Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

 WARNING	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.
 CAUTION	CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.
IMPORTANT	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
NOTE	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
	Electrical Hazard icons alert you to possible electrical shock.
Bold	Bold style identifies buttons on the machine's control panel or computer screen.
<i>Italics</i>	Italicised style emphasises an important point or refers you to a related topic.
Courier New	Courier New font identifies messages shown on the machine's LCD.

Before Using Your Machine

Before attempting any printing operation, confirm the following:

- Make sure you have installed the correct software and drivers for your machine.
- For USB or network cable users: Make sure the interface cable is physically secure.

Selecting the correct type of paper

For high quality printing, it is important to select the correct type of paper. Be sure to read the information about acceptable paper before buying paper, and to determine the printable area depending on the settings in the printer driver or in the application you use to print.

Firewall (Windows)

If your computer is protected by a firewall and you are unable to network print, you may need to configure the firewall settings. If you are using the Windows Firewall and you installed the drivers using the steps in the installer, the necessary firewall settings have been already set. If you are using any other personal firewall software, see the User's Guide for your software or contact the software manufacturer.

Control Panel Overview

1. NFC (Near Field Communication) symbol

You can use card authentication by touching the IC card to the NFC symbol on the control panel.

2. Touchscreen Liquid Crystal Display (LCD)

Access menus and options by pressing them on the touchscreen.

3. Menu Buttons

(Back)

Press to go back to the previous menu.

(Home)

Press to return to the Home screen.

(Cancel)

Press to cancel an operation.

4. LED Power Indicator

The LED lights up depending on the machine's power status.

When the machine is in Sleep Mode, the LED blinks.

5. Power On/Off

Press  to turn the machine on.

Press and hold  to turn the machine off. The touchscreen displays [Shutting Down] and stays on for a few seconds before turning itself off.

If you turn the machine off using , it will still clean the print head periodically to maintain print quality. To prolong print head life, provide better ink efficiency, and maintain print quality, keep your machine connected to a power source at all times.

Touchscreen LCD Overview

Using your finger, press ◀▶ or ▲▼ on the LCD to display and access the machine options.

From the Home screen, you can access the various settings.

Home Screen

This screen shows the machine's status when the machine is idle. When displayed, it indicates that your machine is ready for the next command.

1.  **Quiet Mode**

This icon appears when the [Quiet Mode] setting is set to [On].

The Quiet Mode setting can reduce printing noise. When Quiet Mode is turned on, the print speed becomes slower.

2.  **[Secure Print]**

Press to access the [Secure Print] menu.

3.  **[Ink]**

Press to access the [Ink] menu.

4.  **Wireless Status**

Each icon in the following table shows the wireless network status:

	<ul style="list-style-type: none"> Your machine is not connected to the wireless access point/router. Press this button to configure wireless settings. For more detailed information, see the <i>Quick Setup Guide</i>. The wireless setting is disabled.
	<p>The wireless network is connected.</p> <p>A three-level indicator in the Home screen displays the current wireless signal strength.</p>
	<p>The wireless access point/router cannot be detected.</p>

 You can configure wireless settings by pressing the Wireless Status button.

5.  **[Settings]**

Press to access the [Settings] menu.

6.  **[Functions]**

Press to access the [Functions] menu.

[Web] / [USB] / [Download Software] / [Print Head Cleaning]

7. Information icon

New information from Brother appears in the information bar when the notification settings such as [Message from Brother] and [Firmware Auto Check] are set to [On].

(An internet connection is needed, and data rates may apply.)

Press  to view the details.

8. Warning icon

The warning icon  appears when there is an error or maintenance message; press  to view the details, and then press  to return to the Home screen.

IMPORTANT

DO NOT press the LCD with a sharp object such as a pen or stylus. It may damage the machine.

NOTE

DO NOT touch the LCD immediately after plugging in the power cord or turning on the machine. Doing this may cause an error.

This product adopts the font of ARPHIC TECHNOLOGY CO., LTD.

Settings Screen Overview

The touchscreen shows the machine's status when you press  [Settings].

Use the Settings menu to access all of your Brother machine's settings.

1. [Maintenance]

Press to access the following menus:

- [Improve Print Quality]
- [Print Head Cleaning]
- [Remove Paper Scraps]
- [Ink Volume]
- [Ink Cartridge Model]
- [Print Options]
- [Ink Cartridge Check]
- [Print Quality Auto Check]

2. [Date & Time]

Displays the date and time.

Press to access the [Date & Time] menu.

3. [Network]

Press to set up a network connection.

If you are using a wireless connection, a three-level indicator  on the screen displays the current wireless signal strength.

4. [Wi-Fi Direct]

Press to set up a Wi-Fi Direct network connection.

5. [All Settings]

Press to access a menu of all of your machine's settings.

6. [Quiet Mode]

Displays the Quiet Mode setting.

Press to access the [Quiet Mode] menu.

When this menu is set to [On],  is displayed on the Home screen.

7. [Tray Setting]

Press to access the [Tray Setting] menu.

Use these options to change the paper size and type.

Access Brother Utilities (Windows)

Brother Utilities is an application launcher that offers convenient access to all Brother applications installed on your computer.

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Select your machine.

3. Select the operation you want to use.

Related Information

- [Introduction to Your Machine](#)
 - [Uninstall the Brother Software and Drivers \(Windows\)](#)

Uninstall the Brother Software and Drivers (Windows)

1. Do one of the following:

- Windows 10

Click  > **Brother** > **Brother Utilities**.

- Windows 8.1

Move your mouse to the lower left corner of the **Start** screen and click  (if using a touch-based device, swipe up from the bottom of the **Start** screen to bring up the **Apps** screen).

When the **Apps** screen appears, tap or click  (**Brother Utilities**).

- Windows 7

Click  (**Start**) > **All Programs** > **Brother** > **Brother Utilities**.

2. Click the drop-down list, and then select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Uninstall**.

Follow the instructions in the dialog box to uninstall the software and drivers.

Related Information

USB / Ethernet Port Locations on Your Brother Machine

The USB and Ethernet ports are located inside the machine.

To install the driver and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

1. Using both hands, use the finger holds on each side of the machine to lift the top cover (1) into the open position.

2. Locate the correct port (based on the cable you are using) inside the machine as shown.

 Carefully guide the cable through the cable channel and out the back of the machine.

3. Gently close the top cover using the finger holds on each side.

Loading Paper Overview

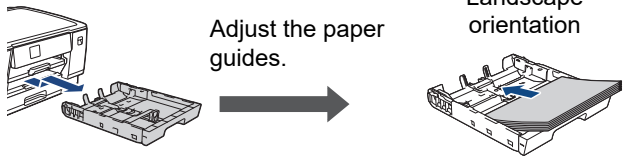

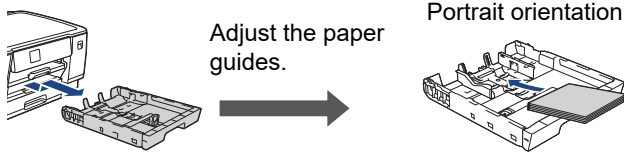

1. Load the paper in the paper tray as follows.

 Fan the stack of paper well.

The paper size determines the orientation when loading paper.

Paper Tray

Tray #1	Tray #2	How to Load Paper
A4 Letter Executive	A4 Letter (Plain paper and Recycled paper only)	 <p>Adjust the paper guides.</p> <p>Landscape orientation</p>
A5 A6 Photo Photo L Photo 2L Index card Envelopes	-	 <p>Adjust the paper guides.</p> <p>Portrait orientation</p>
A3 Ledger Legal Folio Mexico Legal India Legal	A3 Ledger Legal Folio Mexico Legal India Legal (Plain paper and Recycled paper only)	 <p>Extend the tray using the green slider, then adjust the paper guides.</p> <p>Portrait orientation</p>

MP Tray

MP Tray	How to Load Paper	
A4 Letter Executive		Landscape orientation 
A3 Ledger Legal Folio Mexico Legal India Legal A5 A6 Photo Photo L Photo 2L Index card Envelopes Long Paper ^{1 2}		Portrait orientation 

1 Width: 88.9 - 297 mm / Height: 431.9 - 1200 mm.

2 Load only one sheet of Long paper into the MP tray at a time. To avoid damaging the paper, DO NOT pull up the paper support (2) when loading Long paper.

2. Unfold the paper support flap.

3. Change the paper size setting in the machine's menu, if needed.

✓ Related Information

- [Load Paper](#)

Load Paper in Paper Tray #1 / Paper Tray #2

- Load A4, Letter, or Executive Size Paper in Paper Tray #1 / Paper Tray #2
- Load A3, Ledger, or Legal Size Paper in Paper Tray #1 / Paper Tray #2
- Load Photo Paper in Paper Tray #1
- Load Envelopes in Paper Tray #1

Load A4, Letter, or Executive Size Paper in Paper Tray #1 / Paper Tray #2

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.
Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.
- You can use only plain paper in Tray #2.

These instructions describe how to load paper in Tray #1.

The steps for Tray #2 are very similar.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine as shown by the arrow.

When you load paper in Tray #2, remove the tray top cover (1).

3. Gently press and slide the paper width guides (1) and then the paper length guide (2) to fit the paper size. Make sure the triangular mark (3) on the paper width guide (1) and paper length guide (2) line up with the marks for the paper you are using.

 If you load Executive size paper in Tray #1, lift the stopper (4).

4. Fan the stack of paper well to avoid paper jams and misfeeds.

-
5. Gently load paper in the paper tray with the printing surface **face down**.

Landscape orientation

IMPORTANT

Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.

To add paper before the tray is empty, remove the paper from the tray and combine it with the paper you are adding. Always fan the stack of paper well to prevent the machine from feeding multiple pages.

6. Make sure the paper length guide (1) touches the edges of the paper.

7. Gently adjust the paper width guides (1) to fit the paper.
Make sure the paper guides touch the edges of the paper.

8. Make sure the paper is flat in the tray and below the maximum paper mark (1).
Overfilling the paper tray may cause paper jams.

 When you load paper in Tray #2, replace the tray top cover.

9. Slowly push the paper tray completely into the machine.

IMPORTANT

DO NOT push the paper tray into the machine forcefully or quickly. Doing this may cause paper jams or paper feed problems.

10. Pull out the paper support until it locks into place.

11. Change the paper size setting in the machine's menu, if needed.

Load A3, Ledger, or Legal Size Paper in Paper Tray #1 / Paper Tray #2

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.
Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.
- You can use only plain paper in Tray #2.

These instructions describe how to load paper in Tray #1.

The steps for Tray #2 are very similar.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine as shown by the arrow.

-  When you load paper in Tray #2, remove the tray top cover (1).

3. Rest the tray on a flat surface.
Push the green slider to the left and then extend the tray until it locks into place.

4. Gently press and slide the paper width guides (1) and then the paper length guide (2) to fit the paper size. Make sure the triangular mark (3) on the paper width guide (1) and paper length guide (2) line up with the marks for the paper you are using.

5. Fan the stack of paper well to avoid paper jams and misfeeds.

Always make sure the paper is not curled or wrinkled.

6. Gently load paper in the paper tray with the printing surface **face down**.

Portrait orientation

IMPORTANT

Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.

To add paper before the tray is empty, remove the paper from the tray and combine it with the paper you are adding. Always fan the stack of paper well to prevent the machine from feeding multiple pages.

7. Make sure the paper length guide (1) touches the edges of the paper.

8. Gently adjust the paper width guides (1) to fit the paper.
Make sure the paper guides touch the edges of the paper.

9. Make sure the paper is flat in the tray and below the maximum paper mark (1).
Overfilling the paper tray may cause paper jams.

 When you load paper in Tray #2, replace the tray top cover.

10. Slowly push the paper tray completely into the machine.

IMPORTANT

DO NOT push the paper tray into the machine forcefully or quickly. Doing this may cause paper jams or paper feed problems.

11. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

12. Change the paper size setting in the machine's menu, if needed.

CAUTION

Position the machine so the tray will not protrude past the edge of the table or desk where someone may bump into it. The machine could fall and cause injury.

Before you collapse the paper tray, take the paper out of the tray.

Rest the tray on a flat surface.

Push the green slider to the left and then push in the front of the tray to collapse it until it locks into place. Put the paper in the tray.

Load Photo Paper in Paper Tray #1

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine as shown by the arrow.

3. Do one of the following:

- If you load Photo L (9 x 13 cm) in the paper tray, lift the Photo L stopper (1).
- If you load Photo (10 x 15 cm) in the paper tray, lift the Photo stopper (2).
- If you load Photo 2L (13 x 18 cm) in the paper tray, lift the Photo 2L stopper (3).

Gently press and slide the paper width guides (4) to fit the paper size.

4. Load up to 20 sheets of photo paper in the paper tray with the printing surface **face down**. Loading more than 20 sheets of photo paper may cause paper jams.

5. Gently adjust the paper width guides (1) to fit the paper.
Make sure the paper guides touch the edges of the paper and the paper is flat in the tray.

6. Slowly push the paper tray completely into the machine.

IMPORTANT

DO NOT push the paper tray into the machine forcefully or quickly. Doing this may cause paper jams or paper feed problems.

7. Pull out the paper support until it locks into place.

8. Change the paper size setting in the machine's menu, if needed.

Load Envelopes in Paper Tray #1

- If the [Check Paper] setting is set to [On] and you pull the paper tray out of the machine, a message appears on the LCD, allowing you to change the paper size and paper type.
- You can load envelopes in a variety of sizes. See *Related Information: Paper Type and Paper Size for Each Operation*.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.
Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.
- Before loading envelopes in the tray, press the corners and sides of the envelopes to make them as flat as possible.

1. If the paper support flap (1) is open, close it, and then close the paper support (2).

2. Pull the paper tray completely out of the machine as shown by the arrow.

3. Load up to 10 envelopes in the paper tray with the printing surface **face down**. Loading more than 10 envelopes may cause paper jams.

4. Gently press and slide the paper width guides (1) and paper length guide (2) to fit the size of the envelopes. Make sure the envelopes are flat in the tray.

IMPORTANT

If envelopes are multi-feeding, load one envelope in the paper tray at a time.

5. Slowly push the paper tray completely into the machine.

IMPORTANT

DO NOT push the paper tray into the machine forcefully or quickly. Doing this may cause paper jams or paper feed problems.

6. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

7. Change the paper size setting in the machine's menu, if needed.

Load Paper in the Multi-purpose Tray (MP Tray)

- Load Cut-Sheet Paper, Photo Paper, or Envelopes in the Multi-purpose Tray (MP Tray)
- Load Long Paper in the Multi-purpose Tray (MP Tray)

Load Cut-Sheet Paper, Photo Paper, or Envelopes in the Multi-purpose Tray (MP Tray)

Use the MP tray for special print media, such as photo paper or envelopes.

- If the [Check Paper] setting is set to [On] and you set the paper in the MP tray, a message appears on the LCD, allowing you to change the paper size and paper type.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.
Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.

NOTE

To prevent dust from entering the machine, be sure to close the MP tray if you are not using it.

1. Open the MP tray.

When you want to load paper larger than A4 or Letter size paper, pull up the paper support using both hands until it locks into place.

2. Gently press and slide the MP tray paper guides to match the width of the paper you are using.

3. Fan the stack of paper well to avoid paper jams and misfeeds.

Always make sure the paper is not curled or wrinkled.

4. Gently load the paper in the MP tray with the printing surface **face up**.

- Using A4, Letter, or Executive

Landscape orientation

- Using A3, Ledger, Legal, Folio, Mexico Legal, India Legal, A5, A6, envelopes, Photo, Photo L, Photo 2L, or Index Card

Portrait orientation

When using envelopes, load the envelopes with the printing surface **face up** and the flap on the left as shown in the illustration.

If you are having difficulty loading paper in the MP tray, push the release lever (1) towards the back of the machine, and then load the paper.

5. Using both hands, gently adjust the MP tray paper guides to fit the paper.

- DO NOT press the paper guides too tightly against the paper. Doing this may cause the paper to fold and jam.
- Place the paper in the centre of the MP tray between the paper guides. If the paper is not centred, pull it out and insert it again at the centre position.

6. Do one of the following:

- When using A4 or Letter, or smaller size paper, pull out the paper support until it locks into place.

- When using paper larger than A4, Letter, or envelopes, pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

7. Change the paper size setting in the machine's menu, if needed.

Make sure printing has finished before you close the MP tray.

Load Long Paper in the Multi-purpose Tray (MP Tray)

Load **one sheet** of Long paper at a time using the MP tray.

- Use the MP tray to print a Long paper (Width: 88.9 - 297 mm / Height: 431.9 - 1200 mm).
- Use Long paper only when printing from your computer or when printing using AirPrint.
- If the [Check Paper] setting is set to [On] and you set the paper in the MP tray, a message appears on the LCD, allowing you to change the paper size and paper type.
- When you load a different paper size in the tray, you must change the Paper Size setting in the machine or the paper size setting on your computer.

Doing this enables the machine to automatically feed paper from the appropriate tray if Auto Tray Select has been set in the printer driver (Windows) or on the machine.

NOTE

To prevent dust from entering the machine, be sure to close the MP tray if you are not using it.

1. Open the MP tray.

IMPORTANT

To avoid damaging the paper, DO NOT pull up the paper support when loading Long paper.

2. Gently press and slide the MP tray paper guides to match the width of the paper you are using.

3. Load only **one sheet of paper** in the MP tray with the printing surface **face up**. Using both hands, push one sheet of paper into the MP tray until the front edge touches the paper feed rollers.

If you are having difficulty loading paper in the MP tray, push the release lever (1) towards the back of the machine, and then load the paper.

4. Using both hands, gently adjust the MP tray paper guides to fit the paper.

IMPORTANT

DO NOT load more than one sheet of Long paper in the MP tray at any time. Doing this may cause a paper jam. When printing multiple pages, do not feed the next sheet of paper until the touchscreen displays a message instructing you to feed the next sheet.

5. Pull out the paper support (1) until it locks into place, and then unfold the paper support flap (2).

When you feed Long paper into the MP tray, the machine holds the printed page after printing so it does not fall. When printing is complete, remove the printed page and press [OK].

6. Change the paper size setting to [User Defined Size] and enter the actual size using the machine's touchscreen.

Make sure printing has finished before you close the MP tray.

Change the Paper Size and Paper Type

Set the Paper Size and Paper Type settings for the paper tray.

- To get the best print quality, set the machine for the type of paper you are using.
- When you change the size of the paper you load in the tray, you must change the Paper Size setting on the LCD at the same time.

1. Press  [Settings] > [All Settings] > [General Setup] > [Tray Setting]. Press the tray option you want.
2. Press [Paper Type].
3. Press ▲ or ▼ to display the paper type options, and then press the option you want.

Use plain paper only in Tray #2.

4. Press [Paper Size].
5. Press ▲ or ▼ to display the paper size options, and then press the option you want.
6. Press .

The machine ejects paper with the printed surface face up onto the paper tray at the front of the machine. When you use glossy paper, remove each sheet at once to prevent smudging or paper jams.

-

Acceptable Print Media

The print quality can be affected by the type of paper you use in the machine.

To get the best print quality for the settings you have selected, always set the Paper Type to match the type of paper you load.

You can use plain paper, inkjet paper (coated paper), glossy paper, recycled paper, and envelopes.

We recommend testing various paper types before buying large quantities.

For best results, use Brother paper.

- When you print on inkjet paper (coated paper) and glossy paper, be sure to select the correct print media in the printer driver or in the application you use to print, or the Paper Type setting on the machine.
- When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.
- When using photo paper, remove each sheet at once to prevent smudging or paper jams.
- Avoid touching the printed surface of the paper immediately after printing; the surface may not be completely dry and may stain your fingers.

Recommended Print Media

For the best print quality, we recommend using the Brother paper listed in the table.

Brother paper may not be available in all countries.

If Brother paper is not available in your country, we recommend testing various paper types before purchasing large quantities.

Brother paper

Paper Type	Item
A3 Plain	BP60PA3
A3 Glossy Photo	BP71GA3
A3 Inkjet (Matte)	BP60MA3
A4 Plain	BP60PA
A4 Glossy Photo	BP71GA4
A4 Inkjet (Matte)	BP60MA
10 x 15 cm Glossy Photo	BP71GP

Related Information

- [Acceptable Print Media](#)

Handle and Use Print Media

- Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.
- Avoid touching the shiny (coated) side of photo paper.
- Some envelope sizes require that you set margins in the application. Make sure you do a test print first before printing many envelopes.

IMPORTANT

DO NOT use the following types of paper:

- Damaged, curled, wrinkled, or irregularly shaped

1. **2 mm or greater curl may cause jams to occur.**

- Extremely shiny or highly textured
- Paper that cannot be arranged uniformly when stacked
- Paper made with a short grain

DO NOT use envelopes that:

- Are loosely constructed
- Have windows
- Are embossed (have raised writing on them)
- Have clasps or staples
- Are pre-printed on the inside
- Are self-adhesive
- Have double flaps

Self-adhesive Double flaps

You may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using.

Print as a Booklet Automatically (Windows)

Use this option to print a document in booklet format using 2-sided printing. The document's pages will be arranged according to the correct page number and will allow you to fold at the centre of the print output without having to change the order of the printed pages.

- Make sure the jam clear cover is closed.
- If paper is curled, straighten it and put it back in the paper tray.
- Use regular paper. DO NOT use bond paper.
- If the paper is thin, it may wrinkle.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Click the **Basic** tab.
4. In the **Orientation** field, select the **Portrait** or **Landscape** option to set the orientation of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

5. Click the **2-sided / Booklet** drop-down list, and then select the **Booklet** option.
6. Click the **2-sided Settings** button.
7. Select one of the options from the **2-sided Type** menu.

There are two types of 2-sided binding directions available for each orientation:

Option for Portrait	Description
Left Binding	
Right Binding	

Option for Landscape	Description
----------------------	-------------

Top Binding

Bottom Binding

8. Select one of the options from the **Booklet Printing Method** menu.

Option	Description
All Pages at Once	Every page will be printed in booklet format (four pages to every piece of paper, two pages per side). Fold your printout in the middle to create the booklet. 
Divide into Sets	This option prints the whole booklet in smaller individual booklet sets, allowing you to fold at the centre of the smaller individual booklet sets without having to change the order of the printed pages. You can specify the number of sheets in each smaller booklet set (from 1-15). This option can be helpful when folding a printed booklet that has a large number of pages. 

9. Select the **Binding Offset** checkbox to specify the offset for binding in inches or millimetres.

10. Click **OK** to return to the printer driver window.

11. Change other printer settings, if needed.

The Borderless feature is not available when using this option.

12. Click **OK**.

13. Complete your print operation.

Secure Print (Windows)

Use Secure Print to ensure that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

The secure data is deleted from the machine when you turn off the machine.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Click the **Advanced** tab.
4. Click the **Settings** button in the **Secure Print** field.
5. Select the **Secure Print** checkbox.
6. Type your four-digit password in the **Password** field.
7. Type the **User Name** and **Job Name** in the text field, if needed.
8. Click **OK**, to close the **Secure Print Settings** window.
9. Click **OK**.
10. Complete your print operation.
11. On the machine's control panel, press [Secure Print].
12. Press ▲ or ▼ to display user names, and then press your user name.
13. Enter your four-digit password, and then press [OK].
14. Press ▲ or ▼ to display the print job, and then press it.
15. Enter the number of copies you want.
16. Press [Start].
The machine prints the data.

After you have printed the secured data, it will be cleared from the machine's memory.

Print a Colour Document in Greyscale (Windows)

Greyscale mode makes the print processing speed faster than colour mode. If your document contains colour, selecting Greyscale mode prints your document in 256 levels of greyscale.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Click the **Basic** tab.
4. For **Colour / Greyscale**, select **Greyscale**.
5. Change other printer settings, if needed.
6. Click **OK**.
7. Complete your print operation.

Print a Long Paper (Windows)

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Make sure you have loaded only **one sheet** of Long paper (Width: 88.9 - 297 mm / Height: 431.9 - 1200 mm) in the MP tray.
4. Click the **Basic** tab.
5. Click the **Media Type** drop-down list, and then select the type of paper you are using.

IMPORTANT

To get the best print quality for the settings you have selected, always set the **Media Type** option to match the type of paper you load.

6. Click the **Paper Size** drop-down list, select **User Defined....** Enter the width, height, and other information in the **User Defined Size** window, and then click **OK**.
7. For **Colour / Greyscale**, select the **Colour** or **Greyscale** option.
8. In the **Orientation** field, select the **Portrait** or **Landscape** option to set the orientation of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

9. Type the number of copies (1-999) you want in the **Copies** field.
10. Change other printer settings, if needed.
11. Click **OK**.
12. Complete your print operation.

Prevent Smudged Printouts and Paper Jams (Windows)

Some types of print media may need more drying time. Change the **Reduce Smudge** option if you have problems with smudged printouts or paper jams.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.

The printer driver window appears.

3. Click the **Advanced** tab.
4. Click the **Other Print Options** button.
5. Select the **Reduce Smudge** option on the left side of the screen.
6. Select one of the following options:

Media Type	Option	Description
Plain Paper	2-sided Printing or Simplex Printing	Off / On Select Off to print at normal speed, using a standard amount of ink. Select On to print at a slower speed, using less ink. Printouts may be lighter than they appear in Print Preview.
Glossy Paper	Off / On	Select Off to print at normal speed, using a standard amount of ink. Select On to print at a slower speed, using less ink. Printouts may be lighter than they appear in Print Preview.

7. Click **OK** to return to the printer driver window.
8. Click **OK**.
9. Complete your print operation.

Use a Preset Print Profile (Windows)

Print Profiles are presets designed to give you quick access to frequently-used printing configurations.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.
The printer driver window appears.
3. Click the **Print Profiles** tab.

4. Select your profile from the print profile list.
The profile settings are shown on the left side of the printer driver window.
5. Do one of the following:
 - If the settings are correct for your print job, click **OK**.
 - To change the settings, go back to the **Basic** or **Advanced** tab, change settings, and then click **OK**.

To display the **Print Profiles** tab at the front of the window the next time you print, select the **Always show Print Profiles tab first** checkbox.

Create or Delete Your Print Profile (Windows)

Add up to 20 new print profiles with customised settings.

1. Select the print command in your application.
2. Select **Brother XXX-XXXX Printer** (where XXX-XXXX is the name of your model), and then click the printing properties or preferences button.

The printer driver window appears.

3. Do one of the following:

To create a new print profile:

- a. Click the **Basic** tab and the **Advanced** tab, and configure the print settings you want for the new Print Profile.
 - b. Click the **Print Profiles** tab.
 - c. Click **Add Profile**.
- The **Add Profile** dialog box appears.
- d. Type the new profile name in the **Name** field.
 - e. Click the icon you want to use to represent this profile from the icon list.
 - f. Click **OK**.

The new Print Profile name is added to the list in the **Print Profiles** tab.

To delete a print profile that you created:

- a. Click the **Print Profiles** tab.
 - b. Click **Delete Profile**.
- The **Delete Profile** dialog box appears.
- c. Select the profile you want to delete.
 - d. Click **Delete**.
 - e. Click **Yes**.
 - f. Click **Close**.

Change the Default Print Settings (Windows)

When you change an application's print settings, the changes only apply to documents printed with that application. To change print settings for all Windows applications, you must configure the printer driver properties.

1. Do one of the following:
 - For Windows Server 2008
Click  (**Start**) > **Control Panel** > **Hardware and Sound** > **Printers**.
 - For Windows 7 and Windows Server 2008 R2
Click  (**Start**) > **Devices and Printers**.
 - For Windows 8.1
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.
 - For Windows 10, Windows Server 2016 and Windows Server 2019
Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.
 - For Windows Server 2012
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.
 - For Windows Server 2012 R2
Click **Control Panel** on the **Start** screen. In the **Hardware** group, click **View devices and printers**.
2. Right-click the **Brother XXX-XXXX Printer** icon (where XXX-XXXX is the name of your model), and then select **Printer properties**. If printer driver options appear, select your printer driver.
The printer properties dialog box appears.
3. Click the **General** tab, and then click the **Printing Preferences...** or **Preferences...** button.
The printer driver dialog box appears.
4. Select the print settings you want to use as defaults for all of your Windows programs.
5. Click **OK**.
6. Close the printer properties dialog box.

Print Settings (Windows)

- >> Basic Tab
- >> Advanced Tab

Basic Tab

1. Media Type

Select the media type you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

2. Print Quality

Select the print quality you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

3. Paper Size

Select the paper size you want to use. You can either choose from standard paper sizes or create a custom paper size.

Borderless

Select this option to print photos without borders. Because the image data is created slightly larger than the paper size you are using, this will cause some cropping of the photo edges.

You may not be able to select the Borderless option for some combinations of media type and quality, or from some applications.

4. Colour / Greyscale

Select colour or greyscale printing. The print speed is faster in greyscale mode than it is in colour mode. If your document contains colour and you select greyscale mode, your document will be printed using 256 levels of greyscale.

5. Orientation

Select the orientation (portrait or landscape) of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

6. Copies

Type the number of copies (1-999) that you want to print in this field.

Collate

Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

Reverse Order

Select this option to print your document in reverse order. The last page of your document will be printed first.

7. Multiple Page

Select this option to print multiple pages on a single sheet of paper, or print one page of your document on multiple sheets.

Page Order

Select the page order when printing multiple pages on a single sheet of paper.

Border Line

Select the type of border to use when printing multiple pages on a single sheet of paper.

8. 2-sided / Booklet

Select this option to print on both sides of the paper, or print a document in booklet format using 2-sided printing.

2-sided Settings button

Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.

9. Paper Source

Select the paper source setting according to your print conditions or purpose.

Advanced Tab

1. Colour Enhancement

Select this option to use the Colour Enhancement feature. This feature analyses your image to improve its sharpness, white balance and colour density. This process may take several minutes depending on the image size and your computer's specifications.

2. Scaling

Select these options to enlarge or reduce the size of the pages in your document.

Fit to Paper Size

Select this option to enlarge or reduce the document pages to fit a specified paper size. When you select this option, select the paper size you want from the drop-down list.

Free [25 - 400 %]

Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.

3. Mirror Print

Select this option to reverse the printed image on the page horizontally from left to right.

4. Reverse Print

Select this option to rotate the printed image 180 degrees.

5. Use Watermark

Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.

6. Header-Footer Print

Select this option to print the date, time and PC login user name on the document.

7. Barcode Print Mode

Select this option to print barcodes at the most suitable quality and resolution.

8. Secure Print

This feature ensures that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

9. User Authentication

This feature allows you to confirm the restrictions for each user.

10. Other Print Options button

Advanced Colour Settings

Select the method that the machine uses to arrange dots to express halftones.

The printout colour can be adjusted to achieve the closest match to what appears on your computer screen.

Reduce Smudge

Some types of print media may need more drying time. Change this option if you have problems with smudged printouts or paper jams.

Retrieve Printer's Colour Data

Select this option to optimise the print quality using the machine's factory settings, which are set specifically for your Brother machine. Use this option when you have replaced the machine or changed the machine's network address.

Print Archive

Select this option to save the print data as a PDF file to your computer.

Reduce Uneven Lines

Select this option to adjust the print alignment if your printed text becomes blurred or images become faded.

- [Print Photos from a USB Flash Drive on the Brother Machine](#)

Important Information about Photo Printing

Your machine is designed to be compatible with modern digital camera image files and USB flash drives. Read the points below to avoid photo printing problems:

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognised).
- Direct photo printing must be performed separately from photo printing operations using the computer. (Simultaneous operation is not available.)
- The machine can read up to 999 files ¹ on a USB flash drive.

Be aware of the following:

- When printing an index sheet or image, the machine will print all the valid images, even if one or more images have been corrupted. Corrupted images will not be printed.
- Your machine supports USB flash drives that have been formatted by Windows.

Print the Date from Your Photo's Data

Print the date if it is already in your photo's information. The date will be printed in the lower-right corner. To use this setting, the photo data must include the date.

1. Insert a USB flash drive in the USB slot.
2. Press [JPEG Print] > [Select Files].
3. Press ◀ or ▶ to display each photo. When the photo you want appears, press it, and then press [OK].
4. Press [OK].
5. Press  [Print Settings] > [Date Print].
6. Press [On] (or [Off]).
7. When finished, press  or [OK].
8. Press [Start].

Print a PDF File Directly from a USB Flash Drive

You can print a PDF file directly from a USB flash drive.

PDF files that are 2 GB or more cannot be printed.

IMPORTANT

To prevent damage to your machine, DO NOT connect any device other than a USB flash drive to the USB direct interface.

1. Insert a USB flash drive in the USB slot.

2. Press [PDF Print].

If your machine has been set to Secure Function Lock On, you may not be able to access Direct Print.

3. Press ▲ or ▼ to display the PDF file you want to print, and then press it.
4. Enter the number of copies in one of the following ways:
 - Press [-] or [+] on the touchscreen.
 - Press $\times 001$ to display the keyboard on the touchscreen, and then enter the number of copies using the touchscreen keyboard. Press [OK].
5. Read and confirm the displayed list of options.
6. To change the print settings, press  [Print Settings].

When finished, press [OK].

Option	Description
Print Quality	Select the print resolution for your type of document.
Tray Select	Select the tray.
Paper Size	Select the paper size.
Multiple Page	Set this option to print multiple pages on a single sheet of paper or print one page of your document on multiple sheets.
2-sided	Select the type of 2-sided binding.
Collate	Set this option to On to print sets of multi-page documents in the original page order.
PDF Option	Select this option to print a PDF file with the markups or stamps.
Set New Default	Save the print settings you use most often by setting them as the defaults.
Factory Reset	Restore any changed print settings back to the factory settings.

7. Press [Mono Start] or [Colour Start].

IMPORTANT

DO NOT remove the USB flash drive from the USB direct interface until the machine has finished printing.

Related Information

Print an Email Attachment

You can print files by emailing them to your Brother machine.

- You can attach up to 10 documents, 20 MB in total, to an email.
- This feature supports the following formats:
 - Document files: PDF, TXT, Microsoft Word files, Microsoft Excel files, and Microsoft PowerPoint files
 - Image files: JPEG, BMP, GIF, PNG, and TIFF
- The machine prints both the email content and attachments by default. To print only email attachments, change the settings as necessary.

1. Press [Functions] > [Web].

- If information regarding the Internet connection appears on the machine's LCD, read it, and then press [OK].
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. Press ▲ or ▼ to display the [Online Functions] option, and then press it.

- If this function is locked, contact your Network Administrator for access.
- If information regarding [Online Functions] appears, read it, and then press [OK].

3. Press [Enable].

Follow the on-screen instructions. Online Functions are enabled.

4. Press ▲ or ▼ to display the [Email Print] option, and then press it.

If information regarding [Email Print] appears, read it, and then press [OK].

5. Press [Enable].

Follow the on-screen instructions. The machine prints the Instruction Sheet.

6. Send your email to the email address included on the sheet. The machine prints the email attachments.

To change settings, including email address and printer settings, access Web Based Management, click **Online Functions > Online Functions Settings** in the left navigation menu, and then click the **Online Functions Settings Page** button.

Supported Basic Network Features

The machine supports various features depending on the operating system. Use this table to see which network features and connections are supported by each operating system.

Operating Systems	Windows	Windows Server	macOS
Printing	Yes	Yes	Yes
Web Based Management ¹	Yes	Yes	Yes
Status Monitor	Yes	No	No
Driver Deployment Wizard	Yes	Yes	No

¹ The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**". We recommend immediately changing the default password to protect your machine from unauthorised access.

When connecting your machine to an outside network such as the Internet, make sure your network environment is protected by a separate firewall or other means in order to prevent information leaks due to inadequate settings or unauthorised access by malicious third parties.

Before Configuring Your Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

- If you are using an enterprise wireless network, you must know the User ID and Password.
- To achieve optimum results with normal everyday document printing, place your machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

- Although your machine can be used in both a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.
- If there is a signal in the vicinity, wireless LAN allows you to freely make a LAN connection. However, if security settings are not correctly configured, the signal may be intercepted by malicious third-parties, possibly resulting in:
 - Theft of personal or confidential information
 - Improper transmission of information to parties impersonating the specified individuals
 - Dissemination of transcribed communication contents that were intercepted

Make sure you know your wireless router/access point's Network Name (SSID) and Network Key (Password). If you cannot find this information, consult the manufacturer of your wireless router/access point, your system administrator, or Internet provider. Brother cannot provide this information.

Configure Your Machine for a Wireless Network Using the Machine's Control Panel Setup Wizard

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings of the computer to which you are connecting.

Network Name (SSID)

Network Key (Password)

For example:

Network Name (SSID)
HELLO

Network Key (Password)
12345

- Your access point/router may support the use of multiple WEP keys, but your Brother machine supports the use of only the first WEP key.
- If you need assistance during setup and want to contact Brother customer service, make sure you have your SSID (Network Name) and Network Key (Password) ready. We cannot assist you in locating this information.
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?

- Check the documentation provided with your wireless access point/router.
- The initial SSID could be the manufacturer's name or the model name.
- If you do not know the security information, consult the router manufacturer, your system administrator, or your Internet provider.

2. Press  [Settings] > [Network] > [WLAN (Wi-Fi)] > [Find Wi-Fi Network].
3. When [Enable WLAN?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
4. The machine searches for your network and displays a list of available SSIDs. When a list of SSIDs appears, press ▲ or ▼ to select the SSID you want. Press [OK].
5. Do one of the following:
 - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step, and then press [OK] to apply your settings.
 - If your authentication method is Open System and your encryption mode is None, go to the next step.
6. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

-

Configure Your Machine for a Wireless Network Using the One Push Method of Wi-Fi Protected Setup™ (WPS)

If your wireless access point/router supports WPS (Push Button Configuration), you can use WPS from your machine's control panel menu to configure your wireless network settings.

1. Press  [Settings] > [Network] > [WLAN (Wi-Fi)] > [WPS/Push Button].
2. When [Enable WLAN?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
3. When the touchscreen instructs you to start WPS, press the WPS button on your wireless access point/router. Then press [OK] on your machine. Your machine automatically tries to connect to your wireless network.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

Related Information

- [Use the Wireless Network](#)

Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

Type A

Connection when the wireless LAN access point/router (1) doubles as the Registrar.

Type B

Connection when another device (2), such as a computer, is used as the Registrar.

1. Press  [Settings] > [Network] > [WLAN (Wi-Fi)] > [WPS/PIN Code].
2. When [Enable WLAN?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
4. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: <http://192.168.1.2>)
5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless LAN access point/router.
- The settings page may differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If your wireless device is connected successfully, the LCD displays [Connected].

If you are using a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, complete the following steps:

6. Do one of the following:
 - Windows 10

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **Add a device**.

- Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings** > **Control Panel** > **Hardware and Sound** > **Devices and Printers** > **Add a device**.

- Windows 7

Click  (**Start**) > **Devices and Printers** > **Add a device**.

- To use a Windows 7, Windows 8.1, or Windows 10 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.
- If you use Windows 7, Windows 8.1, or Windows 10 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the driver and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

7. Select your machine and click **Next**.

8. Type the PIN displayed on the machine's LCD, and then click **Next**.

9. (Windows 7) Select your network, and then click **Next**.

10. Click **Close**.

Configure Your Machine for a Wireless Network When the SSID is Not Broadcast

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

Network Name (SSID)		
Authentication Method	Encryption Mode	Network Key (Password)
Open System	NONE	-
	WEP	
Shared Key	WEP	
WPA/WPA2-PSK/WPA3-SAE	TKIP (for WPA/WPA2-PSK)	
	AES	
WPA3-SAE	AES	

For example:

Network Name (SSID)		
HELLO		
Authentication Method	Encryption Mode	Network Key (Password)
WPA2-PSK	AES	12345678

If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press  [Settings] > [Network] > [WLAN(Wi-Fi)] > [Find Wi-Fi Network].
3. When [Enable WLAN?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
4. The machine searches for your network and displays a list of available SSIDs. Press ▲ or ▼ to display the [<New SSID>] option, and then press it.
5. Press [OK].
6. Enter the SSID name, and then press [OK].

For more information about how to enter text, see *Related Information*.

7. Press ▲ or ▼ to select the Authentication Method, and then press it.
8. Do one of the following:
 - If you selected the [Open System] option, press either [None] or [WEP].
If you selected the [WEP] option for Encryption type, enter the WEP key, and then press [OK].
 - If you selected the [Shared Key] option, enter the WEP key, and then press [OK].
 - If you selected the [WPA/WPA2-PSK/WPA3-SAE] option, press either [TKIP+AES] or [AES].
Enter the WPA key, and then press [OK].
 - If you selected the [WPA3-SAE] option, press [AES].

Enter the WPA key, and then press [OK].

-
- For more information about how to enter text, see *Related Information*.
 - Your Brother machine supports the use of the first WEP key only.
-

9. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

Configure Your Machine for an Enterprise Wireless Network

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings.

Network Name (SSID)

Authentication Method	Encryption Mode	User ID	Password
EAP-FAST/NONE	AES		
	TKIP		
EAP-FAST/MS-CHAPv2	AES		
	TKIP		
EAP-FAST/GTC	AES		
	TKIP		
PEAP/MS-CHAPv2	AES		
	TKIP		
PEAP/GTC	AES		
	TKIP		
EAP-TTLS/CHAP	AES		
	TKIP		
EAP-TTLS/MS-CHAP	AES		
	TKIP		
EAP-TTLS/MS-CHAPv2	AES		
	TKIP		
EAP-TTLS/PAP	AES		
	TKIP		
EAP-TLS	AES		-
	TKIP		-

For example:

Network Name (SSID)
HELLO

Authentication Method	Encryption Mode	User ID	Password
EAP-FAST/MS-CHAPv2	AES	Brother	12345678

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- If you verify your machine using the common name of the server certificate, we recommend writing down the common name before you start configuration. Contact your network administrator about the common name of the server certificate.

-
2. Press  [Settings] > [Network] > [WLAN(Wi-Fi)] > [Find Wi-Fi Network].
 3. When [Enable WLAN?] appears, press [Yes].
The wireless setup wizard starts. To cancel, press [No].
 4. The machine searches for your network and displays a list of available SSIDs. Press ▲ or ▼ to display the [<New SSID>] option, and then press it.
 5. Press [OK].
 6. Enter the SSID name, and then press [OK].

For more information about how to enter text, see *Related Information*.

7. Press ▲ or ▼ to select the Authentication Method, and then press it.
8. Do one of the following:
 - If you selected the [EAP-FAST], [PEAP] or [EAP-TTLS] option, select the Inner Authentication method [NONE], [CHAP], [MS-CHAP], [MS-CHAPv2], [GTC] or [PAP].

Depending on your Authentication method, the Inner Authentication method selections differ.

Select the encryption type [TKIP+AES] or [AES].

Select the verification method [No Verification], [CA] or [CA + Server ID].

- If you selected the [CA + Server ID] option, enter the server ID, user ID and password (if required), and then press [OK] for each option.
- For other selections, enter the user ID and Password, and then press [OK] for each option.

If you have not imported a CA certificate into your machine, the machine displays [No Verification].

- If you selected the [EAP-TLS] option, select the encryption type [TKIP+AES] or [AES].
The machine will display a list of available Client Certificates, and then select the certificate.
Select the verification method [No Verification], [CA] or [CA + Server ID].
 - If you selected the [CA + Server ID] option, enter the server ID and user ID, and then press [OK] for each option.
 - For other selections, enter the user ID, and then press [OK].

9. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the LCD displays [Connected].

You have completed the wireless network setup. To install the drivers and software necessary to use your machine, go to your model's **Downloads** page at support.brother.com.

TS-06	<p>The wireless security information (authentication method/encryption method/Network Key (Password)) is incorrect.</p> <p>Check the following points and try to set up your wireless connection again:</p> <ul style="list-style-type: none"> • Confirm the Network Key. If your Network Key contains upper-case and lower-case letters, make sure you type them correctly. • Confirm whether the authentication method entered and the authentication method or encryption method supported by the wireless router/access point are the same. • If the network key, authentication method, and encryption method have been confirmed, restart your wireless router/access point and the machine. • If your wireless router/access point's Stealth Mode is on, you may need to disable it to connect to the wireless network. <p>If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.</p>
TS-07	<p>The machine cannot detect a wireless router/access point that has WPS (Wi-Fi Protected Setup) enabled.</p> <p>Check the following points and try again:</p> <ul style="list-style-type: none"> • To check if your wireless router/access point supports WPS, look for the WPS symbol displayed on the router/access point. For more information, see the documentation provided with your wireless router/access point. • To set up your wireless connection using WPS, you must configure both your machine and the wireless router/access point. For more information, see the user's guide. • If you do not know how to set up your wireless router/access point using WPS, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-08	<p>Two or more wireless routers or access points that have WPS enabled are detected.</p> <p>Check the following points and try again:</p> <ul style="list-style-type: none"> • Make sure that only one wireless router/access point within range has WPS enabled, and then try to connect again. • Try to connect again after a few minutes to avoid interference from other access points/routers.

How to confirm wireless security information (SSID/authentication method/encryption method/Network Key) of your WLAN access point/router:

1. The default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model number of the WLAN access point/router may be used as the default security settings.
2. See the documentation provided with your WLAN access point/router for information on how to find the security settings.
 - If the WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
 - The Network key may also be described as the Password, Security Key, or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask your Internet provider or network administrator.

Print the Network Configuration Report

The Network Configuration Report lists the network configuration, including the network print server settings.

- **Node Name:** The Node Name appears on the current Network Configuration Report. The default Node Name is "BRNxxxxxxxxxxx" for a wired network or "BRWxxxxxxxxxxx" for a wireless network (where "xxxxxxxxxxx" is your machine's MAC Address / Ethernet Address.)
- If the IP Address on the Network Configuration Report shows 0.0.0.0, wait for one minute and try printing it again.
- You can find your machine's settings, such as the IP address, subnet mask, node name, and MAC Address on the report, for example:
 - IP address: 192.168.0.5
 - Subnet mask: 255.255.255.0
 - Node name: BRN000ca0000499
 - MAC Address: 00-0c-a0-00-04-99

1. Press  [Settings] > [All Settings] > [Print Reports] > [Network Configuration] > [Yes].

The machine prints the current Network Configuration Report.

Synchronize Time with the SNTP Server Using Web Based Management

The Simple Network Time Protocol (SNTP) is used to synchronize the time used by the machine for authentication with the SNTP time server. (This is not the time displayed on the machine's LCD.) You can automatically or manually synchronize the machine's time with the Coordinated Universal Time (UTC) provided by the SNTP time server.

- [Configure Date and Time Using Web Based Management](#)
- [Configure the SNTP Protocol Using Web Based Management](#)

Configure Date and Time Using Web Based Management

Configure date and time to synchronize the time used by the machine with the SNTP time server.

This feature is not available in some countries.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Administrator > Date&Time**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Verify the **Time Zone** settings.

Select the time difference between your location and UTC from the **Time Zone** drop-down list. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

6. Select the **Synchronize with SNTP server** checkbox.
7. Click **Submit**.

You can also configure date and time manually.

Related Information

Configure the SNTP Protocol Using Web Based Management

Configure the SNTP protocol to synchronize the time the machine uses for authentication with the time kept by the SNTP time server.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select the **SNTP** checkbox to activate the settings.
6. Click **Submit**.
7. Restart your Brother machine to activate the configuration.
8. Next to the SNTP checkbox, click **Advanced Settings**.
9. Configure the settings.

Option	Description
Status	Displays whether the SNTP protocol is enabled or disabled.
Synchronization Status	Confirm the latest synchronization status.
SNTP Server Method	Select AUTO or STATIC . <ul style="list-style-type: none">• AUTO If you have a DHCP server in your network, the SNTP server will obtain the address from that server automatically.• STATIC Type the address you want to use.
Primary SNTP Server Address Secondary SNTP Server Address	Type the server address (up to 64 characters). The secondary SNTP server address is used as a backup to the primary SNTP server address. If the primary server is unavailable, the machine will contact the secondary SNTP server.
Primary SNTP Server Port Secondary SNTP Server Port	Type the port number (1-65535). The secondary SNTP server port is used as a backup to the primary SNTP server port. If the primary port is unavailable, the machine will contact the secondary SNTP port.
Synchronization Interval	Type the number of hours between server synchronization attempts (1-168 hours).

10. Click **Submit**.

Reset the Network Settings to Factory Default

You can use your machine's control panel to reset the machine's network settings to its default factory settings. This resets all information, such as the password and IP address.

- This feature restores all wired (supported models only) and wireless network settings to the factory settings.
- You can also reset the print server to its factory settings using Web Based Management.

1. Press  [Settings] > [All Settings] > [Network] > [Network Reset].
2. The reset confirmation message is displayed. Press [OK] for two seconds.
The machine will restart.

Configure Certificates for Device Security

You must configure a certificate to manage your networked machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- [Supported Security Certificate Features](#)
- [Step by Step Guide for Creating and Installing a Certificate](#)
- [Create a Self-signed Certificate](#)
- [Create CSR and Install a Certificate from a Certificate Authority \(CA\)](#)
- [Import and Export the Certificate and Private Key](#)
- [Import and Export a CA Certificate](#)
- [Manage Multiple Certificates](#)

Supported Security Certificate Features

Your machine supports the use of multiple security certificates, which allows secure authentication and communication with the machine. The following security certificate features can be used with the machine:

- SSL/TLS communication
- IEEE 802.1x authentication
- IPsec

The Brother machine supports the following:

- Pre-installed certificate

Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organisation for better security.

- Self-signed certificate

This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- Certificate from a Certificate Authority (CA)

There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:

- When using a Certificate Signing Request (CSR) from this print server.
- When importing a certificate and a private key.

- Certificate Authority (CA) Certificate

To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

-
- If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
 - When you reset the print server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the print server, export them before resetting, and then reinstall them.
-

-

Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- [Configure Certificates for Device Security](#)
-

Create a Self-signed Certificate

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create Self-Signed Certificate**.
6. Enter a **Common Name** and a **Valid Date**.
 - The length of the **Common Name** is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
 - A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the **Common Name** that was used for the self-signed certificate.
7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

Related Topics:

- [Access Web Based Management](#)

Create CSR and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- [Create a Certificate Signing Request \(CSR\)](#)
- [Install a Certificate on Your Machine](#)

Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Click **Create CSR**.
6. Type a **Common Name** (required) and add other information about your **Organization** (optional).

- Your company details are required so that a CA can confirm your identity and verify it to the outside world.
- The length of the **Common Name** must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default. The **Common Name** is required.
- A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
- The length of the **Organization**, the **Organization Unit**, the **City/Locality** and the **State/Province** must be less than 64 bytes.
- The **Country/Region** should be a two-character ISO 3166 country code.
- If you are configuring an X.509v3 certificate extension, select the **Configure extended partition** checkbox, and then select **Auto (Register IPv4)** or **Manual**.

7. Select your setting from the **Public Key Algorithm** drop-down list. The default setting is **RSA(2048bit)**.
8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
9. Click **Submit**.

The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.

10. Click **Save**.

- Follow your CA's policy regarding the method to send a CSR to your CA.
- If you are using the Enterprise root CA of Windows Server 2008/2008 R2/2012/2012 R2/2016/2019, we recommend using the Web Server for the certificate template to securely create the Client Certificate. If you are creating a Client Certificate for an IEEE 802.1x environment with EAP-TLS authentication, we recommend using User for the certificate template.

Install a Certificate on Your Machine

When you receive a certificate from a CA, follow the steps below to install it into the print server:

Only a certificate issued with your machine's CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. If you do not, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Click **Install Certificate**.
6. Browse to the file that contains the certificate issued by the CA, and then click **Submit**.

The certificate has been created successfully and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

- [Send an Email Securely Using SSL/TLS](#)

Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a print job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

Related Information

- [Use SSL/TLS](#)
 - [Brief History of SSL/TLS](#)
 - [Benefits of Using SSL/TLS](#)

Brief History of SSL/TLS

SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. For example, when you use Internet Explorer for Internet Banking and you see https:// and the little padlock icon in the web browser, you are using SSL. SSL grew to work with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

Related Information

- [Introduction to SSL/TLS](#)
-

Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS is to guarantee secure printing over an IP network by restricting unauthorised users from reading data sent to the machine. SSL's key selling point is that it can be used to print confidential data securely. For example, an HR department in a large company may be printing wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a confusing page of code and not the actual wage slip.

Install the Self-signed Certificate for Windows users with Administrator Rights

The following steps are for Microsoft Internet Explorer. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

1. Do one of the following:
 - Windows 10, Windows Server 2016, and Windows Server 2019
Click  > **Windows Accessories**.
 - Windows 8.1
Right-click the  (**Internet Explorer**) icon on the taskbar.
 - Windows Server 2012 and Windows Server 2012 R2
Click , and then right-click the  (**Internet Explorer**) icon that appears on the taskbar.
 - Windows 7 and Windows Server 2008
Click  (**Start**) > **All Programs**.
2. Right-click **Internet Explorer**, and then click **Run as administrator**.

If the **More** option appears, click **More**.

If the **User Account Control** screen appears, click **Yes**.

3. Type "https://machine's IP address" in your browser's address bar to access your machine (where "machine's IP address" is the machine's IP address or the node name that you assigned for the certificate).
4. Click **More information**.
5. Click **Go on to the webpage (not recommended)**.
6. Click **Certificate error**, and then click **View certificates**.

7. Click **Install Certificate....**
8. When the **Certificate Import Wizard** appears, click **Next**.
9. Select **Place all certificates in the following store**, and then click **Browse....**
10. Select **Trusted Root Certification Authorities**, and then click **OK**.

-
11. Click **Next**.
 12. Click **Finish**.
 13. Click **Yes**, if the fingerprint (thumbprint) is correct.
 14. Click **OK**.

- [Print Documents Using SSL/TLS](#)
- [Configure a Certificate for SSL/TLS and Available Protocols](#)
- [Configure Certificates for Device Security](#)

Print Documents Using SSL/TLS

To print documents securely with IPP protocol, use the IPPS protocol.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Make sure the **IPP** checkbox is selected.

If the **IPP** checkbox is not selected, select the **IPP** checkbox, and then click **Submit**.

Restart your machine to activate the configuration.

After the machine restarts, return to the machine's web page, type the password, go to the navigation menu, and then click **Network > Network > Protocol**.

6. Click **HTTP Server Settings**.
7. Select the **HTTPS (Port 443)** checkbox in the **IPP**, and then click **Submit**.
8. Restart your machine to activate the configuration.

Communication using IPPS cannot prevent unauthorised access to the print server.

Manage Your Network Machine Securely Using SNMPv3

The Simple Network Management Protocol version 3 (SNMPv3) provides user authentication and data encryption to manage network devices securely. To manage your network machine securely, we recommend using the SNMPv3 protocol when you use BRAdmin Professional 4.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Make sure the **SNMP** setting is enabled, and then click **Advanced Settings**.
6. Configure the SNMP settings. There are three options for **SNMP Mode of Operation**.

Option	Description
SNMP v1/v2c read-write access	The print server uses version 1 and version 2c of the SNMP protocol. You can use all Brother applications in this mode. However, it is not secure since it will not authenticate the user, and data will not be encrypted.
SNMPv3 read-write access and v1/v2c read-only access	<p>The print server uses the read-write access of version 3 and the read-only access of version 1 and version 2c of the SNMP protocol.</p> <p> When you use SNMPv3 read-write access and v1/v2c read-only access mode, some Brother applications (such as BRAdmin Light) that access the print server do not work correctly since they authorize the read-only access of version 1 and version 2c. If you want to use all applications, we recommend using the SNMP v1/v2c read-write access mode.</p>
SNMPv3 read-write access	<p>The print server uses version 3 of the SNMP protocol. If you want to manage the print server securely, use this mode.</p> <p> When you use the SNMPv3 read-write access mode, note the following:</p> <ul style="list-style-type: none">• You can use only BRAdmin Professional or Web Based Management to manage the print server.• Except for BRAdmin Professional, all applications that use SNMPv1/v2c will be restricted. To allow the use of SNMPv1/v2c applications, use the SNMPv3 read-write access and v1/v2c read-only access or SNMP v1/v2c read-write access mode.

7. Click **Submit**.

- [Configure an IPsec Template Using Web Based Management](#)

Introduction to IPsec

IPsec (Internet Protocol Security) is a security protocol that uses an optional Internet Protocol function to prevent data manipulation and ensure the confidentiality of data transmitted as IP packets. IPsec encrypts data carried over the network, such as print data sent from computers to a printer. Because the data is encrypted at the network layer, applications that employ a higher-level protocol use IPsec even if the user is not aware of its use.

IPsec supports the following functions:

- IPsec transmissions

According to the IPsec setting conditions, the network-connected computer sends data to and receives data from the specified device using IPsec. When the devices start communicating using IPsec, keys are exchanged using Internet Key Exchange (IKE) first, and then the encrypted data is transmitted using the keys.

In addition, IPsec has two operation modes: the Transport mode and Tunnel mode. The Transport mode is used mainly for communication between devices and the Tunnel mode is used in environments such as a Virtual Private Network (VPN).

For IPsec transmissions, the following conditions are necessary:

- A computer that can communicate using IPsec is connected to the network.
 - Your machine is configured for IPsec communication.
 - The computer connected to your machine is configured for IPsec connections.
-

- IPsec settings

The settings that are necessary for connections using IPsec. These settings can be configured using Web Based Management.

To configure the IPsec settings, you must use the browser on a computer that is connected to the network.

Related Information

- [Use IPsec](#)
-

Configure IPsec Using Web Based Management

The IPsec connection conditions comprise two **Template** types: **Address** and **IPsec**. You can configure up to 10 connection conditions.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > IPsec**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Configure the settings.

Option	Description
Status	Enable or disable IPsec.
Negotiation Mode	Select Negotiation Mode for IKE Phase 1. IKE is a protocol that is used to exchange encryption keys in order to carry out encrypted communication using IPsec. In Main mode, the processing speed is slow, but the security is high. In Aggressive mode, the processing speed is faster than Main mode, but the security is lower.
All Non-IPsec Traffic	Select the action to be taken for non-IPsec packets. When using Web Services, you must select Allow for All Non-IPsec Traffic . If you select Drop , Web Services cannot be used.
Broadcast/Multicast Bypass	Select Enabled or Disabled .
Protocol Bypass	Select the checkbox for the option or options you want.
Rules	Select the Enabled checkbox to activate the template. When you select multiple checkboxes, the lower numbered checkboxes have priority if the settings for the selected checkboxes conflict. Click on the corresponding drop-down list to select the Address Template that is used for the IPsec connection conditions. To add an Address Template , click Add Template . Click on the corresponding drop-down list to select the IPsec Template that is used for the IPsec connection conditions. To add an IPsec Template , click Add Template .

6. Click **Submit**.

If the machine must be restarted to register the new settings, the restart confirmation screen will appear.

If there is a blank item in the template you enabled in the **Rules** table, an error message appears. Confirm your choices and click **Submit** again.

Configure an IPsec Address Template Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Security > IPsec Address Template**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Click the **Delete** button to delete an **Address Template**. When an **Address Template** is in use, it cannot be deleted.
6. Click the **Address Template** that you want to create. The **IPsec Address Template** appears.
7. Configure the settings.

Option	Description
Template Name	Type a name for the template (up to 16 characters).
Local IP Address	<ul style="list-style-type: none"> • IP Address Specify the IP address. Select ALL IPv4 Address, ALL IPv6 Address, ALL Link Local IPv6, or Custom from the drop-down list. If you select Custom from the drop-down list, type the IP address (IPv4 or IPv6) in the text box. • IP Address Range Type the starting and ending IP addresses for the IP address range in the text boxes. If the starting and ending IP addresses are not standardised to IPv4 or IPv6, or the ending IP address is smaller than the starting address, an error will occur. • IP Address / Prefix Specify the IP address using CIDR notation. For example: 192.168.1.1/24 Because the prefix is specified in the form of a 24-bit subnet mask (255.255.255.0) for 192.168.1.1, the addresses 192.168.1.xxx are valid.
Remote IP Address	<ul style="list-style-type: none"> • Any If you select Any, all IP addresses are enabled. • IP Address Type the specified IP address (IPv4 or IPv6) in the text box. • IP Address Range Type the starting and ending IP addresses for the IP address range. If the starting and ending IP addresses are not standardised to IPv4 or IPv6, or the ending IP address is smaller than the starting address, an error will occur. • IP Address / Prefix Specify the IP address using CIDR notation. For example: 192.168.1.1/24

Option	Description
	Because the prefix is specified in the form of a 24-bit subnet mask (255.255.255.0) for 192.168.1.1, the addresses 192.168.1.xxx are valid.

8. Click **Submit**.

When you change the settings for the template currently in use, restart your machine to active the configuration.

- [Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management \(Web Browser\)](#)
- [IEEE 802.1x Authentication Methods](#)

What Is IEEE 802.1x Authentication?

IEEE 802.1x is an IEEE standard for wired and wireless networks that limits access from unauthorised network devices. Your Brother machine (supplicant) sends an authentication request to a RADIUS server (Authentication server) through your access point or HUB. After your request has been verified by the RADIUS server, your machine can access the network.

Related Information

- [Use IEEE 802.1x Authentication for a Wired or a Wireless Network](#)
-

Configure IEEE 802.1x Authentication for a Wired or a Wireless Network Using Web Based Management (Web Browser)

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm whether a CA certificate import is necessary.

You can also configure IEEE 802.1x authentication using Wireless setup wizard from the control panel (Wireless network).

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Do one of the following:
 - For the wired network
Click **Wired** > **Wired 802.1x Authentication**.
 - For the wireless network
Click **Wireless** > **Wireless (Enterprise)**.
6. Configure the IEEE 802.1x authentication settings.

- To enable IEEE 802.1x authentication for wired networks, select **Enabled** for **Wired 802.1x status** on the **Wired 802.1x Authentication** page.
- If you are using **EAP-TLS** authentication, you must select the client certificate installed (shown with certificate name) for verification from the **Client Certificate** drop-down list.
- If you select **EAP-FAST**, **PEAP**, **EAP-TTLS**, or **EAP-TLS** authentication, select the verification method from the **Server Certificate Verification** drop-down list. Verify the server certificate using the CA certificate, imported to the machine in advance, issued by the CA that signed the server certificate.

Select one of the following verification methods from the **Server Certificate Verification** drop-down list:

Option	Description
No Verification	The server certificate can always be trusted. The verification is not performed.
CA Cert.	The verification method to check the CA reliability of the server certificate, using the CA certificate issued by the CA that signed the server certificate.
CA Cert. + ServerID	The verification method to check the common name ¹ value of the server certificate, in addition to the CA reliability of the server certificate.

7. When finished with configuration, click **Submit**.

For wired networks: After configuring, connect your machine to the IEEE 802.1x supported network. After a few minutes, print the Network Configuration Report to check the **<Wired IEEE 802.1x>** status.

Option	Description
Success	The wired IEEE 802.1x function is enabled and the authentication was successful.
Failed	The wired IEEE 802.1x function is enabled; however, the authentication failed.
Off	The wired IEEE 802.1x function is not available.

¹ The common name verification compares the common name of the server certificate to the character string configured for the **Server ID**. Before you use this method, contact your system administrator about the server certificate's common name and then configure **Server ID**.

IEEE 802.1x Authentication Methods

EAP-FAST

Extensible Authentication Protocol-Flexible Authentication via Secured Tunneling (EAP-FAST) has been developed by Cisco Systems, Inc., which uses a user ID and password for authentication, and symmetric key algorithms to achieve a tunnelled authentication process.

The Brother machine supports the following inner authentication methods:

- EAP-FAST/NONE
- EAP-FAST/MS-CHAPv2
- EAP-FAST/GTC

EAP-MD5 (Wired network)

Extensible Authentication Protocol-Message Digest Algorithm 5 (EAP-MD5) uses a user ID and password for challenge-response authentication.

PEAP

Protected Extensible Authentication Protocol (PEAP) is a version of EAP method developed by Cisco Systems, Inc., Microsoft Corporation and RSA Security. PEAP creates an encrypted Secure Sockets Layer (SSL)/Transport Layer Security (TLS) tunnel between a client and an authentication server, for sending a user ID and password. PEAP provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:

- PEAP/MS-CHAPv2
- PEAP/GTC

EAP-TTLS

Extensible Authentication Protocol-Tunneled Transport Layer Security (EAP-TTLS) has been developed by Funk Software and Certicom. EAP-TTLS creates a similar encrypted SSL tunnel to PEAP, between a client and an authentication server, for sending a user ID and password. EAP-TTLS provides mutual authentication between the server and the client.

The Brother machine supports the following inner authentications:

- EAP-TTLS/CHAP
- EAP-TTLS/MS-CHAP
- EAP-TTLS/MS-CHAPv2
- EAP-TTLS/PAP

EAP-TLS

Extensible Authentication Protocol-Transport Layer Security (EAP-TLS) requires digital certificate authentication both at a client and an authentication server.

Introduction to Active Directory Authentication

Active Directory Authentication restricts the use of your machine. If Active Directory Authentication is enabled, the machine's control panel will be locked. You cannot change the machine's settings until you enter a User ID and password.

You can change the Active Directory Authentication settings using Web Based Management.

Related Information

- [Use Active Directory Authentication](#)
-

Configure Active Directory Authentication Using Web Based Management

Active Directory authentication supports Kerberos authentication and NTLMv2 authentication. You must configure the SNTP protocol (network time server) and DNS server configuration for authentication.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
For example:
https://192.168.1.2
3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Administrator > User Restriction Function**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. Select **Active Directory Authentication**.
6. Click **Submit**.
7. Select the **Active Directory Authentication** menu.
8. Configure the following settings:

Option	Description
Remember User ID	Select this option to save your User ID.
Active Directory Server Address	Type the IP address or the server name (for example: ad.example.com) of the Active Directory Server.
Active Directory Domain Name	Type the Active Directory domain name.
Protocol & Authentication Method	Select the protocol and authentication method.
LDAP Server Port	Type the port number to connect the Active Directory server via LDAP (available only for LDAP + kerberos authentication method).

9. Click **Submit**.

Use Secure Function Lock 3.0

Secure Function Lock 3.0 increases security by restricting the functions available on your machine.

- [Before Using Secure Function Lock 3.0](#)
- [Configure Secure Function Lock 3.0 Using Web Based Management](#)
- [Configure Public Mode for Secure Function Lock 3.0](#)
- [Additional Secure Function Lock 3.0 Features](#)
- [Register a new IC Card Using the Machine's Control Panel](#)
- [Register an External IC Card Reader](#)

Before Using Secure Function Lock 3.0

Use Secure Function Lock to configure passwords, set specific user page limits, and grant access to some or all of the functions listed here.

You can configure and change the following Secure Function Lock 3.0 settings using Web Based Management:

- **Print**

Print includes print jobs sent via AirPrint, Brother iPrint&Scan, and Brother Mobile Connect.

If you register users' logon names in advance, the users will not need to enter their passwords when they use the print function.

- **Media**

- **Web Connect** (supported models only)

- **Page Limits (*)**

- **Colour Print**

- **Page Counters**

- **Card ID (NFC ID)** (supported models only)

Related Information

- [Use Secure Function Lock 3.0](#)

Configure Secure Function Lock 3.0 Using Web Based Management

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Administrator > Restriction Management** or **User Restriction Function**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. Select **Secure Function Lock**.
6. Click **Submit**.
7. Click the **Restricted Functions** menu.
8. In the **User List / Restricted Functions** field, type a group name or user name.
9. In the **Print** and the other columns, select a checkbox to allow or clear a checkbox to restrict the function listed.
10. To configure the maximum page count, select the **On** checkbox in the **Page Limits** column, and then type the maximum number in the **Max. Pages** field.
11. Click **Submit**.
12. Click the **User List** menu.
13. In the **User List** field, type the user name.
14. In the **Password** field, type a password.

The number of characters you can set differs depending on the model.

15. To register the user's Card ID, type the card number in the **Card ID (NFC ID)** field (available only for certain models).
16. Select **User List / Restricted Functions** from the drop-down list for each user.
17. Click **Submit**.

You can also change the user list lockout settings in the **Secure Function Lock** menu.

Configure Email Sending Using Web Based Management

We recommend using Web Based Management to configure secured email sending with user authentication, or email sending using SSL/TLS.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
For example:
https://192.168.1.2
3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. In the **SMTP Client** field, click **Advanced Settings** and make sure the status of **SMTP Client** is **Enabled**.
6. Configure the **SMTP Client** settings.
 - Confirm that the email settings are correct after configuration by sending a test email.
 - If you do not know the SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
7. When finished, click **Submit**.
The **Test Send E-mail Configuration** dialog box appears.
8. Follow the instructions in the dialog box to test the current settings.

Send an Email with User Authentication

Your machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorised users from accessing the email server.

You can use the SMTP-AUTH method for email notification and email reports (available for certain models).

We recommend using Web Based Management to configure the SMTP authentication.

Email Server Settings

You must configure your machine's SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication: in the Web Based Management **SMTP Client** screen, under **Server Authentication Method**, you must select **SMTP-AUTH**.

Related Information

- [Send an Email Securely](#)

Send an Email Securely Using SSL/TLS

Your Brother machine supports SSL/TLS communication methods. To use email server that is using SSL/TLS communication, you must configure following settings.

We recommend using Web Based Management to configure SSL/TLS.

Verify Server Certificate

Under **SSL/TLS**, if you choose **SSL** or **TLS**, the **Verify Server Certificate** checkbox will be selected automatically.

- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.
- If you do not need to verify the server certificate, clear the **Verify Server Certificate** checkbox.

Port Number

If you select **SSL**, or **TLS**, the **Port** value will be changed to match the protocol. To change the port number manually, type the port number after you select **SSL/TLS** settings.

You must configure your machine's communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

SMTP	Port	25
	Server Authentication Method	SMTP-AUTH
	SSL/TLS	TLS

- [Register an Account on Your Brother Machine for Brother Web Connect](#)

Brother Web Connect Setup Overview

Configure the Brother Web Connect settings using the following procedure:

Step 1: Create an account with the service you want to use.

Access the service's website using a computer and create an account. (If you already have an account, there is no need to create an additional account.)

1. User registration
2. Web Service
3. Obtain account

Step 2: Apply for Brother Web Connect access.

Start Brother Web Connect access using a computer and obtain a temporary ID.

1. Enter account information
2. Brother Web Connect application page
3. Obtain temporary ID

Step 3: Register your account information on your machine so you can access the service you want to use.

Enter the temporary ID to enable the service on your machine. Specify the account name as you would like it to be displayed on the machine, and enter a PIN if you would like to use one.

1. Enter temporary ID
2. Web Service

Your Brother machine can now use the service.

Create an Account for Each Online Service Before Using Brother Web Connect

To use Brother Web Connect to access an online service, you must have an account with that online service. If you do not already have an account, use a computer to access the service's website and create an account. After creating an account, log on and use the account once with a computer before using the Brother Web Connect feature. Otherwise, you may not be able to access the service using Brother Web Connect.

If you already have an account, there is no need to create an additional account.

After you finish creating an account with the online service you want to use, apply for Brother Web Connect access.

Related Information

- [Set Up Brother Web Connect](#)
-

Apply for Brother Web Connect Access

To use Brother Web Connect to access online services, you must first apply for Brother Web Connect access using a computer that has the Brother Software installed.

1. Access the Brother Web Connect application website:

Option	Description
Windows	Launch  (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Do More in the left navigation bar, and then click Brother Web Connect .
	 You can also access the website directly: Type bwc.brother.com into your web browser's address bar.
Mac	Type bwc.brother.com into your web browser's address bar.

The Brother Web Connect page launches.

2. Select the service you want to use.
3. Follow the on-screen instructions and apply for access.

When finished, your temporary ID will appear.

Get connected with Brother Web Connect

Finished the registration.

Please enter the following temporary ID on the LCD screen of your machine.

Temporary ID (11 digits)

XXX XXXX XXXX

NOTE : The temporary ID will expire in 24 hours.

4. Make a note of your temporary ID, as you will need it to register accounts to the machine. The temporary ID is valid for 24 hours.
5. Close the web browser.

Now that you have a Brother Web Connect access ID, you must register this ID on your machine, and then use your machine to access the web service you want to use.

Register an Account on Your Brother Machine for Brother Web Connect

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- You must apply for Brother Web Connect access to register an account on your machine.
- Before you register an account, confirm that the correct date and time are set on the machine's control panel.

1. Press [Functions] > [Web].

- If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. Press ▲ or ▼ to display the service with which you want to register.

Press the service name.

3. If information regarding Brother Web Connect appears, press [OK].

4. Press [Register/Delete] > [Register Account].

5. The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access.

Press [OK].

6. Enter the temporary ID using the LCD, and then press [OK].

An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Either enter the temporary ID correctly, or apply for access again and receive a new temporary ID.

7. The machine will prompt you to enter the account name that you want to be displayed on the LCD.

Press [OK].

8. Enter the name using the LCD, and then press [OK].

9. Do one of the following:

- To set a PIN for the account, press [Yes]. (A PIN prevents unauthorised access to the account.) Enter a four-digit number, and then press [OK].
- If you do not want to set a PIN, press [No].

When the account information you entered appears, confirm that it is correct.

10. Press [Yes] to register your information as entered.

11. Press [OK].

Account registration is complete and your machine can now access the service.

12. Press .

Download and Print Documents Using Brother Web Connect

Documents that have been uploaded to your account can be downloaded directly to your machine and printed. Documents that other users have uploaded to their own accounts for sharing can also be downloaded to your machine and printed, as long as you have viewing privileges for those documents.

To download other users' documents, you must have access privileges to view the corresponding albums or documents.

If you are a restricted user for Web Connect due to the Secure Function Lock feature (available for certain models), you cannot download the data.

The Secure Function Lock Page Limit feature applies to the print job using Web Connect.

For Hong Kong, Taiwan and Korea:

Brother Web Connect supports only file names written in English. Files named in the local language will not be downloaded.

-

Download and Print Using Web Services

1. Press [Functions] > [Web].

- If information regarding the Internet connection appears on the machine's LCD, read the information and press [OK].
- Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].

2. Press ▲ or ▼ to display the service that hosts the document you want to download and print.

Press the service name.

3. Press ▲ or ▼ to display your account name, and then press it. If the PIN entry screen appears, enter the four-digit PIN and press [OK].

4. Press ▲ or ▼ to display the album you want, and then press it.

- An album is a collection of documents. However, the actual term may differ depending on the service you use. When using Evernote®, you must select the notebook, and then select the note.
- Some services do not require documents to be saved in albums. For documents not saved in albums, select [See Unsorted Files] to select documents.

5. Press the file name you want to print. Confirm the document on the LCD and press [OK]. Select additional documents to print (you can select up to 10 documents).

6. When finished, press [OK].

7. Follow the on-screen instructions to complete this operation.

Troubleshooting

If you think there is a problem with your machine, first check each of the items below, then try to identify the problem, and follow our troubleshooting tips.

You can correct most problems yourself. If you need additional help, visit support.brother.com for the latest FAQs and troubleshooting tips:

1. Visit support.brother.com.
2. Click **FAQs & Troubleshooting** and search for your model name.

First, check the following:

- The machine's power cord is connected correctly and the machine's power is on.
- All of the machine's protective parts have been removed.
- The ink cartridges are installed correctly.
- The Top Cover and the Jam Clear Cover are fully closed.
- Paper is inserted correctly in the paper tray.
- The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
- (For network models) The access point (for wireless), router, or hub is turned on and its link indicator is blinking.
- The machine's LCD is displaying messages.

If you did not solve the problem with the checks, identify the problem and then see *Related Information*.

Error and Maintenance Messages

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

You can correct most errors and perform routine maintenance yourself. If you need more tips, go to your model's [FAQs & Troubleshooting](#) page at support.brother.com.

Related Information references are at the bottom of this page.

Error Message	Cause	Action
B&W Print Only	<p>One or more of the colour ink cartridges have reached the end of their lives.</p> <p>You can use the machine in monochrome mode for approximately four weeks depending on the number of pages you print.</p> <p>If this message appears on the LCD, the print operation works as follows:</p> <p>Printing</p> <p>If the media type is set to Plain Paper and you selected Greyscale in the printer driver, you can use the machine as a monochrome printer.</p>	<p>Replace the ink cartridges.</p> <p><i>See Related Information: Replace the Ink Cartridges.</i></p> <p>Although the Cause column lists options for using the machine after this error appears, you may not be able to use the machine until you replace one or more of the ink cartridges under the following condition:</p> <p>If you unplug the machine or remove the ink cartridge.</p>
<p>Cannot Clean XX</p> <p>Cannot Initialise XX</p> <p>Cannot Print XX</p>	<p>The machine has a mechanical problem.</p> <p>-OR-</p> <p>A foreign object, such as a paper clip or a piece of ripped paper, is in the machine.</p>	<p>Open the top cover and remove any foreign objects and paper scraps from inside the machine. Cannot Detect	<p>You installed a new ink cartridge too quickly and the machine did not detect it.</p> <p>An ink cartridge is not installed correctly.</p> <p>The wrong Brother model ink cartridge was installed.</p>	<p>Take out the new ink cartridge and reinstall it slowly and firmly until it locks into place.</p> <p><i>See Related Information: Replace the Ink Cartridges.</i></p> <p>Check the model numbers of the ink cartridges and install the correct ink cartridges.</p>
Connection Error	Other devices are trying to connect to the Wi-Fi Direct network at the same time.	Make sure there are no other devices trying to connect to the Wi-Fi Direct network, and then try to configure the Wi-Fi Direct settings again.
Connection Failed	The Brother machine and your mobile device cannot communicate during the Wi-Fi Direct network configuration.	<ul style="list-style-type: none"> • Move the mobile device closer to your Brother machine. • Move your Brother machine and the mobile device to an obstruction-free area. • If you are using the PIN Method of WPS, make sure you have entered the correct PIN.

Error Message	Cause	Action
Cover is Open.	The top cover is not locked in the closed position.	Lift the top cover and then close it again. Make sure the interface cable (if used) has been guided correctly through the cable channel and out the back of the machine.
	The ink cartridge cover is not locked in the closed position.	Firmly close the ink cartridge cover until it locks into place.
Data Remaining in Memory	Print data is left in the machine's memory.	Press  . The machine will cancel the job and clear it from the memory. Try to print again.
High Temperature	The room temperature is too high.	After cooling the room, allow the machine to cool down to room temperature. Try again when the machine has cooled down.
Hub is Unusable.	A hub or USB flash drive with hub has been connected to the USB direct interface.	Hubs, including a USB flash drive with a built-in hub, are not supported. Unplug the device from the USB direct interface.
Ink Absorber NearFull	The ink absorber box is nearly full.	The ink absorber box must be replaced soon. Contact Brother customer service or your local Brother dealer.
Ink Absorber Pad Full	The ink absorber box is full. These components are periodic maintenance items that may require replacement after a period of time to ensure optimum performance from your Brother machine. Because these components are periodic maintenance items, the replacement is not covered under the warranty. The need to replace these items and the time period before replacement is dependent on the number of purges and flushes required to clean the ink system. These boxes acquire amounts of ink during the different purging and flushing operations. The number of times a machine purges and flushes for cleaning varies depending on different situations. For example, frequently powering the machine on and off will cause numerous cleaning cycles since the machine automatically cleans upon power up.	The ink absorber box must be replaced. Contact Brother customer service or your local Brother Authorised Service Centre to have your machine serviced. The machine cleans itself after: <ul style="list-style-type: none"> You remove the power cord and plug it back in. A paper jam has been cleared. Sitting idle for more than 30 days (infrequent use). Ink cartridges of the same colour have been replaced 12 times.
Ink Low	The ink level is low.	Prepare a new ink cartridge. You can continue printing until the touchscreen displays <i>Replace Ink</i> . <i>See Related Information: Replace the Ink Cartridges.</i>
Install Ink	An ink cartridge is not installed correctly.	Remove the ink cartridge and re-install it slowly and firmly until it locks into place. <i>See Related Information: Replace the Ink Cartridges.</i>
Jam Front/Rear Jam Front Jam Rear Jam MP Tray Jam Front/MP Tray Jam Tray2	The paper is jammed in the machine.	Gently remove the jammed paper. <i>See Related Information: Printer Jam or Paper Jam.</i> If there is a repeat paper jam, try another paper jam clear operation.

Error Message	Cause	Action
Repeat Jam XX		See <i>Related Information: Remove Paper Scraps</i> .
	The paper guides are not set to the correct paper size.	Make sure the paper guides are set to the correct paper size.
	The machine's paper support is not set correctly.	Make sure the paper support is fully inserted into the machine. See <i>Related Information: Paper is Jammed in the Front of the Machine</i> .
	Paper dust has accumulated on the surface of the paper pick-up rollers.	Clean the paper pick-up rollers. See <i>Related Information: Clean the Paper Pick-up Rollers for Paper Tray #1 or Clean the Paper Pick-up Rollers for Paper Tray #2</i> .
Low Temperature	The room temperature is too low.	After warming the room, allow the machine to warm up to room temperature. Try again when the machine has warmed up.
No Device	When configuring the Wi-Fi Direct network, the Brother machine cannot find your mobile device.	<ul style="list-style-type: none"> • Make sure your machine and mobile device are in the Wi-Fi Direct mode. • Move the mobile device closer to your Brother machine. • Move your Brother machine and the mobile device to an obstruction-free area. • If you are manually configuring the Wi-Fi Direct network, make sure you have entered the correct password. • If your mobile device has a configuration page for how to obtain an IP address, make sure the IP address of your mobile device has been configured via DHCP.
No File	The USB flash drive in the media drive does not contain a .JPG file.	Reinsert the correct USB flash drive in the slot.
No Paper Fed	The machine is out of paper or paper is not correctly loaded in the paper tray.	Do one of the following: <ul style="list-style-type: none"> • Refill the paper tray, and then follow the LCD instructions. • Remove and reload the paper, and then follow the LCD instructions. See <i>Related Information: Load Paper</i> .
	The paper was not inserted in the centre position of the MP tray.	Remove the paper and reinsert it in the centre of the MP tray, and then follow the LCD instructions. See <i>Related Information: Load Paper in the Multi-purpose Tray (MP Tray)</i> .
	The Jam Clear Cover is not closed correctly.	Make sure the Jam Clear Cover is closed evenly at both ends. See <i>Related Information: Printer Jam or Paper Jam</i> .
	Paper dust has accumulated on the surface of the paper pick-up rollers.	Clean the paper pick-up rollers. See <i>Related Information: Clean the Paper Pick-up Rollers for Paper Tray #1 or Clean the Paper Pick-up Rollers for Paper Tray #2</i> .

Error Message	Cause	Action
No Response	The connected USB device is unresponsive.	Unplug the device from the USB direct interface.
Out of Memory	The machine's memory is full.	Press  and reduce the print resolution.
Paper Low Tray 1 Paper Low Tray 2	The paper tray is nearly empty.	Refill the paper in the paper tray indicated on the LCD.
Paper Size Mismatch	<p>The paper size setting does not match the size of paper in the tray.</p> <p>-OR-</p> <p>The paper orientation is not correct for the paper size.</p> <p>-OR-</p> <p>You did not set the paper guides in the tray to the indicators for the paper size you are using.</p>	<ol style="list-style-type: none"> 1. Check that the paper size you selected on the machine's display matches the size of the paper in the tray. <i>See Related Information: Change the Paper Size and Paper Type.</i> 2. Make sure you loaded the paper in the correct orientation and set the paper guides at the indicators for your paper size. <i>See Related Information: Load Paper.</i> 3. After you have checked the paper size and the paper orientation, follow the LCD instructions.
		<p>If you are printing from your computer, make sure the paper size you selected in the printer driver or in the application you use to print matches the size of paper in the tray.</p> <p><i>See Related Information: Print Settings (Windows).</i></p>
Paper Tray 1 not detected	The paper tray is not completely inserted.	Slowly push the paper tray completely into the machine.
Paper Tray 2 not detected	Paper or a foreign object has prevented the paper tray from being inserted correctly.	Pull the paper tray out of the machine, and remove the jammed paper or foreign object. If you cannot find or remove the jammed paper, see <i>Related Information: Printer Jam or Paper Jam</i> .
Repetitive No Paper Fed	The machine is out of paper or paper is not correctly loaded in the paper tray.	<p>Do one of the following:</p> <ul style="list-style-type: none"> • Refill the paper tray, and then follow the LCD instructions. • Remove and reload the paper, and then follow the LCD instructions. <p><i>See Related Information: Load Paper.</i></p>
	Paper dust has accumulated on the surface of the paper pick-up rollers.	<p>Clean the paper pick-up rollers.</p> <p><i>See Related Information: Clean the Paper Pick-up Rollers for Paper Tray #1 or Clean the Paper Pick-up Rollers for Paper Tray #2.</i></p>

Error Messages When Using the Brother Web Connect Feature

Your Brother machine displays an error message if an error occurs. The most common error messages are shown in the chart.

You can correct most errors yourself. If you need more tips, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

Connection Error

Error Messages	Cause	Action
Connection Error 02	The machine is not connected to a network.	<ul style="list-style-type: none"> Verify that the network connection is good. If the Web option was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 03	<ul style="list-style-type: none"> Network or server settings are incorrect. There is a problem with the network or server. 	<ul style="list-style-type: none"> Confirm that network settings are correct, or wait and try again later. If the Web option was pressed soon after the machine was turned on, the network connection may not have been established yet. Wait and try again.
Connection Error 07	Date and time settings are incorrect.	Set the date and time correctly. Note that if the machine's power cord is disconnected, the date and time settings may have reset to factory settings.

Authentication Error

Error Messages	Cause	Action
Authentication Error 01	The PIN you entered to access the account is incorrect. The PIN is the four-digit number that was entered when registering the account to the machine.	Enter the correct PIN.
Authentication Error 02	The temporary ID that was entered is incorrect.	Enter the correct temporary ID.
	The temporary ID that was entered has expired. A temporary ID is valid for 24 hours.	Apply for Brother Web Connect access again and receive a new temporary ID, and then use the new ID to register the account to the machine.
Authentication Error 03	The name you entered as the display name has already been registered to another service user.	Enter a different display name.

Server Error

Error Messages	Cause	Action
Server Error 01	The machine's authentication information (needed to access the service) has expired or is invalid.	Apply for Brother Web Connect access again to receive a new temporary ID, and then use the new ID to register the account to the machine.
Server Error 13	There is a problem with the service and it cannot be used now.	Wait and try again. If you get the message again, access the service from a computer to confirm if it is unavailable.

Printer Jam or Paper Jam

Locate and remove the jammed paper.

- [Paper is Jammed in the Front of the Machine](#)
- [Paper is Jammed in the Back of the Machine](#)
- [Remove Paper Scraps](#)
- [Error and Maintenance Messages](#)
- [Paper Handling and Printing Problems](#)

Paper is Jammed in the Front of the Machine

If the LCD displays the following paper jam messages, follow these steps:

- [Jam Front/Rear], [Repeat Jam Front/Rear]
- [Jam Front], [Repeat Jam Front]
- [Jam Front/MP Tray], [Repeat Jam Front/MP Tray]

1. Unplug the machine from the electrical socket.
2. If the paper is loaded in the MP tray, remove the paper.
3. Pull Tray #1 (1) completely out of the machine as shown by the arrow.

 If your LCD displays repeat paper jam messages, for example [Repeat Jam Front/Rear], lift the paper support (1), and then pull it at an angle completely out of the machine as shown by the arrow.

When finished, continue with the next step.

4. Slowly remove the jammed paper (1).

If your LCD displays repeat paper jam messages, for example [Repeat Jam Front/Rear], do the following:

- a. Lift the flap, and remove the jammed paper.

- b. Make sure you look carefully inside (1) for any scraps of paper.

When finished, continue with the next step.

5. Using both hands, use the finger holds on each side of the machine to lift the top cover (1) into the open position.

6. Slowly pull the jammed paper (1) out of the machine.

If your LCD displays repeat paper jam messages, for example [Repeat Jam Front/Rear], move the print head, and then remove any paper remaining in this area. Make sure pieces of paper are not left in the corners of the machine (1) and (2).

When finished, continue with the next step.

IMPORTANT

- If the print head is in the right corner as shown in the illustration, you cannot move the print head. Close the top cover, and then reconnect the power cord. Open the top cover again, and then hold down  until the print head moves to the centre. Then unplug the machine from the power source and remove the paper.

- If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head and remove the paper.
- If ink gets on your skin or clothing, immediately wash it off with soap or detergent.

7. Gently close the top cover using the finger holds on each side.

8. If your LCD displays [Jam Front/Rear] or [Repeat Jam Front/Rear], do the following:

- a. Open the Jam Clear Cover (1) at the back of the machine.

- b. Make sure you look carefully inside for jammed paper and slowly pull it out of the machine.

- c. Close the Jam Clear Cover. Make sure the cover is closed completely.

9. If your LCD displays [Jam Front/MP Tray] or [Repeat Jam Front/MP Tray], make sure you look carefully inside the MP tray for jammed paper. Push the release lever (1) towards the back of the machine, and then slowly pull the jammed paper out of the MP tray.

10. If your LCD displays repeat paper jam messages, for example [Repeat Jam Front/Rear], and you removed the paper support, put it firmly back in the machine. Make sure you fit the paper support into the channels.

11. Slowly push Tray #1 completely into the machine.

12. Reconnect the power cord.

If there is a repeat paper jam, a small piece of paper may be stuck in the machine.
See *Related Information: Remove Paper Scraps*.

Paper is Jammed in the Back of the Machine

If the LCD displays the following paper jam messages, follow these steps:

- [Jam Rear], [Repeat Jam Rear]
 - [Jam MP Tray], [Repeat Jam MP Tray]
 - [Jam Tray2], [Repeat Jam Tray2]
1. Unplug the machine from the electrical socket.
 2. If the paper is loaded in the MP tray, remove the paper.
 3. Pull Tray #1 (1) completely out of the machine as shown by the arrow.

 If your LCD displays [Jam Tray2] or [Repeat Jam Tray2], also pull Tray #2 (2) completely out of the machine as shown by the arrow.

When finished, continue with the next step.

4. If your LCD displays [Jam Rear], [Repeat Jam Rear], [Jam Tray2], or [Repeat Jam Tray2], do the following:
 - a. Open the Jam Clear Cover (1) at the back of the machine.

- b. Slowly pull the jammed paper out of the machine.

c. Close the Jam Clear Cover. Make sure the cover is closed completely.

5. If your LCD displays [Jam MP Tray] or [Repeat Jam MP Tray], push the release lever (1) towards the back of the machine, and then slowly pull the jammed paper out of the MP tray.

6. Using both hands, use the finger holds on each side of the machine to lift the top cover (1) into the open position.

7. Slowly pull the jammed paper (1) out of the machine.

If your LCD displays repeat paper jam messages, for example [Repeat Jam Rear], move the print head, and then remove any paper remaining in this area. Make sure pieces of paper are not left in the corners of the machine (1) and (2).

When finished, continue with the next step.

IMPORTANT

- If the print head is in the right corner as shown in the illustration, you cannot move the print head. Close the top cover, and then reconnect the power cord. Open the top cover again, and then hold down  until the print head moves to the centre. Then unplug the machine from the power source and remove the paper.

- If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head and remove the paper.
- If ink gets on your skin or clothing, immediately wash it off with soap or detergent.

8. Gently close the top cover using the finger holds on each side.

9. Slowly push the paper trays completely into the machine.

10. Reconnect the power cord.

If there is a repeat paper jam, a small piece of paper may be stuck in the machine.

Remove Paper Scraps

1. If you repeatedly experience paper jams (3 times or more), the LCD displays a message asking if you want to remove the scraps.
Press [Yes] to return to the Home screen.
2. Press  [Settings] > [Maintenance] > [Remove Paper Scraps].
3. Follow the instructions on the LCD to locate and remove the jammed paper.

During the procedure, you must insert the Maintenance Sheet (included with your machine) into the machine in Landscape orientation through the opening as shown, until you feel it grab the paper. (If you do not have the Maintenance Sheet, use one sheet of thick A4 or Letter size paper, such as glossy paper.)

Printing Difficulties

Difficulties	Suggestions
No printout	<p>(Windows)</p> <p>Check that the correct printer driver has been installed and selected.</p> <p>Check to see if the machine's display is showing an error message. See <i>Related Information: Error and Maintenance Messages</i>.</p> <p>Check that the machine is online:</p> <ul style="list-style-type: none"> Windows 10, Windows Server 2016, and Windows Server 2019 Click  > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers. Right-click the Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected. Windows 8.1 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware and Sound group, click View devices and printers. Right-click the Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected. Windows Server 2012 R2 Click Control Panel on the Start screen. In the Hardware group, click View devices and printers. Right-click the Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected. Windows Server 2012 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers. Right-click the Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model). Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected. Windows 7 and Windows Server 2008 R2 Click  (Start) > Devices and Printers. Right-click Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model) and click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar. Make sure Use Printer Offline is not selected. Windows Server 2008 Click  (Start) > Control Panel > Hardware and Sound > Printers. Right-click Brother XXX-XXXX Printer (where XXX-XXXX is the name of your model). Make sure Use Printer Online is not listed. If it is listed, click this option to set the driver Online. <p>One or more ink cartridges have reached the end of their life.</p>

Difficulties	Suggestions
	<p>See <i>Related Information: Replace the Ink Cartridges</i>.</p> <p>If old, unprinted data remains in the printer driver spooler, it will prevent new print jobs from printing. Open the printer icon and delete all data as follows:</p> <ul style="list-style-type: none"> Windows 10, Windows Server 2016, and Windows Server 2019 Click  > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers > Printers. Windows 8.1 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware and Sound group, click View devices and printers > Printers. Windows Server 2012 R2 Click Control Panel on the Start screen. In the Hardware group, click View devices and printers > Printers. Windows Server 2012 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers > Printers. Windows 7 and Windows Server 2008 R2 Click /Start > Devices and Printers > Printers and Faxes. Windows Server 2008 Click  (Start) > Control Panel > Hardware and Sound > Printers. Mac Click the System Preferences > Printers & Scanners.
The headers or footers appear when the document is displayed on the screen but do not appear when the document is printed.	<p>There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this.</p> <p>See <i>Related Information: Unprintable Area</i>.</p>
Cannot perform 'Page Layout' printing.	<p>(Windows)</p> <p>Check that the paper size setting in the application and in the printer driver are the same.</p>
Print speed is too slow.	<p>(Windows)</p> <p>Try changing the printer driver setting. The highest resolution needs longer data processing, sending, and printing time. Try the other quality settings in the printer driver as follows:</p> <p>In the printer driver, clear the Colour Enhancement checkbox on the Advanced tab.</p> <p>Turn the Borderless feature off. Borderless printing is slower than normal printing. See <i>Related Information: Print Settings (Windows)</i>.</p> <p>Turn the Quiet Mode setting off. Print speed is slower in Quiet Mode. See <i>Related Information: Reduce Printing Noise</i>.</p> <p>Make sure the Media Type setting in the printer drivers, your application, or the Paper Type setting on the machine matches the type of paper you are using. See <i>Related Information: Change the Paper Size and Paper Type</i>. See <i>Related Information: Print Settings (Windows)</i>.</p>

Print Quality Difficulties

Difficulties	Suggestions
Poor print quality	<p>Check the print quality.</p> <p>See <i>Related Information: Check the Print Quality</i>.</p>

Difficulties	Suggestions
	<p>Make sure the Media Type setting in the printer drivers, your application, or the Paper Type setting on the machine matches the type of paper you are using. See <i>Related Information: Change the Paper Size and Paper Type</i>. See <i>Related Information: Print Settings (Windows)</i>.</p> <p>Make sure your ink cartridges are fresh. The following may cause ink to clog:</p> <ul style="list-style-type: none"> • The expiration date written on the cartridge package has passed. • The ink cartridge may not have been stored correctly before use. <p>Make sure you are using one of the recommended types of paper. See <i>Related Information: Acceptable Print Media</i>.</p> <p>The recommended environment for your machine is between 20°C to 33°C.</p>
<p>White lines appear in text or graphics.</p> 	<p>Clean the print head. See <i>Related Information: Clean the Print Head from Your Brother Machine</i>. See <i>Related Information: Clean the Print Head Using Web Based Management</i>. See <i>Related Information: Clean the Print Head from Your Computer (Windows)</i>.</p> <p>Check and adjust the paper feed. See <i>Related Information: Correct the Paper Feed to Clear Vertical Lines</i>.</p> <p>Try using the recommended types of paper. See <i>Related Information: Acceptable Print Media</i>.</p> <p>To prolong print head life, provide the best ink cartridge economy and maintain print quality, we do not recommend frequently unplugging the machine and/or leaving the machine unplugged for extended periods of time. We recommend using  to power down the machine. Using  allows minimal power to the machine, resulting in periodic, but less frequent, cleaning of the print head.</p>
<p>Dark lines appear at regular intervals.</p> 	<p>Check and adjust the paper feed. See <i>Related Information: Correct the Paper Feed to Clear Vertical Lines</i>.</p>
<p>The machine prints blank pages.</p>	<p>Check the print quality. See <i>Related Information: Check the Print Quality</i>.</p> <p>To prolong print head life, provide the best ink cartridge economy and maintain print quality, we do not recommend frequently unplugging the machine and/or leaving the machine unplugged for extended periods of time. We recommend using  to power down the machine. Using  allows minimal power to the machine, resulting in periodic, but less frequent, cleaning of the print head.</p>
<p>Characters and lines are blurred.</p> 	<p>Check the printing alignment. See <i>Related Information: Check the Print Alignment from Your Brother Machine</i>.</p> <p>Change the print options. See <i>Related Information: Change the Print Options to Improve Your Print Results</i>.</p>
<p>Printed text or images are skewed.</p>	<p>Make sure the paper is loaded correctly in the paper tray and the paper guides are adjusted correctly. See <i>Related Information: Load Paper</i>.</p> <p>Make sure the Jam Clear Cover is closed correctly.</p>

Difficulties	Suggestions
There are smudges or stains at the top centre of the printed page.	Make sure the paper is not too thick or curled. See <i>Related Information: Acceptable Print Media</i> .
Printing appears dirty or ink seems to run.	Make sure you are using the recommended types of paper. Do not handle the paper until the ink is dry. See <i>Related Information: Acceptable Print Media</i> .
	Make sure the printing surface is face down in the paper tray.
	If you are using photo paper, make sure the glossy side of the photo paper is face down in the tray and you have set the correct paper type. If you are printing a photo from your computer, set the Media Type in the printer driver or in the application you use to print.
Ink is smudged or wet when using glossy photo paper.	Be sure to check the front and back of the paper. Place the glossy surface (printing surface) face down. See <i>Related Information: Change the Paper Size and Paper Type</i> .
	If you use glossy photo paper, make sure the paper type setting is correct.
Stains appear on the reverse side or at the bottom of the page.	Make sure the printer platen is not dirty with ink. See <i>Related Information: Clean the Machine's Printer Platen</i> .
	Make sure you are using the paper support flap. See <i>Related Information: Load Paper</i> .
	Make sure the paper feed rollers are not dirty with ink. See <i>Related Information: Clean the Paper Feed Rollers</i> .
The printouts are wrinkled.	(Windows) In the printer driver, select the Advanced tab, click Other Print Options , and then click Advanced Colour Settings . Clear the Bi-Directional Printing checkbox.
Smudge or stain on the reverse side of the page when using the automatic 2-sided printing feature.	(Windows) Change the Reduce Smudge option in your printer driver properties or preferences. See <i>Related Information: Prevent Smudged Printouts and Paper Jams (Windows)</i> .

Paper Handling Difficulties

Difficulties	Suggestions
The machine does not feed paper.	Make sure the paper tray is pushed in all the way until it locks into place.
	Make sure the Jam Clear Cover at the back of the machine is closed.
	If the machine's LCD displays a Paper Jam message and you still have a problem, see <i>Related Information: Error and Maintenance Messages</i> .
	If the paper tray is empty, load a new stack of paper into the paper tray.
	If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back in the paper tray.
	Reduce the amount of paper in the paper tray, and then try again.
	Clean the paper pick-up rollers. See <i>Related Information: Clean the Paper Pick-up Rollers for Paper Tray #1 or Clean the Paper Pick-up Rollers for Paper Tray #2</i> .
	Make sure that the paper is within specifications for the machine. See <i>Related Information: Paper Orientation and Capacity of the Paper Trays</i> .
Photo paper does not feed correctly.	When you print on photo paper, load one extra sheet of the same photo paper in the paper tray.

Difficulties	Suggestions
Machine feeds multiple pages.	<ul style="list-style-type: none"> • Make sure the paper is loaded correctly in the paper tray. • Remove all the paper from the tray and fan the stack of paper well, then put it back in the tray. • Make sure you do not push the paper in too far. <p>See <i>Related Information: Load Paper</i>.</p>
	<p>Make sure the Jam Clear Cover is closed correctly.</p> <p>See <i>Related Information: Printer Jam or Paper Jam</i>.</p>
	<p>Make sure the Base Pad in the paper tray is not dirty.</p> <p>See <i>Related Information: Clean the Base Pad</i>.</p>
There is a paper jam.	<p>See <i>Related Information: Printer Jam or Paper Jam</i>.</p> <p>Make sure the paper guides are set to the correct paper size.</p>
	<p>Use the jam prevention settings.</p> <p>See <i>Related Information: Prevent Smudged Printouts and Paper Jams (Windows)</i>.</p>
Paper jam reoccurs.	<p>If there is a repeat paper jam, a small piece of paper may be stuck in the machine. Make sure paper is not still jammed in the machine.</p> <p>See <i>Related Information: Remove Paper Scraps</i>.</p>
The paper jams when you use 2-sided print.	<p>If paper jams occur frequently during 2-sided printing, the paper feed rollers may be stained with ink. Clean the paper feed rollers.</p> <p>See <i>Related Information: Clean the Paper Feed Rollers</i>.</p>

Direct Photo Printing Difficulties

Difficulties	Suggestions
Part of my photo is missing when printed.	Make sure Borderless printing and Cropping are turned off. See <i>Related Information: Print Borderless Photos from a USB Flash Drive.</i> See <i>Related Information: Print Photos with Auto Cropping.</i>

Software Difficulties

Difficulties	Suggestions
Cannot print.	Uninstall the drivers (Windows) and the Brother software and reinstall the latest version of both.
"The device is busy." appears on the computer screen.	Make sure there is no error message on the machine's display.

- [If You Are Having Difficulty with Your Machine's Network](#)
- [Troubleshooting](#)

Use the Network Connection Repair Tool (Windows)

Use the Network Connection Repair Tool to fix the Brother machine's network settings. It will assign the correct IP address and Subnet Mask.

Make sure your machine is turned on and is connected to the same network as your computer.

1. Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected).
2. Click **Tools** in the left navigation bar, and then click **Network Connection Repair Tool**.
3. Follow the on-screen instructions.
4. Check the diagnosis by printing the Network Configuration Report.

The Network Connection Repair Tool will start automatically if you select the **Enable Connection Repair Tool** option in the Status Monitor. Right-click the Status Monitor screen, and then click **Other Settings > Enable Connection Repair Tool**. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

If You Are Having Difficulty with Your Machine's Network

For technical help, you must contact Brother customer support.

If you think there is a problem with your machine, check the following topics. You can correct most problems yourself.

If you need additional help, go to your model's **FAQs & Troubleshooting** page at support.brother.com.

>> [I Cannot Complete the Wireless Network Setup Configuration](#)

>> [My Brother Machine Cannot Print over the Network](#)

>> [I Want to Check that My Network Devices are Working Correctly](#)

I Cannot Complete the Wireless Network Setup Configuration

Turn your wireless router off and back on. Then, try to configure the wireless settings again. If you are unable to resolve the problem, follow the instructions below:

Investigate the problem using the WLAN Report.

Cause	Action	Interface
Your security settings (SSID/ Network Key) are not correct.	<p>Confirm the security settings using Wireless Setup Helper. For more information and to download the utility, go to your model's Downloads page at support.brother.com.</p> <p>Select and confirm that you are using the correct security settings.</p> <ul style="list-style-type: none"> - See the instructions supplied with your wireless LAN access point/router for information on how to find the security settings. - The manufacturer's name or model number of the wireless LAN access point/router may be used as the default security settings. - Consult with the access point/router manufacturer, your Internet provider, or network administrator. 	Wireless
Your Brother machine's MAC address is not allowed.	<p>Confirm that the Brother machine's MAC Address is allowed in the filter. You can find the MAC Address on your Brother machine's control panel.</p>	Wireless
Your wireless LAN access point/router is in stealth mode (not broadcasting the SSID).	<ul style="list-style-type: none"> • Enter the correct SSID name or Network Key manually. • Check the SSID name or the Network Key in the instructions supplied with your wireless LAN access point/router and reconfigure the wireless network setup. 	Wireless
The current channel of your wireless LAN access point/router is not supported by your machine when you are trying to connect your machine to a 5 GHz Wi-Fi network.	<p>Change the channel on your wireless LAN access point/router to the channel supported by your machine.</p> <ol style="list-style-type: none"> 1. Confirm the channels supported by your machine. See the Channels Supported by Brother Machines for 5 GHz Wi-Fi Networks document at support.brother.com/manuals. 2. Check your wireless LAN access point/router's channel setting. Make sure it is set to one of the channels supported by your machine and is not set to "Auto" or "Automatic". For more information about changing the channel setting, see the instructions supplied with your wireless LAN access point/router. 3. Try to connect your machine to your Wi-Fi network again. 	Wireless
Your security settings (SSID/ password) are not correct.	<p>Confirm the SSID and password.</p> <p>When you are configuring the network manually, the SSID and password are displayed on your Brother machine. If your mobile device supports the manual configuration, the SSID and password will be displayed on your mobile device's screen.</p>	Wi-Fi Direct
You are using Android™ 4.0.	<p>If your mobile device disconnects (approximately six minutes after using Wi-Fi Direct), try the one-push configuration using WPS (recommended) and set the Brother machine as a Group Owner.</p>	Wi-Fi Direct

Cause	Action	Interface
Your Brother machine is placed too far from your mobile device.	Move your Brother machine within about 3.3 feet (1 metre) of the mobile device when you configure the Wi-Fi Direct network settings.	Wi-Fi Direct
There are some obstructions (walls or furniture, for example) between your machine and the mobile device.	Move your Brother machine to an obstruction-free area.	Wi-Fi Direct
There is a wireless computer, Bluetooth®-supported device, microwave oven, or digital cordless phone near the Brother machine or the mobile device.	Move other devices away from the Brother machine or the mobile device.	Wi-Fi Direct
You have checked and tried all of the above, but your Brother machine still cannot complete the Wi-Fi Direct configuration.	<ul style="list-style-type: none"> Turn your Brother machine off and back on. Then, try to configure the Wi-Fi Direct settings again. If you are using your Brother machine as a client, confirm how many devices are allowed in the current Wi-Fi Direct network, and then check how many devices are connected. 	Wi-Fi Direct

For Windows

If your wireless connection has been interrupted, and you have checked and tried all of the above, we recommend using the Network Connection Repair Tool.

My Brother Machine Cannot Print over the Network

Cause	Action	Interface
Your security software blocks your machine's access to the network.	Some security software might block access without showing a security alert dialog box even after successful installation. To allow access, see the instructions for your security software or ask the software manufacturer.	Wired/Wireless
Your Brother machine was not assigned an available IP address.	<ul style="list-style-type: none"> Confirm the IP address and the Subnet Mask. Verify that both the IP addresses and Subnet Masks of your computer and the Brother machine are correct and located on the same network. For more information about how to verify the IP address and the Subnet Mask, ask your network administrator. Windows Confirm the IP address and the Subnet Mask using the Network Connection Repair Tool. Mac Check your network devices using the ping command. For more information on how to confirm your network settings, see <i>Related Information: Check Network Devices Using the Ping Command</i>. 	Wired/Wireless
The failed print job is still in your computer's print queue.	<ul style="list-style-type: none"> If the failed print job is still in your computer's print queue, delete it. Otherwise, double-click the printer icon in the following folder and cancel all documents: <ul style="list-style-type: none"> Windows 10, Windows Server 2016, and Windows Server 2019 Click  > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers. Windows 8.1 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. 	Wired/Wireless

Cause	Action	Interface
	<p>In the Hardware and Sound group, click View devices and printers.</p> <ul style="list-style-type: none"> - Windows Server 2012 R2 Click Control Panel on the Start screen. In the Hardware group, click View devices and printers. - Windows Server 2012 Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel. In the Hardware group, click View devices and printers > Printers. - Windows 7 Click  (Start) > Devices and Printers. - Windows Server 2008 Click Start > Control Panel > Printers. - Mac Click System Preferences > Printers & Scanners. 	
Your Brother machine is not connected to the wireless network.	Print the WLAN Report to check the error code on the printed report.	Wireless

If you have checked and tried all of the above, but your Brother machine still cannot print, uninstall the driver (Windows) and reinstall it.

I Want to Check that My Network Devices are Working Correctly

Check	Action	Interface
Check that your Brother machine, access point/router, or network hub is turned on.	<p>Check the following:</p> <ul style="list-style-type: none"> • The power cord is connected correctly and the Brother machine is turned on. • The access point/router or hub is turned on and its link indicator is blinking. • All protective packaging has been removed from the machine. • The ink cartridges are installed correctly. • The Top Cover and the Jam Clear Cover are fully closed. • Paper is inserted correctly in the paper tray. • (For wired networks) A network cable is securely connected to the Brother machine and to the router or hub. 	Wired/Wireless
Check that you can "ping" the Brother machine from your computer.	<p>Ping the Brother machine from your computer using the IP address or the node name in the Windows command prompt or Mac Terminal application: ping <ipaddress> or <nodename>.</p> <ul style="list-style-type: none"> • Successful: Your Brother machine is working correctly and connected to the same network as your computer. • Unsuccessful: Your Brother machine is not connected to the same network as your computer. <p>Windows: Ask your administrator about the IP address and the subnet mask, and then use the Network Connection Repair Tool.</p> <p>Mac: Confirm that the IP address and the Subnet Mask are set correctly.</p>	Wired/Wireless
Check that your Brother machine is connected to the wireless network.	Print the WLAN Report to check the error code on the printed report.	Wireless

If you have checked and tried all of the above but you are still having problems, see the instructions supplied with your wireless LAN access point/router to find the SSID (Network Name) and the Network Key (Password) information and set them correctly.

Related Information

- [Network Problems](#)
 - [Check Network Devices Using the Ping Command](#)

Related Topics:

- [Configure Your Machine for a Wireless Network When the SSID is Not Broadcast](#)

 - [Wireless LAN Report Error Codes](#)
 - [Print the Network Configuration Report](#)
 - [Use the Network Connection Repair Tool \(Windows\)](#)
-

Check Network Devices Using the Ping Command

Check the IP addresses of both your computer and your Brother machine, and then confirm whether the network is operating correctly.

- >> [Configure the IP Address on your computer \(Windows\)](#)
- >> [Configure the IP Address on your computer \(Mac\)](#)
- >> [Configure the IP Address on your Brother machine](#)

Configure the IP Address on your computer (Windows)

- Do one of the following:
 - Windows 10
Click  > **Windows System** > **Command Prompt**.
 - Windows 8.1
Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Search** > **Command Prompt**.
 - Windows7
Click  (**Start**) > **All Programs** > **Accessories** > **Command Prompt**.
- Type "ipconfig" and then press the Enter key on your keyboard.
- Confirm the values for the IPv4 address and subnet mask.
- Type "exit" and then press the Enter key on your keyboard.

Configure the IP Address on your computer (Mac)

- Select **System Preferences** from the Apple menu.
- Click **Network** > **Advanced** > **TCP/IP**.
- Confirm the values for the IPv4 address and subnet mask.

Configure the IP Address on your Brother machine

Print the Network Configuration Report, and confirm the values for the IP address and subnet mask.

Check the IP addresses for both your computer and your Brother machine. Confirm that the network address portions are the same. For example, if the subnet mask is "255.255.255.0", it is normal for only the host address portions to be different.

	Network Address	Host Address	
IP Address	192.168.100.	250	Set the final number, which corresponds to "0" in the subnet mask, to 1–254.
Subnet Mask	255.255.255.	0	Usually, there are no problems when the subnet mask is "255.255.255.0". Use the same value for all of your computers.

-

Reset Functions Overview

The following reset functions are available:

1. [Machine Reset]

You can reset all the machine's settings that you have changed.

2. [Network]

Reset the print server back to its default factory settings (includes Password and IP Address information).

3. [All Settings]

Use this reset function to reset all of the machine's settings to the settings originally set at the factory.

We strongly recommend you perform this operation when you dispose of the machine.

Unplug the interface cable before you select [Network] or [All Settings].

Routine Maintenance

- [Replace the Ink Cartridges](#)
- [Clean Your Brother Machine](#)
- [Check Your Brother Machine](#)
- [Correct the Paper Feed to Clear Vertical Lines](#)
- [Change the Print Options to Improve Your Print Results](#)
- [Pack and Ship Your Machine](#)

Replace the Ink Cartridges

Your Brother machine is equipped with an ink dot counter. The ink dot counter automatically monitors the level of ink in each of the four ink cartridges. When the machine detects that an ink cartridge is running out of ink, the machine will display a message.

The LCD displays which ink cartridge needs replacing. Be sure to follow the LCD prompts to replace the ink cartridges in the correct order.

Even though the machine tells you to replace an ink cartridge, there will be a small amount of ink left in the ink cartridge.

CAUTION

If the ink gets into your eye, rinse it with water immediately. If left as is, it may cause redness or mild inflammation of the eye. In case of any abnormality, consult with your doctor.

IMPORTANT

We recommend using genuine Brother supplies to ensure stable print quality and performance. Although not all non-genuine supplies may cause quality issues, it is possible that some may adversely affect print quality or cause machine malfunction. Brother may charge for repairing your machine if it is proven that non-genuine supplies caused the damage, even if the machine is still covered by the warranty.

1. Open the ink cartridge cover (1).

2. Press the lock release lever to release the ink cartridge colour indicated on the LCD and remove the ink cartridge from the machine, as shown in the illustration.

3. Open the new ink cartridge bag for the colour indicated on the LCD, and take out the ink cartridge.

IMPORTANT

- DO NOT touch the ink cartridge in the area indicated (1); this can prevent the machine from detecting the cartridge.

- Quickly shake just the **black** ink cartridge horizontally 15 times as shown, before inserting it into the machine.

-
4. Insert the ink cartridge in the direction of the arrow on the label.
Each colour has its own correct position.

-
5. Gently push the area marked "PUSH" until the ink cartridge locks into place, and then close the ink cartridge cover.

The machine resets the ink dot counter.

If the machine does not detect the ink cartridge after you install it, check that the ink cartridge is installed correctly. Remove the ink cartridge and reinstall it slowly until it locks into place.

IMPORTANT

- DO NOT shake the ink cartridges, once installed into the machine. If ink stains your skin or clothing, wash with soap or detergent at once.
- DO NOT remove ink cartridges if you do not need to replace them; otherwise, the machine will not know the ink quantity left in the cartridge.
- DO NOT touch the ink cartridge insertion slots; the ink may stain your skin.
- If you mix the colours by installing an ink cartridge in the wrong position, the LCD shows [Wrong Ink Colour].
Check which ink cartridges are not matched by colour to their ink cartridge positions and move them to their correct positions.
- Use unopened ink cartridges by the expiration date written on the ink cartridge package.
- DO NOT dismantle or tamper with the ink cartridge; this can cause the ink to leak out of the ink cartridge.

Clean the Print Head from Your Brother Machine

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

- Clean the print head if there is a horizontal line or a blank space in the text or graphics on printed pages.
- Cleaning the print head consumes ink.
- Cleaning too often uses ink unnecessarily.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

1. Press  [Ink] > [Print Head Cleaning].
2. Press [Start].
The machine cleans the print head.

NOTE

If you clean the print head several times and the print has not improved, try the Special cleaning method. The Special cleaning method uses the most power in cleaning the print head, but also consumes the most ink.

1. Press  [Ink] > [Print Head Cleaning].
2. Press  for five seconds.
The machine starts cleaning.

- The Special cleaning method requires a large amount of ink to clean the print head.
- Use the Special cleaning method only if you previously cleaned the print head several times and the print quality did not improve.
- You can also clean the print head from your computer.

Clean the Print Head Using Web Based Management

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".

4. Go to the navigation menu, and then click **General > Print Head Cleaning**.

Start from ☰, if the navigation menu is not shown on the left side of the screen.

5. If you have print quality problems, try cleaning the print head several times. If the print quality does not improve, use the **Special** option. The **Special** option uses the most power in cleaning the print head, but also consumes the most ink.
6. Click **Start**.

The **Special** option requires a large amount of ink to clean the print head.

7. Click **Yes**.

The machine starts cleaning.

(Windows) You can also clean the print head using the printer driver.

Clean the Print Head from Your Computer (Windows)

To maintain good print quality, the machine automatically cleans the print head when needed. If there is a print quality problem, start the cleaning process manually.

1. Do one of the following:

- For Windows 10, Windows Server 2016, and Windows Server 2019

Click  > **Windows System** > **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.

- For Windows 8.1

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware and Sound** group, click **View devices and printers**.

- For Windows Server 2012 R2

Click **Control Panel** on the **Start** screen. In the **Hardware** group, click **View devices and printers**.

- For Windows Server 2012

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.

- For Windows 7 and Windows Server 2008 R2

Click  (**Start**) > **Devices and Printers**.

- For Windows Server 2008

Click  (**Start**) > **Control Panel** > **Hardware and Sound** > **Printers**.

2. Right-click the **Brother XXX-XXXX Printer** icon (where XXX-XXXX is the name of your model), and then select **Printing preferences**. If printer driver options appear, select your printer driver.

The printer driver dialog box appears.

3. Click the **Maintenance** tab.

4. Select one of the following options:

Option	Description
Check Print Quality...	Use to print the test page and check the print quality.
Print Head Cleaning...	Use to start the cleaning process manually. Select if a line or blank spaces appear in text or graphics on the test page.

5. Click **Start**.

Check the Print Quality

If faded or streaked colours and text appear or if text is missing on your printouts, the print head nozzles may be clogged. Print the check sheet and look at the nozzle check pattern.

1. Press  [Ink] > [Improve Print Quality] > [Check Print Quality].
2. Press [Start].
The machine prints the check sheet.
3. Check the quality of the four colour blocks on the sheet.
4. When an LCD message prompts you to check the print quality, do one of the following:
 - If all lines are clear and visible, press [No], and then press  to finish the Print Quality check.
 - If lines are missing (see **Poor**, as follows), press [Yes].

OK

Poor

5. When the LCD message prompts you to check the print quality of each colour, press the number of the pattern (1–4) that most closely matches the printing result.
6. Do one of the following:
 - If print head cleaning is needed, press [Start] to start the cleaning procedure.
 - If print head cleaning is not needed, the menu screen reappears on the touchscreen. Press .
7. After the cleaning procedure is finished, the LCD message prompts you to print the check sheet again. Press [Yes], and then press [Start].
The machine prints the check sheet again. Check the quality of the four colour blocks on the sheet again.

If you clean the print head several times and the print has not improved, try the Special cleaning method. See *Related Information*.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

When a print head nozzle is clogged, the printed sample looks like this:

After the print head nozzle is cleaned, the lines are gone:

Pack and Ship Your Machine

- When you transport the machine, use the packing materials that came with your machine. Do not tip or turn the product upside down. If you do not pack the machine correctly, any damage that may occur in transit may not be covered by your warranty.
- The machine should be adequately insured with the carrier.

IMPORTANT

It is important to allow the machine to “park” the print head after a print job. Listen carefully to the machine before unplugging it to make sure that all mechanical noises have stopped. Not allowing the machine to finish this parking process may lead to print problems and possible damage to the print head.

1. Unplug the machine from the electrical socket.
2. Using both hands, use the finger holds on each side of the machine to lift the top cover into the open position.
3. Unplug the interface cable from the machine, if it is connected.
4. Gently close the top cover using the finger holds on each side.

5. Open the ink cartridge cover.
6. Press the ink release levers to release the ink cartridges and then take out the ink cartridges.

7. Close the ink cartridge cover.

8. Wrap the machine in the bag.

9. Pack the machine in the original carton with the original packing material as shown below. (The original packing material may differ depending on your country.)

Do not pack the used ink cartridge in the carton.

10. Close the carton and tape it shut.

Change Machine Settings Using Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- [What is Web Based Management?](#)
- [Access Web Based Management](#)
- [Set or Change a Login Password for Web Based Management](#)

What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- We recommend Microsoft Internet Explorer 11/Microsoft Edge for Windows, Safari 13 for Mac, Google Chrome™ for Android (4.x or later), and Google Chrome™/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- You must use the TCP/IP protocol on your network and have a valid IP address programmed into the print server and your computer.

The screenshot displays the Brother Web Based Management interface. At the top left, the machine ID 'XXX-XXXX' is shown. The top right features the 'brother' logo. A dark blue sidebar on the left contains a 'Logout' button, a password warning, and a menu with options: Home, Status (selected), Auto Refresh Interval, General, Print, Administrator, Online Functions, and Network. The main content area is titled 'Status' and includes: 'Device Status' (Ready), 'Automatic Refresh' (Off selected), 'Estimated Ink Level' (Cartridge and Internal Ink Reservoir for M, C, Y, BK), 'Remaining Page Yield' (Approximate Page Yield for M, C, Y, BK), 'Paper Level' (T1, T2), and 'Web Language' (Auto).

The actual screen may differ from the screen shown above.

Related Information

- [Change Machine Settings Using Web Based Management](#)

Access Web Based Management

- We recommend Microsoft Internet Explorer 11/Microsoft Edge for Windows, Safari 13 for Mac, Google Chrome™ for Android (4.x or later), and Google Chrome™/Safari for iOS (10.x or later). Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- The default password to manage this machine's settings is located on the back of the machine and marked "Pwd". We recommend immediately changing the default password to protect your machine from unauthorised access. You can also find the default password in the Network Configuration Report.
- If the password is entered incorrectly several times, you will not be able to log in for a while. The lockout settings can be changed in Web Based Management.
- Up to eight computers or mobile devices can be logged in to Web Based Management at the same time. If you log in a ninth device, the first device will be logged out.
- We recommend using the HTTPS security protocol when configuring settings using Web Based Management. If you use HTTP when configuring settings using Web Based Management, follow the screen prompts to switch to a secure HTTPS connection.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box. To avoid displaying the warning dialog box, you can install a self-signed certificate to use SSL/TLS communication. For more detailed information, see *Related Information*.

- >> [Start from Your Web Browser](#)
- >> [Start from Brother iPrint&Scan \(Windows/Mac\)](#)
- >> [Start from Brother Utilities \(Windows\)](#)
- >> [Start from Brother Mobile Connect](#)

Start from Your Web Browser

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. If required, type the password in the **Login** field, and then click **Login**.
4. If you want to pin the navigation menu on the left side of the screen, click ☰ and then click 🌟.

You can now change the machine settings.

If you change the protocol settings, you must restart the machine after clicking **Submit** to activate the configuration.

After configuring the settings, click **Logout**.

Start from Brother iPrint&Scan (Windows/Mac)

1. Start Brother iPrint&Scan.

- Windows

Launch  (**Brother iPrint&Scan**).

- Mac

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.
3. Click  (**Machine Settings**).
4. Click **All Settings**.
Web Based Management appears.
5. If required, type the password in the **Login** field, and then click **Login**.
6. If you want to pin the navigation menu on the left side of the screen, click  and then click .

You can now change the machine settings.

If you change the protocol settings, you must restart the machine after clicking **Submit** to activate the configuration.

After configuring the settings, click **Logout**.

Start from Brother Utilities (Windows)

1. Launch  (**Brother Utilities**), and then click the drop-down list and select your model name (if not already selected).
2. Click **Tools** in the left navigation bar, and then click **Machine Settings**.
Web Based Management appears.
3. If required, type the password in the **Login** field, and then click **Login**.
4. If you want to pin the navigation menu on the left side of the screen, click  and then click .

You can now change the machine settings.

If you change the protocol settings, you must restart the machine after clicking **Submit** to activate the configuration.

After configuring the settings, click **Logout**.

Start from Brother Mobile Connect

You need to install and set up Brother Mobile Connect on your mobile device.

1. Start Brother Mobile Connect on your mobile device.
2. Tap your model name on the top of the screen.
3. Tap **All Machine Settings**.
Web Based Management appears.
4. If required, type the password in the **Login** field, and then tap **Login**.
5. If you want to pin the navigation menu on the left side of the screen, tap  and then tap .

You can now change the machine settings.

If you change the protocol settings, you must restart the machine after tapping **Submit** to activate the configuration.

After configuring the settings, tap **Logout**.

Set or Change a Login Password for Web Based Management

The default password to manage this machine's settings is located on the back of the machine and marked "Pwd". We recommend immediately changing the default password to protect your machine from unauthorised access.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example:

https://brnxxxxxxxxxxxx

The NetBIOS name can be found in the Network Configuration Report.

3. Do one of the following:
 - If you have previously set your own password, type it, and then click **Login**.
 - If you have not previously set your own password, type the default login password, and then click **Login**.
4. Go to the navigation menu, and then click **Administrator > Login Password**.

Start from , if the navigation menu is not shown on the left side of the screen.

5. If you want to change the password, type your current password in the **Enter Old Password** field.
6. Following the on-screen **Login Password** guidelines, type your password in the **Enter New Password** field.
7. Retype the password in the **Confirm New Password** field.
8. Click **Submit**.

You can also change the lockout settings in the **Login Password** menu.

Supply Specifications

Ink	The machine uses individual Black, Yellow, Cyan and Magenta ink cartridges that are separate from the print head assembly.
Service Life of Ink Cartridge	The first time you install a set of ink cartridges the machine will use an amount of ink to fill the ink delivery tubes for high quality printouts. This process will only happen once. After this process is complete the cartridges provided with your machine will have a lower yield than LC427 cartridges (approximately 75% for Black and 65% for colour) ¹ . With all following ink cartridges you can print the specified number of pages.
Replacement Supplies	<Black> LC427XLBK <Yellow> LC427XLY <Cyan> LC427XLC <Magenta> LC427XLM Black - Approximately 6000 pages ¹ Yellow, Cyan and Magenta - Approximately 5000 pages ¹
	<Black> LC427BK <Yellow> LC427Y <Cyan> LC427C <Magenta> LC427M Black - Approximately 3000 pages ¹ Yellow, Cyan and Magenta - Approximately 1500 pages ¹

¹ All replacement cartridges will provide approximate page yield stated in accordance with ISO/IEC 24711. For more page yield information, see www.brother.com/pageyield.

Information Regarding Recycled Paper

- Recycled paper is of the same quality as paper made from original forest sources. Standards governing modern recycled paper ensure that it meets the highest quality requirements for different printing processes. The imaging equipment supplied by Brother is suitable for using with recycled paper meeting the EN 12281:2002 standard.
- Purchasing recycled paper saves natural resources and promotes the circular economy. Paper is made using cellulose fibres from wood. Collecting and recycling paper extends the life of fibres over multiple life cycles, making the best use of the resources.
- The recycled paper production process is shorter. The fibres have already been processed, so less water and energy, and fewer chemicals are used.
- Paper recycling has the benefit of saving carbon by diverting paper products from alternative disposal routes such as landfill and incineration. Landfill waste emits methane gas, which has a powerful greenhouse effect.
