network devices using the ping command. For more information on how to confirm your network settings, see <i>Related Information: Check Network Devices Using the Ping Command</i>. 	Wired/Wireless
The failed print job is still in your computer's print queue.	<ul style="list-style-type: none"> If the failed print job is still in your computer's print queue, delete it. Otherwise, double-click the printer icon in the following folder and cancel all documents: <ul style="list-style-type: none"> Windows 10, Windows Server 2016, and Windows Server 2019 Click  > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers. Windows 8.1 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware and Sound group, click View devices and printers. Windows Server 2012 R2 Click Control Panel on the Start screen. In the Hardware group, click View devices and printers. Windows Server 2012 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers > Printers. Windows 7 Click  (Start) > Devices and Printers. Windows Server 2008 Click Start > Control Panel > Printers. Mac Click System Preferences > Printers & Scanners. 	Wired/Wireless
Your Brother machine is not connected to the wireless network.	Print the WLAN Report to check the error code on the printed report.	Wireless

If you have checked and tried all of the above, but your Brother machine still cannot print and scan, uninstall the drivers (Windows) and the Brother software and reinstall the latest version of both.

I Want to Check that My Network Devices are Working Correctly

Check	Action	Interface
Check that your Brother machine, access point/router, or network hub is turned on.	<p>Check the following:</p> <ul style="list-style-type: none"> The power cord is connected correctly and the Brother machine is turned on. The access point/router or hub is turned on and its link indicator is blinking. 	Wired/Wireless

Check	Action	Interface
	<ul style="list-style-type: none"> • All protective packaging has been removed from the machine. • The Scanner Cover and the Jam Clear Cover are fully closed. • Paper is inserted correctly in the paper tray. • (For wired networks) A network cable is securely connected to the Brother machine and to the router or hub. 	
Check that you can "ping" the Brother machine from your computer.	<p>Ping the Brother machine from your computer using the IP address or the node name in the Windows command prompt or Mac Terminal application:</p> <pre>ping <ipaddress> or <nodename>.</pre> <ul style="list-style-type: none"> • Successful: Your Brother machine is working correctly and connected to the same network as your computer. • Unsuccessful: Your Brother machine is not connected to the same network as your computer. <p>Windows: Ask your administrator about the IP address and the subnet mask, and then use the Network Connection Repair Tool.</p> <p>Mac: Confirm that the IP address and the Subnet Mask are set correctly.</p>	Wired/Wireless
Check that your Brother machine is connected to the wireless network.	Print the WLAN Report to check the error code on the printed report.	Wireless

If you have checked and tried all of the above but you are still having problems, see the instructions supplied with your wireless LAN access point/router to find the SSID (Network Name) and the Network Key (Password) information and set them correctly.

- [Use Wi-Fi Direct®](#)

Check Network Devices Using the Ping Command

Check the IP addresses of both your computer and your Brother machine, and then confirm whether the network is operating correctly.

- >> [Configure the IP Address on your computer \(Windows\)](#)
- >> [Configure the IP Address on your computer \(Mac\)](#)
- >> [Configure the IP Address on your Brother machine](#)

Configure the IP Address on your computer (Windows)

- Do one of the following:
 - Windows 10
Click  > **Windows System** > **Command Prompt**.
 - Windows 8.1
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Search** > **Command Prompt**.
 - Windows7
Click  (Start) > **All Programs** > **Accessories** > **Command Prompt**.
- Type "ipconfig" and then press the Enter key on your keyboard.
- Confirm the values for the IPv4 address and subnet mask.
- Type "exit" and then press the Enter key on your keyboard.

Configure the IP Address on your computer (Mac)

- Select **System Preferences** from the Apple menu.
- Click **Network** > **Advanced** > **TCP/IP**.
- Confirm the values for the IPv4 address and subnet mask.

Configure the IP Address on your Brother machine

Print the Network Configuration Report, and confirm the values for the IP address and subnet mask.

```
<IP Settings >
IP Address      192.168.11.250      (set manually)
Subnet Mask    255.255.255.0
IP Gateway     192.168.100.200
Boot Method    STATIC
Boot Tries     3
IP Filter      Disabled
```

Check the IP addresses for both your computer and your Brother machine. Confirm that the network address portions are the same. For example, if the subnet mask is "255.255.255.0", it is normal for only the host address portions to be different.

	Network Address	Host Address	
IP Address	192.168.100.	250	Set the final number, which corresponds to "0" in the subnet mask, to 1–254.
Subnet Mask	255.255.255.	0	Usually, there are no problems when the subnet mask is "255.255.255.0". Use the same value for all of your computers.

Reset Functions Overview

IMPORTANT

(MFC-T920DW/MFC-T925DW)

When you reset the machine, your faxes that are stored in the machine's memory may be deleted. Before you reset the machine, you can transfer your faxes to your computer or another fax machine so you will not lose any important messages.

The following reset functions are available:

1. [Machine Reset]

You can reset all the machine's settings that you have changed.

The Address Book, Fax Reports, and Call History will remain. (MFC models)

2. [Network]

Reset the print server back to its default factory settings (includes Password and IP Address information).

3. [Address Book & Fax] (MFC models)

Address Book & Fax resets the following settings:

- Address Book and Setup Groups
- Station ID
Name and Number
- Report
Transmission Verification Report, Address Book and Fax Journal
- History
Caller ID History and Outgoing Call
- Faxes in memory

4. [All Settings]

Use this reset function to reset all of the machine's settings to the settings originally set at the factory.

We strongly recommend you perform this operation when you dispose of the machine.

(DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW)

Unplug the interface cable before you select [Network] or [All Settings].

Routine Maintenance

- [Refill the Ink Tanks](#)
- [Clean Your Brother Machine](#)
- [Check Your Brother Machine](#)
- [Correct the Paper Feed to Clear Vertical Lines](#)
- [Change the Print Options to Improve Your Print Results](#)
- [Pack and Ship Your Brother Machine](#)

Refill the Ink Tanks

Make sure to confirm the actual amount of remaining ink visually by looking through the window (1) of the ink tank. If the remaining ink level is at or below the lower line (2) under the minimum fill mark, refill the ink tank.

The ink below the lower line is necessary to prevent air from drying out and damaging the print head assembly. Refill the ink tank when the remaining ink level is at or below the lower line.

CAUTION

If ink gets into your eyes, rinse them with water immediately. If left as it is, it may cause red eye or mild inflammation. In case of any abnormality, consult your doctor.

IMPORTANT

- We recommend using genuine Brother supplies to ensure stable print quality and performance. Although not all non-genuine supplies may cause quality issues, it is possible that some may adversely affect print quality or cause machine malfunction. Brother may charge for repairing your machine if it is proven that non-genuine supplies caused the damage, even if the machine is still covered by the warranty.
- Check the ink bottle model name on the label. Using the incorrect ink may cause damage to the machine.

1. Open the ink tank cover (1).

2. Remove the ink tank cap for the color you want to refill, and place it on the back of the cover, as shown.

NOTE

Be careful to avoid touching any ink when handling the ink tank cap.

3. Remove the ink bottle cap, remove the film from the ink bottle, and then replace the cap.

IMPORTANT

- Replace the ink bottle cap tightly. Otherwise, the ink may leak.
- DO NOT shake the ink bottles. If ink stains your skin or clothing, wash with soap or detergent at once.

4. Remove the nozzle cap, as shown.

5. Make sure that the color of the ink tank cap matches the ink color you want to refill.

Keep the nozzle close to the ink tank opening and insert the bottle nozzle firmly into the ink tank so that the ink does not spill.

To fill the ink tank faster, insert the bottle nozzle firmly into the ink tank so that the arrow mark shown on the ink bottle in the illustration is up.

6. The bottle is self-standing, and the ink fills automatically until the bottle is empty or until the ink reaches the maximum fill mark line.

To fill the ink tank faster, squeeze the bottle on both sides.

IMPORTANT

Be careful not to fill the ink past the upper line above the maximum fill mark.

NOTE

- Be careful not to spill any ink when you refill the ink tank.
- Refill with all of the ink in the bottle, if it does not exceed the upper line.

7. Keep the nozzle close to the ink tank opening and turn the nozzle up and remove the bottle from the ink tank so that the ink does not spill.

8. Replace the nozzle cap.

NOTE

- If any ink remains in the ink bottle, seal the cap tightly and store the ink bottle upright on a level surface in a cool, dark place.
- Avoid tilting the ink bottle or storing it on its side; it may leak.

9. Reattach the ink tank cap.

10. Repeat these steps for each ink tank you want to refill.

11. Close the ink tank cover.

When you open and close the ink tank cover, a message may appear on the LCD to verify whether the ink tanks were refilled.

- If you refilled the ink tanks, select [Yes] to reset the ink dot counter for the refilled colors.
- If you did not refill the ink tank, be sure to select [No].

IMPORTANT

- If you accidentally mix the colors by filling the wrong ink tank, call Brother Customer Service.

-
- If you have opened an ink bottle, use it within six months. Use unopened ink bottles by the expiration date written on the bottle package.
-

- [Clean the Base Pad](#)
- [Clean the Paper Pick-up Rollers](#)

Clean the Scanner

1. Unplug the machine from the AC power outlet.
2. Lift the document cover (1). Clean the scanner glass (2) and the white plastic (3) with a soft lint-free cloth moistened with water.

3. In the ADF unit, clean the white bar (1) and the glass strip (2) with a lint-free cloth moistened with water. (ADF models only)

(ADF models only)

If you feel dirt or debris, clean the glass again. You may need to repeat the cleaning process three or four times. To test, make a copy after each cleaning attempt.

When there is a spot of dirt or correction fluid on the glass strip, the printed sample shows a vertical line.

After the glass strip is cleaned, the vertical line is gone.

Clean the Print Head from Your Brother Machine

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

- Clean the print head if there is a horizontal line or a blank space in the text or graphics on printed pages. Depending on the problem color, select to clean Black only, three colors at a time (Yellow/Cyan/Magenta), or all four colors at once.
- Cleaning the print head consumes ink.
- Cleaning too often uses ink unnecessarily.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

-

Clean the Print Head Using Web Based Management

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

1. Start Brother iPrint&Scan.

- Windows

Launch  (Brother iPrint&Scan).

- Mac

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.

3. Click  (**Machine Settings**) to configure the settings.

4. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

5. Go to the navigation menu, and then click **General > Print Head Cleaning**.

Start from , if the navigation menu is not shown on the left side of the screen.

6. Select the **Normal**, **Strong**, or **Strongest** option for the cleaning strength you want. The **Special** option uses the most power in cleaning the print heads, but also consumes the most ink.

7. Click **Start**.

-
- The **Special** option requires a large amount of ink to clean the print head. Refill all ink tank levels to more than half before starting the print head cleaning.
 - Use the **Special** option only if you previously used the **Strongest** option and the print quality did not improve.
 - If you start the cleaning with low ink amount, it may cause damage to the machine. Check each ink tank level before starting the cleaning and refill each ink tank as necessary.
-

8. Click **Yes**.

The machine starts cleaning.

(Windows) You can also clean the print head using the printer driver.

Clean the Print Head from Your Computer (Windows)

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

1. Do one of the following:

- For Windows 10, Windows Server 2016, and Windows Server 2019

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.

- For Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.

- For Windows Server 2012 R2

Click **Control Panel** on the **Start** screen. In the **Hardware** group, click **View devices and printers**.

- For Windows Server 2012

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.

- For Windows 7 and Windows Server 2008 R2

Click  (**Start**) > **Devices and Printers**.

- For Windows Server 2008

Click  (**Start**) > **Control Panel** > **Hardware and Sound** > **Printers**.

2. Right-click the **Brother XXX-XXXX Printer** icon (where XXX-XXXX is the name of your model), and then select **Printing preferences**. If printer driver options appear, select your printer driver.

The printer driver dialog box appears.

3. Click the **Maintenance** tab.

4. Select one of the following options:

Option	Description
Check Print Quality...	Use to print the test page and check the print quality.
Print Head Cleaning...	Use to start the cleaning process manually. Select if a line or blank spaces appear in text or graphics on the test page.

5. Do one of the following:

- If you selected the **Check Print Quality...** option, click **Start**.

The machine prints the test page.

- If you selected the **Print Head Cleaning...** option, select the **Black only**, **Color only**, or **All** option for the cleaning type, and then click **Next**.

6. Select the **Normal**, **Strong**, or **Strongest** option for the cleaning strength, and then click **Next**.

7. Click **Start**.

The machine starts cleaning.

If you start the cleaning with low ink amount, it may cause damage to the machine. Check each ink tank level before starting the cleaning and refill each ink tank as necessary.

Clean the Machine's Printer Platen

WARNING

 Be sure to unplug the machine from the AC power outlet before cleaning the printer platen to avoid an electrical shock.

1. Using both hands, use the finger holds on each side of the machine to lift the scanner cover into the open position.
2. Clean the machine's printer platen (1) and the area around it, wiping off scattered ink with a dry, soft lint-free cloth.

IMPORTANT

DO NOT touch the encoder strip, the thin strip of plastic that stretches across the width of the machine (2). Doing this may cause damage to the machine.

3. Gently close the scanner cover using both hands.

4. Reconnect the power cord.

Clean the Paper Feed Rollers

If the paper feed rollers are stained with ink or have a buildup of paper dust, it may cause paper feed problems.

1. Unplug the machine from the AC power outlet.
2. If the paper support flap is open, close it, and then close the paper support.
3. Pull the paper tray (1) completely out of the machine.

4. Clean the front side of the Paper Feed Rollers (1) with a soft lint-free cloth moistened with water, using a side-to-side motion. After cleaning, wipe the rollers with a dry, soft lint-free cloth to remove all moisture.

5. (DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW/MFC-T920DW/MFC-T925DW) Lift the flap (2), and then clean the back side of the Paper Feed Rollers (1) with a soft lint-free cloth moistened with water. After cleaning, wipe the rollers with a dry, soft lint-free cloth to remove all moisture.

6. Slowly push the paper tray completely into the machine.
7. Reconnect the power cord.

Do not use the machine again until the rollers are dry. Using the machine before the rollers are dry may cause paper feed problems.

DCP-T520W/DCP-T525W/DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

1. Press **Menú (Menu)**.
2. Press **▲** or **▼** to make your selections:
 - a. Select [Maintenance]. Press **OK**.
 - b. Select [ImproveQuality]. Press **OK**.
 - c. Select [Check Quality]. Press **OK**.
3. Press **Inicio Color (Color Start)**.

The machine prints the Print Quality Check Sheet.
4. Check the quality of the four color blocks on the sheet.
5. When an LCD message prompts you to check the print quality, do one of the following:
 - If all lines are clear and visible, press **▲** to select [Yes].

Press **Detener/Salir (Stop/Exit)** to finish the Print Quality check.
 - If lines are missing (see **Poor**, below), press **▼** to select [No].

OK (DCP-T520W/DCP-T525W)

Poor (DCP-T520W/DCP-T525W)

OK (DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW)

Poor (DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW)

6. When the LCD message prompts you to check the print quality of each color, press **▲** or **▼** to select the pattern that most closely matches the printing result. Press **OK**.

Refer to the sample below to check the print quality.

DCP-T520W/DCP-T525W

Patterns				
Print Quality	None	A Few	About Half	Many

DCP-T720DW/DCP-T725DW/DCP-T820DW/DCP-T825DW

Patterns				
Print Quality	None	A Few	About Half	Many

7. Do one of the following:
 - If print head cleaning is needed, press **Inicio Color (Color Start)** to start the cleaning procedure.
 - If print head cleaning is not needed, press **Detener/Salir (Stop/Exit)** to finish the Print Quality check.
8. After the cleaning procedure is finished, press **▲**. Then, press **Inicio Color (Color Start)**.
The machine prints the Print Quality Check Sheet again. Check the quality of the four color blocks on the sheet again.

If you clean the print head several times and the print has not improved, try the Special cleaning method. See *Related Information*.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

When a print head nozzle is clogged, the printed sample looks like this:

After the print head nozzle is cleaned, the horizontal lines are gone:

MFC-T920DW/MFC-T925DW

1. Press **▲** (Ink).
2. Press **▲** or **▼** to make your selections:
 - a. Select [Impr. PrintQuality]. Press **OK**.
 - b. Select [Impr. PrintQuality] again. Press **OK**.

3. Press ►.

The machine prints the Print Quality Check Sheet.

4. Check the quality of the four color blocks on the sheet.

5. When an LCD message prompts you to check the print quality, do one of the following:

- If all lines are clear and visible, press ◀ to select [No].

The Print Quality check finishes.

- If lines are missing (see **Poor**, below), press ► to select [Yes].

OK

Poor

6. When the LCD message prompts you to check the print quality of each color, press ◀ or ► to select the pattern (1–4) that most closely matches the printing result. Press **OK**.

7. Do one of the following:

- If print head cleaning is needed, press ► to start the cleaning procedure.
- If print head cleaning is not needed, the menu screen reappears on the LCD.

8. After the cleaning procedure is finished, the LCD message prompts you to check the print quality again.

Press ► [Yes] to start the print quality check.

9. Press ► again.

The machine prints the Print Quality Check Sheet again. Check the quality of the four color blocks on the sheet again.

If you clean the print head several times and the print has not improved, try the Special cleaning method. See *Related Information*.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

Pack and Ship Your Brother Machine

- When you transport the machine, use the packing materials that came with your machine. Do not tip or turn the product upside down. If you do not pack the machine correctly, any damage that may occur in transit may not be covered by your warranty.
- The machine should be adequately insured with the carrier.

IMPORTANT

It is important to allow the machine to “park” the print head after a print job. Listen carefully to the machine before unplugging it to make sure that all mechanical noises have stopped. Not allowing the machine to finish this parking process may lead to print problems and possible damage to the print head.

1. Unplug the machine from the AC power outlet.
2. (MFC-T920DW/MFC-T925DW) Unplug the machine from the telephone wall jack and take the telephone line cord out of the machine.
3. Using both hands, use the finger holds on each side of the machine to lift the scanner cover into the open position.
4. Unplug the interface cable from the machine, if it is connected.
5. Gently close the scanner cover using the finger holds on each side.

6. Open the ink tank cover.
7. Make sure the ink tank caps are installed correctly.
Push down on the ink tank caps to secure them tightly and then close the ink tank cover.

8. Wrap the machine in the bag.

-
9. Pack the machine in the original carton with the original packing material as shown below.
Do not pack the used ink bottles in the carton.

If you are returning your machine to Brother as part of the Exchange Service, pack only the machine. Keep all separate parts and printed materials to use with your “Exchange” machine.

10. Close the carton and tape it shut.

	Clock Type (USA and Canada only)	Select the time format (12-hour or 24-hour).
	Auto Daylight (USA and Canada only)	Set the machine to change automatically for Daylight Saving Time.
Station ID	Fax	Enter your name and fax number so it appears on each page you fax.
	Name	
Tone/Pulse (Available only for some countries.)	-	Select the dialing mode.
Fax Auto Redial	-	Set the machine to redial the last fax number if the fax did not go through because the line was busy.
Dial Tone	-	Shorten the dial tone detect pause.
Compatibility	-	Adjust the equalization for transmission difficulties. VoIP service providers offer fax support using various standards. If you regularly experience fax transmission errors, select Basic (for VoIP).
Reset	Machine Reset	Restore all the machine's settings that you have changed, such as Date and Time.
	Network	Restore all network settings back to the factory settings.
	Address Book & Fax	Erase all stored phone numbers and fax settings.
	All Settings	Restore all the machine's settings back to the factory settings.
Local Language (Available only for some countries.)	-	Change your LCD language.

FAX

Level 1	Level 2	Descriptions
Fax Resolution	-	Set the resolution for outgoing faxes.
Contrast	-	Adjust the contrast.
Glass Scan Size	-	Adjust the scan area of the scanner glass to the size of the document.
Broadcasting	-	Send the same fax message to more than one fax number.
Real Time TX	-	Send a fax without using the memory.
Overseas Mode	-	Set to On if you have difficulty sending faxes overseas.
Call History	Redial	Send a fax to the last number you called.
	Outgoing Call	Select a number from the Outgoing Call history and then send a fax to it, add it to the Address Book, or delete it.
	Caller ID History	Select a number from the Caller ID History and then send a fax to it, add it to the Address Book, or delete it.
Address Book	Search	Dial by pressing only a few buttons.
	Set Speed Dial	Store Speed Dial numbers, so you can dial by pressing only a few buttons.
	Setup Groups	Set up Group numbers for broadcasting.
	Change	Change Address Book numbers.
	Delete	Delete Address Book numbers.
Set New Default	-	Save your settings as the default.
Factory Reset	-	Restore all settings back to the factory settings.

ESCÁNER (SCAN)

Level 1	Level 2	Descriptions
to Media (When a USB Flash drive is inserted)	-	Scan documents and save them directly to a USB flash drive without using a computer.
to PC	to File	Scan documents and save them to a folder on your computer.
	to OCR	Convert your scanned document to an editable text file.
	to Image	Scan photos or graphics into your graphics applications.
	to E-mail	Send a scanned document as an email attachment.
to Web	-	Upload the scanned data to an Internet service.
WS Scan (Appears when you install a Web Services Scanner.)	Scan	Scan data using the Web Service protocol.
	Scan for E-mail	
	Scan for Fax	
	Scan for Print	

COPIA (COPY)

Level 1	Level 2	Descriptions
Quality	-	Select the Copy resolution for your document type.
Tray Select	-	Select the tray to be used for Copy mode.
Paper Type	-	Select the paper type that matches the paper in the tray.
Paper Size	-	Select the paper size that matches the paper in the tray.
Enlarge/Reduce	100%	-
	Enlarge	Select an enlargement ratio for the next copy.
	Reduce	Select a reduction ratio for the next copy.
	Fit to Page	Adjust the copy size to fit on the paper size you have set.
	Custom (25-400%)	Enter an enlargement or reduction ratio.
Density	-	Adjust the density.
Remove Background	Black Copy Settings	Change the amount of background color that is removed.
	Color Copy Settings	
2-sided Copy	-	Turn off or turn on 2-sided copying and select flip on long edge or flip on short edge.
Stack/Sort	-	Select to stack or sort multiple copies.
Page Layout	-	Make N in 1, 2 in 1 ID, or Poster copies.
Set New Default	-	Save your settings as the default.
Factory Reset	-	Restore all settings back to the factory settings.

FOTO/WEB (PHOTO/WEB)

Level 1	Level 2	Level 3	Descriptions
JPEG Print	Select Files	-	Print selected photos in your USB flash drive.
	Index Print	Print Index Sheet	Print a thumbnail page.
		Print Photos	Print photos by choosing the index numbers.
	Print All	-	Print all photos in your USB flash drive.
Web	-	-	Connect the Brother machine to an Internet service.

(Ink)

Level 1	Level 2	Descriptions
Ink Bottle Model	-	Check the ink bottle model numbers.
Impr. PrintQuality	Impr. PrintQuality	Check and correct the print quality, alignment and paper feeding according to the LCD instructions.
	Alignment	
	Correct Paper Feed	
Print Head Cleaning	Black only	Clean the print head according to the LCD instructions.
	Color only	
	All	
Print Options	Reduce Smudging	Reduce smudging on the paper or paper jams during printing.
	Enhance Print	Improve print quality and reduce blurriness.

► 📖 (Address Book)

Level 1	Descriptions
Search	Dial by pressing only a few buttons.
Set Speed Dial	Store Speed Dial numbers, so you can dial by pressing only a few buttons.
Setup Groups	Set up Group numbers for broadcasting.
Change	Change Address Book numbers.
Delete	Delete Address Book numbers.

Remarcar/Pausa (Redial/Pause)

Level 1	Descriptions
Redial	Send a fax to the last number you called.
Outgoing Call	Select a number from the Outgoing Call history and then send a fax to it, add it to the Address Book, or delete it.
Caller ID History	Select a number from the Caller ID History and then send a fax to it, add it to the Address Book, or delete it.

▼ WiFi

Level 1	Descriptions
Find Wi-Fi Network	Configure your wireless network settings manually.
WPS/Push Button	Configure your wireless network settings using the one-button push method.

Change Machine Settings Using Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- [What is Web Based Management?](#)
- [Access Web Based Management](#)
- [Set or Change a Login Password for Web Based Management](#)
- [Set Up Your Machine's Address Book Using Web Based Management](#)

What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- We recommend Microsoft Internet Explorer 11/Microsoft Edge for Windows, Safari 10/11 for Mac, Chrome for Android (4.x or later), and Chrome/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- You must use the TCP/IP protocol on your network and have a valid IP address programmed into the print server and your computer.

XXX-XXXX brother

Estimated Ink Level

M C Y BK

Above ink level might be different from actual remaining ink level. You can confirm the actual amount visually by looking through the window of the ink tank. If the remaining ink level is at or below the lower line under the minimum fill mark, refill the ink tank. The ink below the lower line is necessary to prevent damage to the machine.

Access Web Based Management

- We recommend Microsoft Internet Explorer 11/Microsoft Edge for Windows, Safari 10/11 for Mac, Chrome for Android (4.x or later), and Chrome/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**". We recommend immediately changing the default password to protect your machine from unauthorized access.
- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box. To avoid displaying the warning dialog box, you can install a self-signed certificate to use SSL/TLS communication. For more detailed information, see *Related Information*.

>> [Start from Brother iPrint&Scan \(Windows/Mac\)](#)

>> [Start from Your Web Browser](#)

>> [Start from Brother Utilities \(Windows\)](#)

Start from Brother iPrint&Scan (Windows/Mac)

1. Start Brother iPrint&Scan.
 - Windows
Launch  (**Brother iPrint&Scan**).
 - Mac
In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.
The Brother iPrint&Scan screen appears.
2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.
3. Click  (**Machine Settings**).
Web Based Management appears.
4. If required, type the password in the **Login** field, and then click **Login**.
5. If you want to pin the navigation menu on the left side of the screen, click  and then click .

You can now change the machine settings.

You can also access Web Based Management from Brother iPrint&Scan for mobile devices.

Start from Your Web Browser

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.
4. If you want to pin the navigation menu on the left side of the screen, click ☰ and then click ✖.

You can now change the machine settings.

Start from Brother Utilities (Windows)

1. Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected).
2. Click **Tools** in the left navigation bar, and then click **Machine Settings**.
Web Based Management appears.
3. If required, type the password in the **Login** field, and then click **Login**.
4. If you want to pin the navigation menu on the left side of the screen, click ☰ and then click ✖.

You can now change the machine settings.

If you change the protocol settings, you must restart the machine after clicking **Submit** to activate the configuration.

After configuring the settings, click **Logout**.

Set or Change a Login Password for Web Based Management

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd". We recommend immediately changing the default password to protect your machine from unauthorized access.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. Do one of the following:
 - If you have previously set your own password, type it, and then click **Login**.
 - If you have not previously set your own password, type the default login password, and then click **Login**.
4. Go to the navigation menu, and then click **Administrator > Login Password**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Following the on-screen **Login Password** guidelines, type your password in the **Enter New Password** field.
6. Retype the password in the **Confirm New Password** field.
7. Click **Submit**.

Supply Specifications

Ink	The machine uses individual Black, Yellow, Cyan and Magenta ink tanks that are separate from the print head assembly.
Service Life of Ink Bottle	Starter ink bottles are in the box. The first time you fill the ink tank the machine will use extra ink to fill the ink delivery tubes. This is a one-time process that enables high quality printing. Afterward, replacement ink bottles will print the specified number of pages. Starter bottle yield is approximately 96% of the yield of the BTD60 and 92% of the yield of the BT5001 replacement ink bottles.
Replacement Supplies	<Black Ink Bottle> BTD60BK <Yellow Ink Bottle> BT5001Y <Cyan Ink Bottle> BT5001C <Magenta Ink Bottle> BT5001M Black - Approximately 7500 pages ¹ Yellow, Cyan and Magenta - Approximately 5000 pages ¹

¹ Quoted approx. yields are extrapolated based on Brother original methodology using Test Patterns ISO/IEC 24712.
Quoted approx. yields are not based on ISO/IEC 24711.
